Section 4. That if the said Philadelphia, Wilmington and Baltimore Railroad Company, or any other railroad company in this State, shall, either as the operator of its own railroad or railroads, or as lessee of other railroads within the State, charge and receive a greater rate per mile for the carriage of passengers (except so far as the same may be increased to the amount of the tax annually paid under the provisions of chapter 458, volume 12, of the Laws of Delaware) or for the carriage or transportation of goods, wares, or merchandise or other property whatsoever from place to place within the State, or from a place within the State to a place without the State, than is charged by such company for the carriage of passengers and the transportation of property or freight for like distances or per mile from places without the State to places within the State, or from places without the State through the State to other places without the State, the person or persons paying such charges, either as fare or freight, shall be entitled to recover from such company so charging and receiving the same, a sum of ten fold the amount of the money so paid, to be recovered in an action of debt or assumpsit as like amounts are now recovered by law.

The Judges who composed the Court in this case, and who made the decision, were Chancellor Bates, presiding; Chief Justice Gilpin and Judges Wootten, Houston and Wales.

Jersey City and Albany Railroad.

The stockholders of the Ridgefield Park Railroad Company, of New Jersey, and the Rockland Central Railroad Company, of New York, held a joint meeting on the 14th inst., at their offices, No. 25 Nassau street, and formed a consolidation under the name of "The Jersey City and Albany Railroad Company."

The following persons were elected Directors of the new road; Messrs. D. C. Culver, William A. Shepard, J. F. Mallory, James A. Williamson, C. W. Alburtis, William S. Banta, James Tompkins, E. K. Alburtis and C. A. Jordan.

The following officers were afterwards chosen: President, E. K. Alburtis; Treasurer C. A. Jordan; and Secretary, Jas. Tompkins.

The new line will run from New York to Albany on the west bank of the Hudson River. The terminus will be at Haverstraw. As the two tracks are rapidly laying and will be completed about the end of the summer up to that point, the joint railroad will be formally opened in the ensuing spring.

☞ The surveys having been completed, the contract for grading the extension of the Quincy, Alton and St. Louis Railroad between Fall Creek and Hannibal bridge has been awarded to Davis, Foster & Co., of Hannibal, Mo.; and the trestle work on the same to A. T. Lionberger, of Dallas City. This extension gives Quincy the much desired connection with the Missouri, Kansas and Texas Railroad.

Commerce of New York.

The foreign imports at New York for the month of May, 1872 and 1873, are officially stated as follows:

	1872.	1873.
Entered for consumpt'n.	$16,368,458	$12,716,218
Do. for warehousing.....	23,002,975	12,930,999
Free goods.....	3,111,784	8,772,158
Specie and bullion.....	96,023	196,821
Total entered at port...	$42,579,240	$34,616,191
Withdrawn fr. wareh'use	10,199,829	10,806,601

The foreign imports at New York for five months from January 1, were:

	1872.	1873.
Entered for consumpt'n..	$98,985,328	$84,091,821
Do. for warehousing....	88,374,363	61,036,656
Free goods.....	14,033,539	44,980,815
Specie and bullion.	733,854	1,841,654
Total entered at port...	$202,127,084	$191,900,446
Withdrawn fr. wareh'se.	56,468,319	54,869,692

The foreign imports at New York for eleven months ending May 31, were:

	1872.	1873.
Six months.....	$183,028,276	$199,326,050
January.....	35,679,496	37,803,691
February.....	38,206,143	38,860,517
March.....	39,218,268	43,440,621
April.....	46,443,937	37,179,426
May	42,579,240	34,616,191
Total for 11 months....	$385,155,360	$391,226,496
Deduct specie.....	2,340,410	6,658,284
Total mdse.....	$382,814,950	$384,568,212

The duties received at New York for eleven months from July 1, were:

	1872.	1873.
Six months.....	$74,078,181 75	$64,393,092 93
January.....	13,317,086 82	10,763,626 44
February.....	14,710,928 08	12,893,637 89
March.....	14,095,994 24	12,101,274 64
April.....	13,948,999 00	9,826,491 32
May	10,806,468 92	8,862,528 38
Ten months.....	$140,957,658 81	$118,940,651 60

The exports from New York to foreign ports in the month of May, were:

	1872.	1873.
Domestic produce.....	$14,746,837	$24,754,461
Foreign free goods.....	36,977	222,853
Do. dutiable.....	1,097,133	1,275,712
Specie and bullion.....	14,850,556	2,943,853
Total exports	$30,731,503	$29,196,609
Do. exclusive of specie.	15,880,947	26,253,026

The exports from New York to foreign ports for five months from January 1, were:

	1872.	1873.
Domestic produce.....	$81,394,156	$110,177,625
Foreign free goods.....	581,823	1,149,604
Do. dutiable	4,390,944	3,717,326
Specie and bullion.....	24,576,697	21,168,288
Total exports.....	$110,943,620	$136,207,843
Do. exclusive of specie..	86,366,923	115,044,555

The exports (exclusive of specie) from New York to foreign ports for eleven months ending with May, were:

	1872.	1873.
Six months.....	$119,604,290	$130,400,814
January.....	18,951,004	20,050,550

March.....	16,530,019	21,982,209
April.....	17,089,784	25,619,768
May	15,880,947	26,253,026
Total produce....	$205,971,213	$245,445,869
Add specie.....	46,887,621	56,007,431
Total exports.....	$252,858,834	$301,452,800

Patent Railroad Brakes.

THE VACUUM VERSUS WESTINGHOUSE.

There has never been a more interesting competitive trial of railroad appliances designed for the protection of the lives of the traveling public, or one which was witnessed by a body of men better qualified by education and experience to judge of and decide upon the relative merits of the inventions brought under test than that which took place on the Boston and Maine Railroad yesterday afternoon. It is a fact well known in railroad circles, and the public generally have been informed through the reports of several experimental trials, that the Westinghouse air brake, as applied to the passenger cars of several of the trunk lines running out of Boston, has proved the most effective means of arresting the progress of a train of cars of the many inventions which have been applied. There have been, and still are, rivals on the track for the honors justly bestowed upon the Westinghouse apparatus, one of which—the Vacuum Brake—which has been successfully applied to the cars of the Boston and Lowell and Boston and Maine Railroads, was brought out yesterday upon its first trial with the Westinghouse. The proprietors of the latter invention have courted a competitive exhibition in this vicinity for several months, and would have been met by the adherents to the principle of a vacuum cylinder in the trials which took place on the Eastern Railroad several weeks ago but for the fact that the managers of the Lowell road, when the application was first made in New England, were not prepared to meet the well equipped trains and the disciplined engineers of the Eastern Railroad, which, with the Boston and Providence, were among the first to apply the Westinghouse apparatus to their passenger cars.

The rival parties—and upon the merits of the two inventions the several Railroad Superintendents of Massachusetts Railroads have been divided—have been seeking a favorable opportunity to put their relative apparatus to the test. The Boston and Maine Railroad having been using for several months both the Vacuum and Westinghouse brakes, Mr. James T. Furber the General Superintendent, was anxious to witness a trial of both when run on parallel tracks and under like circumstances. He therefore proposed making a trial over fourteen miles of his track between Reading and Lawrence, and invited the proprietors of the two inventions, the members of the Master Car Builders' Association now in annual session in this city, together with the Superintendents, Master Machinists, railway supply merchants and others interested in the matter to the trial which came off yesterday. It was expressly stated in the invitation that if either the Westinghouse or Vacuum Brake Companies were dissatisfied with the condition of their brakes at the time of trial, Mr. Furber would be pleased to have them put their brakes in order, and then give them another trial.

It is perhaps needless to state under the circumstances that the agent of the Westinghouse brake complained that he had not had sufficient notice of the proposed trial to fit up a train expressly for the purpose, and but for the fact that the cars which were brought over from the Eastern Railroad, were fitted with the automatic arrangement, and carried auxiliary air chambers for supplying the pumps, he might have had reason to complain. The protest of Mr. Morris Sellers, who conducted the trial in behalf of the Westinghouse brake, which was not fully understood either by the committee or the representatives of the press, was productive of a free expression of opinion by his good tempered opponents, Mr. Furber and Mr. Winslow, the latter from the Lowell road, agreed that the trial should be a fair one, and the arrangements proceeded.

A special train left the Boston and Maine depot at 12.35 P. M., with several hundred invited guests, and proceeded to Reading, between which point and Lawrence the track had been measured and staked off with mile posts. A request by Mr. Sellers for the appointment of a committee of five or more Superintendents of roads centering in this city, was complied with and a schedule of experiments such as would apply to the practical operation of trains in general use for the protection of the traveling public was agreed upon. The committee consisted of A. A. Folsom, Superintendent of the Boston and Providence; E. M. Reed, General Superintendent of the New York, Hartford and Springfield Railroad, John Mullegan of the Connecticut River Railroad, J. K. Kendrick of the Old Colony, J. W. Philbrick of the Maine Central A. B. Underwood of the Boston and Albany, J. M. Lander of the Northern, R. S. Raney of the Pennsylvania Central, and F. O. Adams of the Boston and Albany Railroad.

When the special train arrived at Reading, there were two trains in waiting for the preliminary tests. The trains consisted of twelve cars.

One of them was equipped with the Westinghouse brake as originally applied, minus the automatic arrangement, while the other carried the Smith vacuum apparatus. The first trial commenced at eight minutes of two, and both trains ran neck and neck, at the rate of 20 miles an hour a distance of several miles, when upon the explosion of a torpedo both engineers applied the brakes, and the trains were stopped—the vacuum half the length of the engine and tender behind the Westinghouse. Verdict in favor of the vacuum brake, although the engineer did not shut off as promptly as he might have done.

In the second trial the train with the vacuum brake was stopped with the pilot abreast the forward driving wheel of the Westinghouse engine, and the victory was accorded to the atmospheric apparatus.

The third trial was made with both trains running at the rate of thirty miles an hour, and the result was the same as in the last experiment.

The fourth trial, which changed the odds in favor of the improved automatic Westinghouse brake, was between a train of nine cars from the Eastern road, drawn by the locomotive "Bangor," driven by Abraham Marston, and another of the same number of cars, drawn by the engine "Minerva," William Faunce engineer, having the vacuum brake attached. The trains were run three miles, and were fairly abreast when the torpedo exploded and the brakes were applied. The Eastern train was stopped within half its length, and the Boston and Maine was stopped at a distance of five cars ahead.

This trial was repeated with a similar result, the Eastern Westinghouse train gaining several seconds and the length of five passengers behind the vacuum train.

The sixth trial was a duplicate of the experiment which took place on the Eastern Railroad several weeks ago, in which the engine broke loose from the train and the latter was stopped by automatic pressure upon the brakes. The seventh test involved the breaking apart of the train, by which the rear portion was stopped, while the forward part attached to the engine kept on and was also brought to a stand still by the pressure upon the cylinders. The committee reported that in the first and second trials between the two trains of the Boston and Maine Railroad, fitted respectively with the Westinghouse and Vacuum brakes, the result was not sufficiently definite to enable them to report. In the third trip the stop was made in thirty-one seconds by the Vacuum train; in the fourth, by the same train, in twenty-six seconds.

The trials having ended, both trains were run to South Lawrence, where the company were fed from the refreshment tables of the station at that point. On the return to Boston the Committee were divided—Messrs. Folsom and Kendrick coming down on the Eastern Westinghouse train, which made half a dozen stops upon an average of five seconds at each station, and the Vacuum train with Messrs. Mullegan and Underhill on the Boston and Maine train. Owing to some disarrangement of the apparatus on the latter train only two tests were made upon the stoppage.

After the experiments a meeting of those who were present at the trials was called on the train

from Lawrence by Mr. Winslow, Superintendent of the Boston and Lowell Railroad. The meeting was organized by appointing Hon. A. D. Briggs of Springfield, Mass., Chairman, and Mr. M. N. Forney of New York Secretary.

On motion of N. C. Baker of New York, it was resolved that the thanks of the members of the Master Car Builders' Association and others invited to witness the experiments, be extended to the Boston and Maine Railroad Company, and to Mr. Furber, its Superintendent, and to the other officers of that road, for affording so excellent an opportunity of seeing the practical working of the two systems of train brakes.

On motion of Mr. Ivers Phillips of Worcester, a similar vote of thanks to the Eastern and to the Boston and Lowell Railroad Companies, and to the officers of those roads, was passed, and the Secretary was instructed to send a copy of these resolutions to the officers named.—*Boston Journal, June* 12.

Bleecker Street and Fulton Ferry Railroad.

AN ACT to authorize the Bleecker Street and Fulton Ferry Railroad Company of the city of New York to extend their railroad tracks through certain streets and avenues in the city of New York.

PASSED April 11, 1873.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Bleecker street and Fulton Ferry Railroad Company, of the city of New York, is hereby authorized to extend their railroad tracks from their present tracks at the corner of Fourteenth street and Tenth avenue through and along Tenth avenue with double tracks to Little Twelfth street; thence through and along Little Twelfth street with single tracks to Washington street; thence through and along Washington street with single track to Christopher street; also from their tracks at Little Twelfth street and Tenth avenue through and along Tenth avenue to West street with single track; thence through and along West street with single track to Christopher street Ferry (the company to lay their own rails as herein authorized to be laid in Tenth avenue and West street, from Fourteenth street to Christoper street); thence through and along Christopher street with double tracks to connect with their present track in Bleecker street; through and along Christopher street with single track from Bleecker street to connect with its present track in Fourth street, together with the necessary crossings of intermediate streets, connections, turn-outs and switches for the proper and convenient working of said tracks in connection with those now operated by them in said city; also from their present tracks at the corner of Crosby and Bleecker streets through and along Bleecker street with double tracks to Mulberry street; also from Bleecker street through the property to Lafayette place with double tracks upon acquiring the right of way by purchasing or leasing the property between Bleecker street and Bond street; and also the right of way to the property between Bond street and Great Jones street, by purchasing or leasing the same; thence through and along Lafayette place to and across Astor place to Eighth street with double tracks; thence through and along Clinton place or Eighth street with double tracks to University place; thence through and along University place with double tracks to Fourteenth street; thence through and along Fourteenth street with double tracks to their present tracks at the corner of Fourteenth street and Ninth avenue; also from the corner of Fourteenth street and University place through and along Fourteenth street with double tracks to Fourth avenue, together with the necessary switches, curves, turn-outs and side tracks as aforesaid:

§ 2. In the construction, operation or use of said railroad, as hereby authorized to be extended or constructed upon the streets and avenues above designated, should said company deem it necessary or proper to run upon, intersect or use any portion of other railroad tracks now laid, or which may hereafter be laid, upon the streets and avenues above mentioned, then said company is hereby authorized to run upon, intersect and use the same; and in case agreement shall not be made with the owner or owners of such other railroad tracks in respect to the compensation or payment to be made therefor, then the amount of such compensation or payment shall be ascertained and determined in the manner provided by subdivision six of the twenty-eighth section of the act entitled "An act to authorize the formation of railroad corporations and to regulate the same," passed April second, eighteen hundred and fifty.

§ 3. In the construction, use and operation by the said company of the tracks and extensions authorized by this act, the company shall have and exercise the same rights and privileges which are now possessed and exercised under former grants and laws, and may use said road in connection with the roads of other railroad companies in the said city, upon such terms as may be agreed upon between said companies and other railroad companies, and said company is hereby authorized to lease all or any portion of their said road, or to consolidate the same with any other railroad companies. The said company shall pay to the corporation to the city of New York a license fee of fifty dollars for each and every car used by them on said extension, and shall pave and keep in good repair the surface of the streets used by them within the tracks of their said extension.

§ 4. The said Bleecker Street and Fulton Ferry Railroad Company of the city of New York may charge the same fare for the conveyance of passengers over the route hereby extended as they are now authorized to charge, but not be allowed to charge any greater fare for their entire route because of the extension hereby granted, and cars shall be run on said extension as often as the convenience of passengers shall require. And the said Bleecker Street and Fulton Ferry Railroad Company are hereby authorized to make arrangements with any railroad company which they may cross or intersect for the issuing of transfer tickets, provided that the price of such transfer tickets shall not be greater than three cents additional to the regular fare.

§ 5. This act shall take effect immediately.

State of New York, Office of the Secretary of State, ss. I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom and of the whole said original law.

G. HILTON SCRIBNER,
Secretary of State.

☞ The charter of the projected road, known as the Washington and Alexandria Branch of the Baltimore and Ohio Railroad, was leased a few weeks ago for ninety-nine years by the Washington City and Point Lookout Railroad, and now that company, in order to secure $540,000 in bonds to be issued for the construction of the branch, have made a deed of trust on the proposed road to John S. Barbour, Robert Turner and S. S. Belt, trustees for the holders of the bonds. This new branch road is to run from a point on the main line, near where the Baltimore and Potomac Railroad enters the District to a point near the ferry, opposite Alexandria, and also to a point on the Baltimore and Ohio Railroad near Hyattsville.

☞ The following gentlemen have been elected directors of the Cairo and Fulton Railroad Company: Thomas Allen, H. G. Marquand, George Cabot Ward, William T. Blodgett, J. M. Loughborough, S. H. Laflin, W. R. Allen, Edward Cross, Gordon N. Peay, R. A. Edgerton, I. M. Moore, J. W. Martin, William H. Winfield.

☞ Work is progressing satisfactorily on the Montpelier and Wells River Railroad.

Railroads in Asia.

The bridging of the comparatively narrow tract which separates the civilizations of India and of Europe is to be accomplished perhaps even more rapidly than anybody now suspects. The gradual advances of Russia toward the Punjaub frontier have been watched for many years, and it has been a curious matter of speculation just where the British and Russian lines should finally meet, and how soon the barbarism that now lies between them should be obliterated in the conflict of these great and aggressive powers. But it seems we are not to wait for the slow course of conquest, annexation, armed occupation, or whatever else the Czar may choose to call his absorption of the Tartar territory. M. de Lesseps has formed a project for constructing under Russian auspices a railway across Turkestan, to complete the chain of communication between St. Petersburg and Calcutta. It is understood that M. de Lesseps has received the assent of the Imperial Government, and there is no reason to doubt that the daring engineer who built the Suez Canal will be able, with the proper official encouragement, to execute this much less difficult and ambitious work.

The locomotive has already penetrated as far as Orenburg on the Ural River, a frontier town of European Russia, 1,400 miles from St. Petersburg. Thence there will be a desert stretch of 1,500 miles to Samarcand, across the Kirghis Steppes, and from Samarcand another stretch of 850 miles through Bokhara to Peshawur, on the borders of British India. At that point the new line would connect with the railways already built or now building, the English having rail communication already from Calcutta and the other chief cities of Hindostan to Lahore, only 270 miles from the frontier. Of course the construction of this great road under Russian protection would be equivalent to the annexation of Turkestan to the empire.

Meanwhile another scheme of still grander proportions has been formed in Persia, where the Shah has granted to Baron Reuter, the famous news-collector, certain exclusive privileges which may result in the entire renovation of the kingdom. Reuter and his associates are to build railways with aid from the State; to construct canals, reservoirs, wells, and water-works; to utilize the forests; to work the mines; and to farm the revenues. They are to begin by contracting a loan of £6,000,000, upon which the Persian Government guarantees the interest. A new light may be thrown upon the Eastern question when the iron-horse snorts through Shiraz and Ispahan; but there are obvious reasons why a railroad separated from European civilization on the one hand by the whole extent of Asiatic Turkey, and on the other by the inhospitable Afghan and Belooch territories, should not be especially attractive as an investment. Whether, however, the door of communication between India and Europe is to be placed in the Punjaub or on the lower Indus, it is evident that the world is pressing impatiently for a solution of the political and commercial problem, and that it is not to be much longer delayed.—*N. Y. Tribune.*

☞ The engineers are now engaged in surveying two routes for the Portland and Ogdensburg Railroad from the Twin Mountain House in Carroll to Dalton, on the Connecticut river. The *Republic* of Littleton says that one route starting from Dalton follows the Montreal Railroad to Whitefield and then goes by a short cut up Little river to Carroll. The other route leaves the Montreal Railroad near the Dalton line and goes directly through the village of Whitefield to John's river and then follows that river to the vicinity of Hazen mills, when it strikes into the Carrol stream and follows it to the Twin Mountain House. The latter route is a mile and a half longer than the former, but of easier grade.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

Explanation.—An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *Italics*. State-aid Railroads are distinguished by a "§."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, June 21, 1873.

Stock Exchange and Money Market.

Money has been unusually plenty since our last. The city banks as well as the U. S. Sub-Treasury enlarged their reserves of specie and legal tender notes; and in the hands of private lenders there was a considerable augmentation of the available supply of funds awaiting chances of lucrative employment. There was much less inquiry for accommodation, with call loans quoted down to 4@6, and strictly choice to good mercantile credits at from 6@8 per cent per annum; the tendency at the close having been in favor of borrowers. The extreme dullness at the Stock Exchange was against an active demand for aid for speculative purposes. The banks were responding with promptness and liberality to the requirements of their regular customers in the commercial line. The city banks last week reported an increase of about 8⅝ millions in their deposit line, over one million in their legal tender, and nearly a million in their specie reserves. They enlarged their loan and discount averages over a quarter of a million, and contracted their circulation slightly.

The city banks continue to gain quite encouragingly on their obligatory reserve, the last statement showing that they had $11,971,150 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, enlarged its coin balance nearly ¾ths of a million; while adding moderately to its currency reserve. Its currency reserves at the close of the week were $23,782,443; and its coin hoard, $43,218,138.

The clearances of the banks averaged through the week 78¼ millions a day, and amounted in the aggregate, for the whole week, to $439 261,871, as against $560,623,858 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $307,149 and reduced its coin reserve $728,850 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $26,967,600, against $20,299,700 same time last year. The city bank deposits are now $218,171,100 against $228,995,800, week ending June 15, 1872. The legal tender reserve amounts to $46,397,000, against $55,424,500 same time last year. The circulation now stands at $27,402,700 against $27,519 300 same time last year. The loans are now $277,714,400 against $288,764,300 at this date last year.

The coin reserve of the city banks is now nearly 27 millions as against about 25¾ millions on the 20th of last July; the legal tender reserve is 46⅜ millions against about 55⅛ millions on the statement of June 15th, 1872; and the deposits are now about 218⅛ millions, against 247½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $4,097,088 of currency, and $5,447,774 of gold, the latter including $1,862,000 from customs; and disbursed $3,789,939 of currency and $4,719,924 of gold, the latter embracing $271,089 of coin interest.

Government revenues have been yielding moderate, since our last. The excises yielded within the week about 2¼ millions, and thus far in the current fiscal year beginning with July 1, 1872, 110¾ millions. The customs at the port of New York, for the week, were $1,796,548, and at the outports, about $585,000 more, in coin or coin certificates.

Gold has been much depressed and decidedly lower, the speculative demand having been far less confident. The more favorable foreign financial advices and the more liberal offerings of foreign exchange, as against the enlarged produce and bond shipments, have been against the operators for higher figures. The export drain as well as the customs call was moderate. The range of the price during the week has been from 115⅜@117¾, and the closing quotation on Wednesday was 116 against 117⅜ on Wednesday of the preceding week. The specie outflow last week, was $1,385,859. The Gold Exchange Bank clearances have averaged about 61 millions per day during the week.

The specie exports from San Francisco from Jan. 1, to June 5, were $10,561,015, against $11,050,621 same time in 1872.

The customs demand for Gold last week, averaged $310 334 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $10,650—and thus far in 1873, have been $1,814,187, against $727,187 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $127,410,874 against $150,179,958 during the same time in 1871-2.

The U. S. Treasury balances on Monday were: Currency, $7,700,000; and coin, $73,700,000, including $35,670,000 coin certificates.

Wednesday's specie exports were $650,000.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $71,932 471, against $76,201,623 during the same time in 1871-2.

The export drain of specie was $1 385,859 last week, against $2,183,680 same week preceding year. The shipments since July 1, 1872, have been $59,627,723 against $55,702,165 during the same portion of 1871.

Foreign Exchange has been in much better supply and quoted less firm, on a moderate demand. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, at 110@110¼. The week's exports of Domestic Produce have been to the currency value of $6,571,935.

Under the official programme of the Treasury Department for June, Government proposes to sell during the month Gold as follows: Thursday, June 26, $1,500,000.

Influenced, as to currency values, by the sharp decline in Gold, Government securities yielded a fraction, but met with a prompt sale as offered at the ruling figures, closing steady. The available supply of all issues was very moderate at the current quotations.

Government bought in on Wednesday $500,000 Five Twenties from 115 55@115 62 net, out of an aggregate offering of $991,500.

U. S. sixes of 1881 closed on Wednesday of this week at 122@122¼; U. S. Five-Twenties of 1862, 116⅛@116⅜; U.S. Five-Twenties of 1864 at 116⅛@116⅜; U. S. Five-Twenties of 1865 117⅛@117¾; U. S. Five-Twenties of 1865 consolidated 119⅜@119⅝; U. S. Five-Twenties of 1867, 121@121¼; U. S. Five-Twenties of 1868, 120⅛@120⅜; U. S. Ten-forties at 113¼@113¾; U. S. Fives of 1881 (Funding Loan) 114⅜@114¼; Six per cent. currency Sixes from 114¼@114⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 4.	June 11.	June 18.
Consols	92⅛	92⅞	92⅝
U. S. 5-20s, 1865....	91¾	92⅛	92⅝
" 1867	94⅜	94⅝	*92¼
" 10-40s	88⅝	88⅛	89
New Fives of 1881...	89⅜	89½	89⅛
Erie	48⅝	49¼	49¾

* Ex July coupon.

State bonds have been in less demand, and generally easier in price.

The Railway and Miscellaneous share speculation has been unusually tame and spiritless, as a rule, with a much reduced volume of dealings in all lines, especially in the speculative favorites. Prices have shown less firmness.

Railway Mortgage Bonds have been in fair investment demand at comparatively firm rates. Central Pacific Sixes have been in request at from 103⅛@103¼. Chesapeake and Ohio Sixes have been selling to a fair extent at 88½ and interest. Western Pacific Sixes have been in demand at 95. The Northern Pacific 7-30 Loan at par and interest.

General business has been less active. Dry Goods, Hardware, Earthenware, Groceries, Hides, Leather, Skins, Fruit, Hemp, Fish, and Spices have been quiet. There has been a generally slow movements in Metals. Copper market has been dull and weak, with sales reported of only 100,000 lbs. Lake, in lots, at 29⅛c.@29¼c. Iron has been unusually tame, with values favoring buyers; no important dealings transpired. We quote Glengarnock Pig at $45@$46; Eglinton do. $44@$45; No. 1 American Pig at $48@$49; No. 2 do. $46@$47; Wrought Scrap at $45@$48; English rails at $70, gold; American Rails at works, $80@$82 50; old Double-head and T Rails at $52. Pig Lead has been inactive and somewhat nominal at 6¾c., gold, for ordinary foreign. Spelter has been very quiet at 7⅝c.@7⅞c., gold. Pig-tin has been in very moderate request, with Straits quoted at 31c., with sales of 200 slabs, and English at 30c.; Banca, 36c.@36½c., gold. Tin Plates have been in rather better demand and steadier in price, with sales reported since our last of 1,000 boxes Charcoal, part at $11@$11 12½; 500 boxes Charcoal Terne, $10, and 250 boxes Coke Terne, on private terms. Charcoal Plates quoted here $11@$11 25; Charcoal Terne, $9 75@$10 25; Coke, $8 50@$9 50; Coke Terne, $7 75@$9 gold, per box. Zinc nominal.

In the leading kinds of domestic produce, a fairly active trade has been noted, with Breadstuffs quoted lower; Provisions, firmer; Wool, steady; Cotton, higher. Middling upland Cotton left off at 21c. per lb. The receipts at all the ports, since Sept. 1, have been 3,455,135 bales, against 2,645,227 bales same time in the preceding year; exports 2,469,575 bales against 1,892,827 bales in the previous year; stock at the ports at latest dates, 254,800 bales against 164,416 bales same date 1871.

Foreign goods have been in slack request as a rule, and weak as to values. The week's imports amounted to $6,218,013, including $1,215,938 of dry goods.

Ocean freights have been quoted stronger, and quite active, with Grain and Petroleum room in most demand.

At the Live Stock Markets, Beeves have been less active at from 9@13¾ cts. Veals in moderate demand at 4½@9½ cts.; Sheep at from 4¾@7 cts.; Spring Lambs, 8@13 cts.; Swine at 5⅛@5½ cts. per lb., all live weight. The week's receipts were 8,734 Beeves, 4,707 Veal Calves, 24,995 Sheep and Lambs, and 29,171 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Another Railroad in New Jersey.

The Philadelphia *Ledger* says that workmen are now engaged in making the necessary surveys of a railroad between Camden and Keyport, on the Raritan Bay. The road commences at Keyport, and will run thence to Freehold, a distance of 11 miles; thence to Manchester, 16 miles; thence to Medford, 28 miles; thence to Camden, 16 miles. The work of grading is now going on between Medford and Ellisburg, on the Camden end of this road, and also between Freehold and Keyport. The principal men engaged in this enterprise are Messrs. Brown and Company, of New York, and the road will be operated independently of the New Jersey Southern and also of the Pennsylvania Central. The Western terminus is to be at Kaighn's Point, in Camden. About two thousand men are to be put to work on it in a few days, who will push it with all possible speed to completion.

☞ The Lynchburg *Virginian* learns from Col. Ward, the engineer of the Lynchburg and Danville Railroad, that the grading of the road from Lynchburg to Danville has been completed, and is now ready for the rail, and that that part of the division will be finished from Danville to Banister river, about four miles south of Danville, some time next week, and the remainder through in thirty days. The work on the bridge over Banister river, the cost of which is estimated at $8,000, is rapidly progressing, and will be prepared to perform heavy duty by the 1st of July.

☞ Contracts for the construction of the Cincinnati and Gt. Western Railway are being made. The section from VanWert, Ohio, to Eaton, Ohio, has been awarded to the Improvement Company of Pennsylvania. J. T. Brady, Esq., of Pittsburg, Pa., is President of the company.

☞ The earnings of the Central Pacific Railroad in May, 1873, were $1,356,878, against $1,380,922 in May, 1872—a decrease of $24,544. For the first five months of 1873 the earnings were $5,010,638, against $4,370,343 for the corresponding period of 1872—an increase of $640,290.

☞ The Delaware and Hudson Canal Company will pay, July 1, a half yearly dividend of three and a-half per cent on the stock of the Albany and Susquehanna (leased) Road, and four per cent on the stock of the Rensselaer and Saratoga (leased) Road.

☞ The Master Car Builder's Convention have elected the following officers for the ensuing year: President, J. H. Van Houton, of Pittsburg; Vice President, V. D. Perry, of Hartford; Secretary, Leander Gary, of Morrisania, N. Y.; Treasurer, A. Steinback, of Reading, Pa.

☞ The exports of petroleum from Philadelphia to foreign ports during the week ending June 14 amounted to 2,138,002 gallons, making a total of 27,562,650 gallons since the first of January. A large number of vessels are now loading with oil along the the Schuylkill and Delaware.

☞ The New York, New Haven and Hartford Railroad Company have declared a half-yearly dividend of five per cent, payable July 1.

BANKING HOUSE OF FISK & HATCH, No. 5 NASSAU-ST., NEW YORK, June 20, 1873.

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds, the following Securities of well-known character and established reputation, viz:

THE CHESAPEAKE AND OHIO SIX PER CENT. BONDS—Principal and Interest payable in Gold Coin in New York city; Interest payable May 1 and Nov. 1; issued in denominations of $100, $500 and $1,000, either Coupon or Registered; price **88 1-2** and accrued interest.

Also, THE CHESAPEAKE AND OHIO SEVEN PER CENT. BONDS—Principal and Interest payable in Gold Coin in New York city; Interest payable January 1 and July 1. Bonds of $1,000 each, Coupon or Registered—price 90 and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD is completed and in operation from Richmond to the Ohio River, a distance of 420 miles, at a cost with the equipment of over $35,000,000, and is doing a large, profitable, and rapidly increasing business.

Pamphlets, containing full information concerning the Road and the country it traverses, will be furnished upon application.

We also deal in GOVERNMENT BONDS, CENTRAL and WESTERN PACIFIC, and other first-class Securities; receive deposits, on which we allow four per cent interest, make collections, and do a general Banking business.

FISK & HATCH.

New Jersey Southern Railroad.

The Chestertown, Kent Co., Md., *Transcript*, of 14th inst., says:

On Wednesday last a consolidated mortgage from the New Jersey Southern Railroad Company, to John R. Garland and Walter B. Palmer, Trustees, for $7,000,000, was filed in the Clerk's Office for this country. The New Jersey Southern intends to consolidate with the Long Branch and Sea Shore Railroad, the New Egypt and Farmingdale Railroad, the Tom's River and Warrentown Railroad, the Pemberton and New York Railroad, the Vineland Railway, the Smyrna and Delaware Bay Railroad, the Kent County Railroad, the Maryland and Delaware, and such other roads as shall or may be requisite to make a continuous line to Baltimore and to Norfolk. The object of the mortgage is to secure bonds to the amount of seven millions of dollars, and conveys to the trustees above named the aforesaid Railroads.

☞ The Eastern and Maine Central Railroads are now run as one line under the general management of the Eastern Railroad. The division of interests in the business and profits are five-ninths for the Eastern and four-ninths for the Maine Central. This new arrangement will secure to the Eastern road superior advantages as regards through business. With its splendid equipment and general enterprise, the whole line between Boston and Bangor will be run all the more satisfactorily. It is also stated that ere long the European and North American Railroad will be included in the same arrangement, and all three be comprised into one through line to St. John.

☞ The Delaware, Lackawanna and Western Railroad Company will pay, July 1, the half yearly dividend of three and a half per cent on the stock of the Morris and Essex (leased) Road.

Knoblauch & Lichtenstein,

No. 37 Broad-st., New York.

OFFER FOR SALE

$200,000

7 Per Cent. First Mortgage Bonds,

30 YEARS TO RUN,

OF THE

CENTRAL R. R. EXTENSION COMPANY

OF LONG ISLAND,

At 90 and Accrued Interest in Currency

The road runs from Farmingdale, the present terminus of the Central Railroad, to Babylon on the South Shore of the Island. According to contract, the road will be finished by July 15th, ready for this summer's travel.

These Bonds being a *home security*, and among the best ever offered in this market, we take special pleasure in recommending them.

Pamphlets or further particulars will be promptly furnished on application.

Lobdell Car Wheel Company.

The Lobdell Car Wheel Company, of Wilmington, Del., has two foundries, in one of which castings are made for cars, bridges, rolling mills, and steam engines, together with chilled rolls for rolling iron, brass, and for paper machinery, and also brass castings; it also has a machine shop and blacksmiths shops attached. The other foundry, which is exclusively for car wheels and tires, has a capacity of 300 car wheels a day. Contiguous to this foundry is a large machine shop, containing enough machinery to bore 200 wheels and fit 100 axles a day. It also contains machinery for turning and grinding chill rolls, &c. Besides being used very extensively in this country, large numbers of these wheels are sent to South America, England, Ireland, and the Continent. Many of the tram roads of England are supplied from this establishment.

☞ The land sales of the Burlington and Missouri River Railroad in Nebraska amounted in April to $97,730; and in May to $119,924. The total number of acres sold to June 1 has been 341,480, yielding $2,833,409. About half the entire bonded indebtedness being thus provided for by the sale of hardly one-seventh of the company lands.

☞ The transfer books of the Illinois Central Railroad Company closed June 14, to be reopened July 1, for the allotment of the new shares (one to every even five registered) upon which shares the first instalment of 50 per cent will be payable on or before July 1.

☞ The earnings of the Erie Railway Company for the week ending June 7, 1873, were $401,555, and since November 1, 1872, $10,956,958—an increase over the corresponding period of the previous year of $298,774.

☞ C. B. Squires, of Defiance, Ohio, has been awarded the contract to build fifteen miles of the second track to be laid on the Pittsburg, Fort Wayne and Chicago Railway, east of Crestline, Ohio.

Journal of Railroad Law.

RAILROAD COMPANIES NOT RESPONSIBLE FOR INJURIES TO PERSONS WHILE GETTING ON CARS IN MOTION.

The facts in the late case of Phillips *vs.* The Rensselaer and Saratoga Railroad Company, (49 N. Y. 177), are fully and clearly stated in the following opinion by—

GROVER, J.—The question arising upon the exception to the nonsuit, ordered by the judge upon trial, is whether the jury would have been warranted in finding from the evidence that the injury received by the plaintiff resulted from the negligence of the defendant or its servants, and that he was free from any negligence contributing thereto. The inquiry as to the plaintiff is whether it was negligence in him to attempt to get upon the train while in motion under the circumstances which the evidence showed, as no question can be made but that such attempt contributed to the injury.

The plaintiff testified in substance that he bought a ticket and that a train soon after came along, slowed up but did not stop, but passed along, some one on board hallooing that there was to be another train along. That the station where he bought the ticket was the west side of the track, but that there was no platform there, from which passengers could get upon the cars. That there was quite a crowd there, and upon the approach of the train in question, he and some others went over to the east side of the track, thinking they could more readily get upon the train from there. That the cars came and slowed down, and, as he started to get on, they had about stopped; others began to jump on; ahead of him a good many were jumping on. That the brakeman called out West Troy (name of the station). That they were getting on all along the cars. That he got on the step, two men got on ahead of him, and he could not get any further up. That the cars were then jerked ahead and jerked him off the step, but he did not let loose of the handle. That he recovered back, and when they were on pretty good speed they jerked very powerful. The handle was the iron rod. That he got on because he saw others getting on, so he recovered back upon the step but had no more than recovered back, before he was knocked off by the platform, and rolled in between the car and the platform. That the cars were going very slow when he got on, but the second time were going pretty good speed. That he did not see or know anything about the platform until he struck it. It was proved that this platform was a structure of the height of the floor of the cars, the front of which was 7 inches from the outside of a car upon the track, erected and used only for the purpose of loading and unloading freight. It was further proved that the distance from where the plaintiff first attempted to get upon the car to the platform, was about 60 feet. To attempt to get upon the car while in motion, the platform and steps of which was so crowded that he could not get upon the platform, if he succeeded in getting upon the lower step; to persist in such attempts, when, by the jerking of the cars, he was thrown from the step; to hold on the iron and run along, trying to get upon the car while its speed was increasing, without looking to see if there was danger of collision with some object near the track or other danger to be apprehended, was not only negligence, but exhibited great if not reckless disregard of his safety by the plaintiff. This was the conduct of the plaintiff as testified to by himself, and was such that, without explanation, a verdict finding him free from contributory negligence, would have been unauthorized. Unless evidence was given tending to prove facts explaining and justifying this conduct of the plaintiff the nonsuit was proper. The plaintiff proved that the name of the station was called on board of the train before he attempted to get on. This furnished no excuse for the plaintiff. This call was to notify those on board wishing to stop at that station, so that they could be in readiness to get off, but would not excuse them from the imputation of negligence in jumping off with a crowd, while they knew not only that the train was in motion, but jerking up and increasing its speed. The plaintiff knew all this, and still persisted in his attempt to get into the car. Whittaker *vs.* The Manchester R. R. Co. (Eng. Com. Pleas.) cited by counsel from the London Times, has no analogy to the present case. There the plaintiff was a passenger upon the train, on a dark night, and upon the name of the station where he wished to get off being called, opened the door and stepped upon what he believed to be the platform, but which in fact was the parapet of a bridge, and fell over. Held, that a verdict in his favor should be sustained. The fact that others were getting upon the train in a manner equally reckless as the attempt made by the plaintiff affords no justification for him. An excited crowd, eager to get on board, each ahead of the other, too impatient to wait until the train stops, make the attempt, each at his own risk, and no one is excused by the numbers making the attempt. Under such circumstances the cry of those on board the train that it will stop, and giving warning of the danger, will be unheard, as it was by the plaintiff in this case, or unheeded if heard. If people will encounter such risks, the law cannot relieve them from the consequences. The plaintiff further gave evidence tending to show, and notwithstanding the evidence to the contrary the court must assume as true, that on some previous occasions the defendant had slowed trains at this station and passengers had got off and others had got on, when the trains had not come to a full stop at all. This was recklessness on the part of the company, if sanctioned by the directors, and if not by those in charge of the train; and if, while so doing, any person should be killed it is clear that those responsible therefor might be convicted of manslaughter under the statute. But such reckless conduct of the company or of those managing its trains does not justify any person in rushing at the trains at that station while moving and attempting to get on, and, when thrown from the steps by the jerking of the cars, hanging on to the irons, and continuing ineffectual attempts to get on for rods, and until he is injured by a collision with some object outside of the cars. No prudent man would voluntarily encounter such risks. The counsel cites Shearman & Redfield on Negligence (§ 282) for the purpose of showing that a person is not chargeable with negligence in attempting to get upon a horse car in moderate motion when the driver refuses to stop; but should he make the attempt and fail, and then hang on, running outside of the car until he came in collision with a vehicle, the case would be different. The counsel is correct in the position that if the evidence offered by the plaintiff and improperly excluded, in connection with that given, would have authorized the jury to find a verdict in his favor, the order must be affirmed. The evidence so offered was that the plaintiff had before that, got off and on at this place when the cars stopped no more than at this time, and he had knowledge that they frequently did not stop any more than as they slowed down this time. This must be considered in connection with the fact, indisputably proved, that the train in question did in fact stop upon arriving at the proper place for that purpose, and that it was intended so to stop. So considered, the facts offered did not excuse the conduct of the plaintiff when he found himself thrown from the step by the jerking of the cars; that the speed was increasing. Ordinary prudence required him to abandon the attempt, instead of hanging on and continuing it until he came in collision with the platform. If the train did not stop so as to enable him safely to get on, he had his remedy against the defendant. The order appealed from must be reversed and the judgment given upon the nonsuit.

Order reversed and judgment accordingly.

Cost of a Trip to California.

The San Francisco *Bulletin* gives the following as a fair statement of the cost of a trip to California:

New York to San Francisco	$140
Sleeping-car, (full half "section")	20
Twenty meals en route, at 75 cents each	15
San Francisco to Yosemite and Mariposa, Big Tree Grove and return, ten days' trip, $85 to $100, but say	100
San Francisco to Napa Valley, Geysers, etc.	30
San Francisco to Santa Cruz, Pescadero, San Jose, etc., say one week's trip	50
Ten days in all in San Francisco, at $4 per day	40
Trips to the Cliff House, etc	25
San Francisco to New York	140
Sleeping-car, (same as above)	20
Meals, (same as above)	15
Breaking trip three days at Truckee to see Lake Tahoe and Donner Lake	15
Breaking trip at Ogden to see Salt Lake City, etc., four days, all expenses	25
Total	$685
Half of the above expenses in currency, for which deduct ten per cent. on $350, say	35
Total expenses of full Pacific Coast trips, as above, in gold coin	$600

☞ The Union Pacific Railroad Company sold during the month of May, 1873, 10,423.71 acres of land, at an average price of $5 15¼ per acre, amounting to $53,742 80. Sales averaged 76.08 acres to each purchaser. Total sales to June 1, 1873, 725,332.57 acres, at an average price of $4 30 per acre, amounting to $3,118,619 81.

☞ The directors of the Connecticut River Railroad have voted to extend the double track of that road northward to Northampton as soon as practicable. The second track between Chicopee and Holyoke will be ready for use within two months.

☞ The sectional by-law of the County of Simcoe, Ca., granting a bonus of $30,000 in aid of the Hamilton and Northwestern Railway has been carried by a majority of 1,561 votes.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending June 7, at 436,276 tons, and for the coal year at 7,357,593 tons, against 7,242,133 tons to corresponding time last year, being an increase of 115,480 tons. The bituminous tonnage for the week is 59,344 tons, and for the year 940,971 tons, giving a total of all kinds for the week of 495 590 tons and for the year of 8,298 564, tons, against 8,063,487 to same time last year being an increase of 235 077 tons.

☞ The Cincinnati, Eaton and Union Railroad Company has been incorporated to build a road from Union City, Drake county, Ohio, to Eaton, Preble county; capital $400,000. The corporators are Thomas J. Harsh, Charles Negley, M. T. McWhinney, George Bacon, James McCabe, Ira McClure and A. L. Northrop.

☞ Charles F. Hatch, General Manager of the Eastern Railroad, has been elected General Manager of the Maine Central Railroad. It is said that the headquarters of the company will be at once removed to Portland.

FOR SALE—150 to 200 tons new 30 lb. T Rail—in lots to suit purchasers. Apply to A. & P. ROBERTS & CO., 414 Walnut St., Phila.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, June 6, 1873.

THE TRANSFER BOOKS OF THIS COMPANY will be closed after the 14th inst. until the 1st day of July next for the allotment of the new shares, (one to every even five registered,) upon which shares the first installment of fifty per cent. will be payable on or before the latter date.

FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

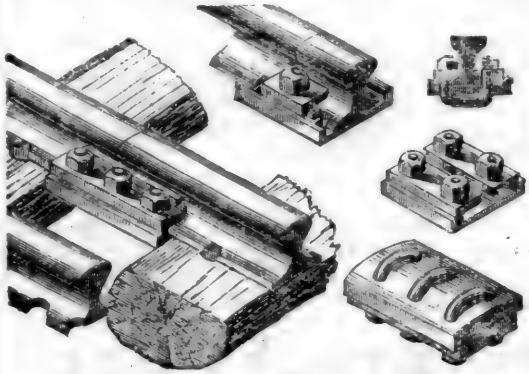
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

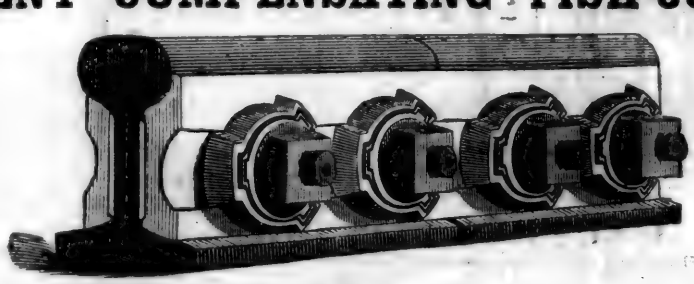
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Interest on Virginia Bonds.

Mr. Arlingstall, the commissioner from the council of Virginia bondholders in London, had a second interview with leading financiers in Richmond on the 20th of June, in which the gentlemen representing Virginia informally expressed entire confidence that the delay of Virginia to pay the full interest on her debt would be and could be only a matter of very few years. Some gentlemen insisted that the next session of the Legislature could provide for the additional amount necessary; others thought that a longer period would be required. Mr. Arlingstall, on the part of the English bondholders, reminded the meeting that France and Denmark had both suffered fearfully by subjugation, and were deprived of their territory, but had speedily recovered and had not abated one cent of their public debt. A desire was expressed that the bondholders would send two or three of their number to confer freely with the next Legislature of the State. Mr. Arlingstall exhibited a memorandum furnished him by authority of the council of bondholders for guidance, in which the funding bill of 1871 of the Virginia Legislature is recognized as a fair and honest intent, voluntarily initiated by most influential and respectable classes in Virginia, to settle her financial difficulties and rehabilitate the State in the eyes of European capitalists, by meeting the matter of her indebtedness to the extent of her surplus resources, but the bondholders, after making this important concession, considered that it would have been more satisfactory to obtain their concurrence before adopting the arbitrary and illegal measures of exacting that one-third of the consolidated debt should be represented by a certificate and transferred to West Virginia Nevertheless they were willing to make such concessions as they felt Virginia might claim fairly under her recent disasters, as her foremost position before the war for honor and integrity had not been forgotten. A committee was appointed to prepare an address to the council of bondholders.

TO INVESTORS.

The Northern Pacific Railroad Company having determined to close its 7-30 First Mortgage Gold Loan and thereafter to pay no higher rate of interest than 6 per cent. on further issues of its bonds, THE LIMITED REMAINDER OF THE **7 3-10** LOAN IS NOW BEING DISPOSED OF through the usual agencies.

This affords a desirable opportunity to persons wishing to **reinvest July interest and dividends.**

The company now has more than 500 miles of its road built and in operation, including the entire Eastern Division connecting Lake Superior and the navigation of the Missouri river; the work of construction is progressing satisfactorily; the Company has earned title to nearly ten million acres of its land grant, and sales of lands have thus far averaged $5 66 per acre.

All marketable securities are received in exchange for Northern Pacifics.

JAY COOKE & CO.
No. 20 Wall Street, New York.

☞ The Secretary of the Interior have decided, under the sixth section of the act of Congress granting lands to aid in the construction of the Northern Pacific Railroad, that the filing of the map of the general route protects the company from pre-emption settlements within the granted limits, which in the States are twenty miles on each side of the line.

Central Vermont Railroad.

Judge Royce, of Vermont, has obeyed the request of Governor Smith, and made the Central Vermont Railroad Company the receivers and managers of the property that is left of the old Vermont Central Railroad. In making this decision he said that as a general rule corporations ought not to be appointed to such a trust, and there are no precedents of such an appointment, but he considers this an exceptional case. The proceedings closed by the appointment of a special Master in Chancery to report on all claims against the present receivers, and under the order Governor Smith and his associates will retain the leases of the Sullivan, New London Northern, and Montreal and Vermont Junction Railroads.

☞ The Grand Trunk Railway Company has issued orders for a large amount of new rolling stock, all to be ready by October, when the equipment for the whole line west of Montreal will take place. To effect these changes almost every iron workshop and car company in Canada will be engaged. Orders have been given out for 150 locomotives of great power, 500 box

freight cars, 200 platform cars, 100 cattle cars, 20,000 trucks for freight cars, and 20 second-class passenger cars for business; all of the above rolling stock, including the locomotives, to be adapted to the new gauge of the road, which, as has been stated, is to conform to the general gauge in use in the United States.

Northern Pacific Railroad.

W. MILNOR ROBERTS, Esq., Chief Engineer of the Northern Pacific Railroad, in a letter to the Editor of the Philadelphia *Evening Bulletin*, dated Bismark, Dakota, June 4, 1873, says:

The opening of the Northern Pacific Railroad to the Missouri river, at Bismarck, latitude 46¾ degrees north, longitude 100¾ degrees west, nearly four hundred and fifty miles from the head of Lake Superior, and four hundred and forty miles from the head of the Mississippi navigation at St. Paul and Minneapolis, is an event of no ordinary moment. It is not only of great commercial consequence as the means of bringing into immediate railroad connection with the Eastern markets an immense and very valuable agricultural region, hitherto unimproved, but it is of vast importance as a powerful lever, the value of which is incalculable, to aid our government in controlling many thousands of Indians. Nothing can be more clearly established than the fact that with the advent of the railroad and the locomotive, and the consequent migration of great numbers of whites, attracted by these means to new fields of agriculture and commerce, Indian hostilities either cease entirely, or become too trifling for serious regard.

When it is considered that there are nine hundred miles of steamboat navigation below Bismarck to Sioux City, and about one thousand miles of steamboat navigation above Bismarck to Fort Benton, some idea may be formed of the magnitude of the interests directly to be affected by this new railroad junction with the Missouri river. It is an extension of the empire of civilization into and over a territory not less than five hundred miles square, or 250,000 square miles; an area equal to more than four times the area of the great State of Pennsylvania.

This immense region, by means of the Northern Pacific Railroad, with its main line tapping the navigation of the Missouri river and its Pembina branch accommodating the Red River Valley and the British Dominions, as far as Fort Garry to the north and the great Saskatchawan Valley to the west, will now be rapidly peopled. True, it is cold and dry during the winter, but it is equally true that it is charming in the summer, and that the land is fertile, yielding abundantly, especially in the crops of wheat, the most valuable of the cereals. There are thousands of Europeans whose habits and constitutions fit them for this very climate, and these are the people who have already begun to flow in this direction, and who will in a few years fill it with a hardy and thrifty population. A few years later, and all of the numerous and costly forts and Indian agencies, which have hitherto engrossed so much of the earnest attention of our Government and consumed millions upon millions of the hard earnings of our citizens, will, with the advance of this civilization, disappear forever.

If the Northern Pacific Railroad Company should accomplish no more than the construction of their railroad to the Missouri river thus insuring to our country in the way of permanent advantages an annual saving of national expenditures, its mission will have been worth more to the nation than the value of their entire land grant of fifty millions of acres, stretching across the continent. These millions of acres have no value whatever till it is created by the energy and perseverance of the company in securing the means and pushing their railroad through them, as they are doing.

This grand instalment of four hundred and fifty miles on this side, with the one hundred miles to be opened this season on the Pacific side, making five hundred and fifty miles, should be regarded by the world as ample assurance that this company, notwithstanding it has no money subsidy from the government, intends to render its land grant immediately available to mankind; and in doing this they create a value upon an equal quantity of government land, which is due wholly to the efforts of this company, and without which it would have remained for years valueless and unproductive.

Those who will hereafter pass, without fatigue, at comparatively trifling cost, and in a few days, from the eastern cities to the point now attained by railroad on the Missouri river, have generally but an inadequate conception of the great amount of preliminary labor, physical and mental, and of the large preliminary expenditures for surveys, &c., required before the projectors of such an herculean undertaking begin to realize practical results in the shape of completed lines.

The third expedition for the final survey and establishment of the route west of the Missouri, between Bismarck and the Rocky Mountains, will start the middle of this month. Gen. Thomas L. Rosser, Engineer of the Dakota Division, will be in charge of the company's engineering party. The escort will consist of cavalry, including the Seventh, one of the choice regiments of the army. They will be absent about four months.

The exact point of striking the Yellowstone is to be determined by this survey. It is known that the Yellowstone is navigable for steamers from its mouth as far up as any probable point of intersection below Powder river. By the sinuosities of the stream, Powder river is some two hundred and thirty miles above the mouth of the Yellowstone, so that the Government and the railroad company have the advantage of this favorable water route for the conveyance of supplies, &c., to that portion of the Yellowstone Valley.

Mobile and Ohio Railroad.

The following is a comparative statement of the earnings and expenses of the Mobile and Ohio Railroad for the fiscal years ending December 31, 1871 and 1872:

Earnings:	1871.	1872.
From freight.....	$1,954,217 76	$2,089,681 25
" passengers....	681,460 92	734,970 39
" express	54,750 00	67,150 00
" mail.....	49,020 00	60,705 95
	$2,739,448 68	$2,952,507 59
Expenses:		
Repairs of roadway..	$582,386 10	$574,768 35
Repairs of machinery.	512,779 48	522,211 84
Conducting transp...	799,002 28	792,076 92
Bureau expenses....	.....	41,162 57
	$1,894,167 86	$1,930,219 18
Net earnings.....	$845,280 82	$1,022,288 41

Compared with 1871 the gross earnings of 1872 show an increase of $213,058 91, with an increase in expenses of $36,051 32, making the increase in net earnings $177,007 59. The President in his report presented at the annual meeting of the stockholders held in Mobile on the 15th of April, 1873, says:

The present meeting completes the first quarter of a century in the history of your company, and marks a period that will be referred to by those who shall come after us, with no ordinary interest. The future student of your history will hear with wonder of the persevering efforts of a Baldwyn, as he traversed the streets of this city with pen-sketches of maps in his hat lining, invoking the attention of all passers by to a grand conception of his brain, which was to connect the waters of the Gulf with those of the Western Rivers and Lakes. He will learn that at that time no enterprise of its magnitude had been started on either Continent; that a road of 500 miles in length, crossing 7 degrees of latitude and passing through a comparative wilderness, was regarded as a Utopian scheme; that by degrees, the enterprise arrested the attention of intelligent men; and that after thirteen years of patient toil, the road was completed to its present terminus on the Mississippi River, 472 miles from Mobile. He will learn that if doubt and distrust were entertained at its conception, the demon of war presided over its birth, and for four long years, made it the sport of contending armies. He will learn that at the termination of the contest, the enterprise was a splendid wreck; that 65 per cent of its original cost had been lost, and that the company were entirely unable to furnish the means for its restoration. He will learn that by the indulgence of creditors and the persevering efforts of its friends, it rose phœnix like from the ruins, and in eight years presented to the stockholders the property in a prosperous condition, with a largely increased equipment, with extended and increased work shops, with new station houses, enlarged facilities for business, and a developed earning power that has surprised its friends.

Your directors, while congratulating you upon these results, must remind you that in their accomplishment, debts have been contracted, for which the honor of the company is pledged, and that continued effort and an economical administration of your affairs will be required to make that success complete.

The earnings for the past year were the largest in your history, amounting to..... $2,952.507 59
Expenses, including renewals of rails 1,930,219 18

Showing a net revenue of..... $1,022,288 41

The increase in earnings over last year was 7.77 per cent., while the increased expenses were but 0.19 per cent., showing that as the volume of business increases, the cost of doing it must decrease.

ROAD AND EQUIPMENT.

The past winter has been one of extreme severity, and rendered it impossible to keep the track in the condition we desired; but as the spring opened and the rains ceased, attention has been directed to it, and in a few weeks it will be placed in good order. Your equipment has been steadily increased, both in locomotives and cars, by purchase and building at the companies shops. The amount and value of your property is constantly being added to, and as your business increases it will require additional machinery.

OKTIBBEHA BRANCH.

The citizens of Oktibbeha have, by vote, determined to tax themselves to the extent of $150,000 to aid you in the construction of a branch from "Artesia" on your line westward. For this aid they are to receive an equal amount of your capital stock. Arrangements are in progress for its completion as far west as the town of Starkville, which is the most expensive portion of the road, and which we hope to accomplish at an early day.

VICKSBURG AND NASHVILLE ROAD.

Arrangements have been made with the Vicksburg and Nashville Road to aid them in the building of their road westward from Okolona on your line. This road, as well as the Oktibbeha Branch, are in the rich cotton region of Mississippi, and will greatly increase the area from which freights are to be drawn, and consequently add to your earnings.

CONNECTING ROADS.

The difficulties surrounding the Alabama and Chattanooga Road which existed at your last meeting, have not yet been removed; the road is now being run by receivers appointed by the Circuit Court of the United States, but with such an insufficiency of rolling stock as to prevent the realization on our part of the great value of that connection.

The Cairo and Vincennes Road has been completed, but has not yet been fully opened for business so as to give us the full benefit which may be expected.

The St. Louis and Cairo Road is progressing, and is expected to reach Cairo during the present year.

The Selma, Marion and Memphis Road, which

will connect with you at Columbus, Aberdeen and Okolona, has made but little progress the past year. We learn that efforts are being made to press it forward with greater energy.

Our relations with all connecting roads are entirely harmonious.

DONATED LANDS.

The sales of donated lands continue upon a restricted scale, but show a gradual increase, fully justifying the belief that as our people recover from the desolating effects of the war the demand will enlarge.

MANUFACTURING.

The statistics furnished by our local agents show that there is continued increase in manufacturing and mechanical establishments on and near the line of your road, and which are steadily enlarging the volume of business and adding to the general prosperity of the country from which your business is derived.

GENERAL PROSPECTS.

At no time since the late war have the affairs of your company been in better condition; and the prospects for the future are cheering.

The steady and uniform increase in the earnings from 1868, when they amounted to..$1,850,601 59
to 1872, when they reached.... .... 2,952,507 59

showing an increase of.... ....$1,101,906 00

in four years, equal to about 15 per cent per annum, proves that you are not mistaken in the inherent strength of the enterprise. This progression in receipts may safely be calculated upon for some years to come, and will, we trust, reach a point where rates may be reduced without injustice to those in interest.

Your attention is invited to the able report of the Chief Engineer and General Superintendent, Major L. J. Fleming.

This will be the last report from that able and efficient officer, who has served your company for 17 years, with an ability and integrity rarely equalled in railroad management. He has been relieved at his own request from severe labor, but will remain in the service; retaining, as he does, the position of Consulting Engineer, attached to the Executive Department, thereby securing to us the benefits of his matured experience.

From the early organization of your company, the earnings of the transportation department have gone into the improvement of the road and its equipment, instead of being charged up as a part of the legitimate cost of the road, and distributed either in cash or stock dividends. The same course has been pursued in the re-construction since the war, as reference to former reports will show, and the company is in this way possessed of property not represented either by creditors or stockholders. In other words, the value of your property, after deducting the amount of your debts, amounts to a larger sum than is represented by stock. Your Directors, after an elaborate examination of the subject, have, with mature deliberation and great unanimity, determined to recommend to you an increase of stock, giving one new share to the present stockholders for each share held by them—25 per cent to be paid, and the remaining 75 per cent to be as dividend, and represented by property acquired by the company.

The increase of stock is believed to be the only legitimate way of dividing that portion of earnings which have gone into the improvement and enlargement of your property, while the 25 per cent paid will enable the directors to discharge the floating debt, and thus be in a position to afford aid to Branches and Extensions—add to your machinery, and thereby increase your earnings within a reasonable time, to at least four millions of dollars, while the expense will not be increased in a corresponding ratio, thus enabling the stockholder the sooner to realize from the entire amount of his investment.

Those most competent to judge of the value of the property have estimated the largest at twenty-five millions, and the lowest at twenty-two millions five hundred thousand dollars.

Assuming the lowest figure, say...$22,500,000 00
Add 25 per cent to be paid on 4,466,476 84 stock.... .... 1,116,618 96

And we have.... ....$23,616,618 96

Less bonded debt...	$10,839,144 46	
Floating debt (less cash)....	1,176,938 03	
Present stock.....	4,446,475 84	
New stock	4,466,475 84	
		20,949,034 17

Still leaving a surplus of..... $2,667,584 79

The road is 472 miles in length, extending from Mobile, Ala., to Columbus, Ky., with branches from Artesia, Miss., to Columbus, Miss., 14½ miles, and from Muldon, Miss., to Aberdeen, Miss., 9 miles—making a total of 495½ miles, of which 63 are in Alabama, 293½ in Mississippi, 118½ in Tennessee, and 20½ in Kentucky. The company also operate under lease 21½ miles of the Mississippi, Gainesville and Tuscaloosa Railroad—making the total length of road operated 517 miles.

From the Report of the Chief Engineer and General Superintendent we learn that "there were 89 engines in the service in 1872, of which three were purchased during the year; and five others have been received from the Baldwyn Works since its close. In addition to these, there are 20 engines which were run down during or since the war, and have required more extensive repairs than the capacity of the repair shops could perform, and at the same time maintain those in use in good order. These locomotives can be repaired at less than two-thirds the present price of new ones, and would be sufficient, with those now in use, to meet the probable demands of the business for this and the next year."

The rolling stock consists of 40 passenger, 1 sleeping, 11 baggage and mail, 4 express, 747 box freight, 308 platform and 118 stock cars.

The service and performance of the locomotives that made mileage during the year is as follows: on passenger trains, 681,302; on freight trains, 638,218; on gravel trains, 203,856; switching trains, 98,285—total, 1,621,661—an increase over the previous year of 188,838.

The earnings per mile of road were: from passengers, $1,424; from freight, $4,049; from mail and express, $247—total, $5,720, against $5,006 in 1871. The earnings per train mile were $2.23, against $2.32 in 1871.

The number of passengers carried was 398,884; do. carried one mile, 16,312,518. Tons of freight carried, 374,531; do. carried one mile, 55,399,302. Increase in number of passenger, 13,584; and in mileage of do., 520,059. Increase in tons carried, 40,893; and in mileage of do., 8,392,315. Number of bales of cotton moved, 184,676, against 182,854 in 1871. The Superintendent, in his report, says:

There is a growing disposition in the National, as well as State Councils, to legislate upon and control the charges made by railways for the transportation of persons and freight. This is based upon the supposed injustice done by railways, by inqualities of charges between local points, where there is no competition, and through rates to and from points reached by other lines. The fact that the actual cost of transportation for certain articles for given distances exceeds the value of the article, and that freight can be carried for long, at a less pro rata charge than for short distances, are entirely ignored or not understood. Neither is it understood or appreciated, that while the through transportation is performed at a less margin of profit, that the railway company is enabled by that amount to perform its local business at a reduced rate. If, however, railways were forced to charge the same through and local rates for given distances, the effect would be to stop the former, and require increased charges on the latter. Then again, the effect of water transportation is felt more or less over the whole country, and if rates are to be fixed by legislation for railways, it would be proper to regulate the charges by steamers on the ocean or rivers, and sailing vessels between domestic ports. The legitimate effect of such legislation would be to bankrupt immediately every railway in the South, and ultimately to reduce the rates to such low figures, that the roads could not be operated.

A great deal of this feeling arises from the supposed antagonism between railways and the people, which uninterested and unprejudiced reflection would show to be incorrect. To the railways of this country the nation is indebted for its rapid advancement in population, the development of mines and the resulting manufactories, its agricultural wealth, and, indeed, for the pre-eminent position it occupies among nations of the world. Their benefits have been felt by all races and classes throughout the length and breadth of this country, and yet the capital which has been invested in their construction, has yielded a smaller return than from any other industrial pursuit.

Railways are in their infancy, yet their progress has been marked by a steady decrease in the charges, cost of transportation, and an increase in speed; and as the density of the population and the consequent accumulations of capital increase, so will this progress continue, unless checked by unwise legislation.

Washington and Ohio Railroad.

A glance at the country through which it passes, between Washington, D. C., and the Ohio river, a distance of 325 miles. A pamphlet of 100 pages, printed in Philadelphia by Collins, 705 Jayne street. 1873.

President—Lewis McKenzie, Alexandria, Va. Clerk and Treasurer, Reuben Johnston, Alexandria, Va. Chief Engineer—Washington Blythe, Alexandria, Va. General Superintendent—R. H. Havener, Alexandria, Va.

Directors—Henry Lewis, Philadelphia, Pa.; J. Frailey Smith, Philadelphia, Pa.; H. S. McComb, Wilmington, Del.; John S. Kennedy, New York; Benjamin Morgan, Berryville, Va.; Cassius F. Lee, Alexandria, Va.

The Washington and Ohio Railroad Company, a corporation originally chartered by the General Assembly of Virginia under the title of "The Alexandria, Loudoun and Hampshire Railroad Company," was at first intended to extend only from the city of Alexandria, in the State of Virginia, to the coal fields of Hampshire, then in said State, now a county of West Virginia, a distance of about 180 miles. But the great importance of a through and direct connection across the States of Virginia and West Virginia between the Ohio river on the West, and the city of Washington, the National Capital, with its commodious road-stead at Alexandria, Va., on the east, induced this company to apply to the Legislature of the State of West Virginia for authority to extend its line through that State to the most suitable point within its limits on the Ohio.

The Legislature of West Virginia, on the 19th day of February, 1870, passed an act conferring upon this company the necessary authority to extend and construct their railroad from the line of the State of Virginia, westwardly, through the State of West Virginia, to the west bank of the Ohio river at any point between the Little Kanawha and the Big Sandy rivers, and to connect said railroad, by branches, with the Chesapeake and Ohio Railroad and with the Baltimore and Ohio Railroad, and to construct such other branches, not to exceed fifty miles in length in any one case, as might be deemed expedient.

Under this authority the Washington and Ohio Railroad Company caused the necessary surveys to be made, and, on the report of its engineers, decided upon Point Pleasant, in Mason county, as the most advantageous location for its terminus on the Ohio, a distance of 325 miles from tide-water on the Potomac at Washington and Alexandria.

The following list of places and distances is given on page 95: Distances on the Washington and Ohio Railroad from Alexandria. (From Washington by the present junction it is 4 miles further): To Falls Church, 10½ miles; Vienna, 15; Hunter's Mill, 18; Thornton, 21; Herndon, 23¼; Guilford, 27; Farmwell, 31; Leesburg, 37½; Clark's Gap, 41½; Hamilton, 44; Purcellville, 47¼; Round Hill, 50; Snickersville, 54¼; Berryville, 64; Winchester, 75; Rock Enon Spring, 90; Capon Springs, 95; Baker's Run, 114; Summit South Branch Mountain, 120¼; Moorefield, 131¼; Petersburgh, 142¼; Summit of the Allegheny, 166¼; Forks Red Creek (Coal Lands), 172¼; Buckhannon, 224¼; Western, 239¼; Glenville, 250; Little Kanawha River, 266¼; West Fork of Little Kanawha, 289¼; Sandyville, 315¼; Point Pleasant (on the Ohio), 325.

Mr. Williams then gives a descriptive sketch of the country from Alexandria to the Blue Ridge minerals, soils, adaptability to gardening and fruit culture, &c. He says:

As soon as we reach the first terrace or secondary banks of the Potomac, we are on rocks of the primordial series. These rocks are seen at Arlington Old Mills, and Carlin's Springs, and are a prolongation of the strata which cross the Potomac between the Little Falls and Georgetown.

Near the eighth mile post on the road we enter upon another series of rocks overlying those we have passed. These rocks are talcose slates and schists, which crumble down readily, forming a soil of peculiar characteristics. The direction of the strata has a general parallelism with the Blue Ridge, and an average breadth of fifteen miles. This belt, for convenience sake, will be called in this paper the talcose schist formation. It extends to Herndon, and has an average breadth of 15 miles.

The soil formed by the disintegrated schists has a loose texture; its unctuous to the touch; is light, in the usual meaning of the term; and warm. It varies in color in proportion to the iron contained in the rocks, and its different states of oxidation. It parts freely with water, and, where the surface drainage is good, which is seldom otherwise, there is the required "bottom heat," an object never out of view with professional horticulturists.

There are but few minerals occurring in this formation. Talc and soapstone are found in some parts of Fairfax county. Kaolin or porcelain clay is abundant. It is first seen in the ridge below Falls Church, near the eastern outcrop of this formation. East of Vienna there are several beds of more or less thickness, alternating with the layers of schists, and extending along the road for nearly the eight of a mile.

The next change in geological features takes place near Herndon. It is a trap ridge, and beyond yielding some basalts and minerals usual to such intrusions, possesses but little interest. It however appears to mark the eastern boundary of the next named formation.

The Triassic or Red Sandstone formation spreads out from the ridge just passed to the foot of Catoctin Mountain, a distance of about twenty miles. Here the rocks of the Blue Ridge system first appear, and, having a dip to the south, a synclinal valley is formed, along which the calcareous breccia, or "Potomac marble" of former days, is strewn in large masses. This material, once so popular for architectural purposes, is, by the discovery of other marbles, now only valuable for being converted into lime.

The Red Sandstone is one of the most durable building stones in the country. The Smithsonian Institution in Washington is built of it. On the line of the road it is often seen in layers of different thickness, easily separable, and should the demand in the city continue, the quarrying and sending it there will doubtless at no distant day be a profitable business.

The disintegration of this sandstone forms a dark or reddish-brown soil. It is open and porous, and like all soils in which silex preponderates, admits the free sinking of water. Having less capillary attraction than clayey soils, were deep tillage has been practised, droughts rarely injure growing crops.

In this formation few minerals have been discovered. Some years since there were a number of beds of the sulphate of baryta scattered through the counties of Fauquier and Prince William, but they have been exhausted. Traces of copper are found in some of the layers of this formation, but are not to be regarded as indications of any valuable deposit.

The next formation as we ascend the country west of Leesburg is composed of the various rocks peculiar to the Blue Ridge. These consist of gneiss, clayslate, hornblende, greenstone, quartz, mica, talcose schists, epidote and chorite. The rocks appear in great confusion, in consequence of the pitching and folding of the strata during the upheaval of the Blue Ridge and its outlines. As a consequence of such violent action and subsequent denudation and disintegration of the various rocks, the Piedmont region is eminently diversified by its minor ridges, numerous foot hills, gentle undulations and level plains.

A soil derived from the disintegration of so many kinds of rocks, rich in the elements of vegetable nutrition, would at once establish its claims to a high reputation for fertility. The undecomposed rocks yet on the surface or slightly imbedded, containing lime, potash, and the oxides of iron, constitute a reserve in the soil which annual crops will not exhaust for ages. The crumbling down of the gneissoidal rocks in this section leaves on the surface small whitish pebbles, forming what are locally called "hominy soils." These pebbles contain at least twelve per cent of potash. The potash is liberated slowly by atmospheric agencies, and, being washed down the sides of the hills, shows its effects in a luxurious vegetation. The small barren knolls, instead of being waste places on the farm, are really its supporters of fertility. The soil also contains lime, magnesia, and the oxides of iron, and is capable of growing a great variety of plants. The coarse particles of which the soil is composed prevent washing, which is eminently suggestive of deep tillage. Every farmer who plows deep one year is but bringing up matters to be pulverized and form fertilizing ingredients for his next year's crop.

The country rises from tidewater to the Blue Ridge, the summit of which by the railroad surveys has an altitude of one thousand and eighty-four feet. The surface is rolling; gentle declivities affording ample means for surface drainage. Small streams abound, and springs of purest water are on nearly every farm.

Between the Blue Ridge and the Catocin is the famed "Loudoun Valley."

The surface of the entire county is rolling, well drained, and without any swamps or miasmatic marshes, but stands drought well, as has been proved by the last three years.

The water courses are the Potomac and its tributaries. Goose Creek, Beaver Dam, the Catoctin and its forks, Little River, Tuscarora, Sycolin, Broad Run, Sugar Land, Horse Pen, etc., all bold streams, prevading the whole county.

Besides these main streams there are few if any farms in every field of which there is not a spring or running water of pure and wholesome quality.

The soil of course varies, but blue grass is indigenous to the whole county, while timothy, clover, and grasses are raised in luxuriance. All the cereals are produced in abundance, but corn is the largest and best paying crop.

Being eminently a grass country, grazing was, before the war, one of the largest and most profitable interests, and is now being revived more and more yearly, with the advantage of being little over a day's drive, or a few hours' run by rail, to the Alexandria, Georgetown, or Washington markets, with easy, certain and quick access to Baltimore, Philadelphia or New York.

About one-third of the county is in timber. Limestone underlies the greater part of it, and lime for fertilizing is easily accessible to every farmer, and acts most happily on the soil in conjunction with clover and plaster.

Iron, copper and barytes have been found and mined. The Potomac Furnace, opposite the Point of Rocks, was started half a century ago, and has been supplied with ore from the adjacent lands. The iron interest offers a large field for profitable investment.

On the western slope of the Catoctin Mountain is a deposit of white marble, extending north and south for over ten miles, with a breadth in some places, of 2,000 feet, cropping out at many points, and hundreds of feet in depth. The Virginia Marble Company is engaged in opening and developing a quarry; the lessee has expended $50,000 in the enterprise. The marble is white and fine, equal to the Vermont marble, while in places there is a solid vein of flesh colored. This is a very important interest.

The Washington and Ohio Railroad has five stations in Loudoun county, viz., Guilford, Farmwell, Leesburg, Clark's Gap and Hamilton; to these will shortly be added three others—Round Hill, Purcellville and Snickersville.

Hamilton Station, forty four miles from Alexandria and six and a half miles west of Leesburg, is the present western terminus of the Washington and Ohio Railroad, an important station, with a constantly growing trade; is situated in a rich and populous country, an intelligent and wealthy community, with fine and productive farms. This station is the business centre for the neighboring villages of Hillsboro, Purcellville, Wheatland, Union, Mountsville, Philomont, Pot House (New Lisbon), Snickersville, Lincoln,

Hughesville, Bloomfield, and Circleville, to which is added the large business of eight fine merchant mills.

For its area, Clarke probably contains more fine land than any county in the State. The surface is beautifully diversified; the soil is based on blue limestone, with a fine growth of timber, and is very productive.

When reached by the Washington and Ohio Railroad, the agricultural productions of this rich county, and its deposit of valuable iron ores, will materially contribute to the business of the road and the prosperity of the country. The Shenandoah river is lined with ores of a superior quality, which must reach tide-water at Alexandria, either in ore or pig metal, by means of the Washington and Ohio Railroad.

These deposits are on the line of the railroad, nineteen miles west of Hamilton Station and sixty-two miles from Alexandria, at which point the iron can be shipped to any point required. The Shannondale Furnace, in Jefferson county, is on these deposits, as is also the Shenandoah Iron Works, in Page county, which recently sold for $240,000.

From Clarke county the route of the Washington and Ohio Railroad is through Frederick, via Winchester, for about 25 miles. After leaving Winchester, the line passes through Petticoat Gap in the Little North Mountain, and reaches the summit of the Great North Mountain at Lockhardt's Gap with easy grades, thence by Capper's Spring (now called Rock Enon) and Capon Spring to Hampshire county, West Virginia.

Hampshire county, West Virginia, lies west of Frederick county, Virginia, and is drained by the north and south branches of the Potomac, the Potomac river, and the great Cacapon. Its surface is occupied by the valleys and ridges of the Allegheny chain of mountains. The valleys are wide, fertile and well improved. Hampshire is a fine grazing, grain farming, and wool growing county, and contains extensive beds of coal and iron ore.

A citizen of Reading, Pennsylvania, has recently purchased, on northern account, a body of land in this county, near Rock Enon Spring, six miles in length, containing a deposit of the best quality of iron ore. A vein of 16 feet has already been opened, and it is expected that several furnaces will shortly be in operation. Until the Washington and Ohio Railroad reaches these deposits the iron will have to be transported in wagons to Winchester, a distance of about 15 miles, and it will pay even at that.

Capon Springs are in the productive valley of the Cacapon river, on the west side of the North Mountain, 30 miles from Winchester, and one mile from the Washington and Ohio Railroad, a place of great resort during the summer months. The buildings are commodious, accommodating one thousand visitors, and the grounds extensive.

The Hanging Rocks, near Romney, are notable curiosities. Here the river has cut its way through a mountain of about 500 feet in height. The boldness of the rock and the wildness of the scene excite awe in the beholder.

Gaudy's Castle, a most stupendous work of nature, was so named from having been the retreat of an early settler when pursued by the Indians.

Hardy county adjoins Hampshire on the south, and is intesected by the south branch of the Potomac, which, in its passage through the county, receives two affluents called the North and South Forks; it is also drained by the Cacapon and Lost rivers. The surface is very mountainous, and abounds in mineral wealth; the soil of the valleys is very fertile. It is in many respects one of the most remarkable counties in the State of West Virginia.

At the Capon iron furnace, about four miles south of Wardensville, an article of the first quality is manufactured, which is sold in Philadelphia for boiler making. This article now incurs the expense of 16 miles wagon transportation to the railroad at Strasburg, but on the Washington and Ohio Railroad reaching the furnace this important item will be saved to the manufacturer. The ore used by this furnace is a continuation of the Pennsylvania Juniata iron ore beds; they have been long worked and are known to be good.

Leaving Capon Springs, in Hampshire county, and passing through the valley to a point one and a half miles beyond the town of Wardensville, in Hardy county, the line of the Washington and Ohio Railroad will pass through Sandy Ridge by one of the grandest and most picturesque gaps in the mountains of Virginia. Following the valley of Lost river and its tributary streams, the South Branch Mountain is reached, and descending the western slope we arrive at the town of Moorefield, the county seat of Hardy, in the great South Branch valley. From Moorefield the Baltimore and Ohio Railroad is distant on the north nearly 50 miles, and the Chesapeake and Ohio Railroad, the nearest on the south, more than 100 miles distant.

This road will place the South Branch Valley 71 miles nearer market, besides saving more than one-half the present wagon transportation. By a branch 30 miles long from Moorefield to Piedmont, it shortens the distance to tidewater for the Cumberland coal 31 miles.

The Washington and Ohio Railroad will enter Grant county from Hardy, and, passing through it, run into Tucker county, on the west. Grant county is expected to subscribe $100,000 to the capital stock of the Washington and Ohio Railroad Company.

There is a very fine body of iron ore about three miles east of Franklin; it occurs in quantity. The ore is a very good hematite, and is famous throughout this region as that from which a horseshoe was forged; this shoe was sent to Richmond and placed in the State Cabinet.

Leaving Grant county the line of the Washington and Ohio Railroad enters Tucker county on its southern border, and, passing through it westwardly, enters Randolph county.

Randolph is a heavily wooded county. It has large areas of wild cherry and black walnut, and in such abundance that farm fences are made of this valuable timber, and large quantities are burned in order to clear the land. It has an unusual proportion of rich valley and smooth upland, the Main Cheat and Shaver's mountains being the only rough ridges. The bottom land on Tygart's river is very valuable. It is also a fine stock-raising region. Live stock of every description is annually exported to the eastern markets. The farms are generally well improved, and new farms can be opened at very small cost.

In it there is very superior coal for making gas, at a distance of 102 miles nearer to navigation, via the Washington and Ohio Railroad, than the gas coal which is so extensively carried upon the Baltimore and Ohio Railroad. The distance by the Washington and Ohio Railroad to the Cumberland coal is thirty-six miles less than by the Baltimore and Ohio Railroad. This saving of distance, and consequently of time and cost of transportation (of such an article as coal), will, of itself, secure to the Washington and Ohio Railroad an unlimited and very profitable business.

The Washington and Ohio Railroad enters Upshur county from Barbour, and crosses the Buckhannon river at the town of Buckhannon, two hundred and twenty-four and three-fourths miles from Alexandria, into the county of Lewis.

Sutton, the county seat of Braxton, is accessible from Clarksburg, via Weston, Lewis county, sixty miles from the Baltimore and Ohio Railroad on the north, and ninety miles from the Chesapeake and Ohio Railroad on the south.

The Washington and Ohio Railroad, occupying a central position between these, will drain the country for many miles on either side of its line, and afford to Braxton county the means of increasing its productions and wealth.

Passing through Upshur, the Washington and Ohio Railroad enters Lewis, and runs through the county at or near Weston to Gilmer county.

Lewis county is expected to subscribe two hundred thousand dollars to the stock of the Washington and Ohio Railroad Company.

The Washington and Ohio Railroad runs near the southern line of Harrison county, and will open that part of the county which receives little, if any, advantage from the Baltimore and Ohio Railroad.

Leaving the western limit of Lewis county, the Washington and Ohio Railroad enters Gilmer, and, passing through it by Glenville, runs into Calhoun county.

Knoblauch & Lichtenstein,

No. 37 Broad-st., New York.

OFFER FOR SALE

$200,000

7 Per Cent. First Mortgage Bonds,

30 YEARS TO RUN,

OF THE

CENTRAL R. R. EXTENSION COMPANY

OF LONG ISLAND,

At 90 and Accrued Interest in Currency

The road runs from Farmingdale, the present terminus of the Central Railroad, to Babylon on the South Shore of the Island. According to contract, the road will be finished by July 15th, ready for this summer's travel.

These Bonds being a *home security*, and among the best ever offered in this market, we take special pleasure in recommending them.

Pamphlets or further particulars will be promptly furnished on application.

New York, Boston and Montreal Railroad.

The New York, Boston and Montreal Railroad, which was taken possession of by the Erie Railway Company some time since, under a lease for a long term of years, is being rapidly put in order for through passenger and freight traffic, and it is expected that a great trunk line from this city to Montreal and Boston will be in operation by the 1st of July, 1874. Money has been raised by James McHenry, in London, to complete the various branch lines, and they are now being rapidly constructed. Six thousand tons of iron have been contracted for to use on the New York and Boston division, fifty-eight miles in length, and a large force of men is at work grading the line, and track laying is in progress at both ends of the division. The first section to Tarrytown is expected to be open by the middle of July. On the Putnam and Dutchess division, twenty-three miles in length, 500 tons of rails have been delivered, and the laying of tracks has been commenced. The Dutchess and Columbia division is in operation throughout its entire length. On the Pine Plains division, thirty miles in length, grading will commence on the 1st of July. The Harlem extension, 119 miles long, is in full operation. The statement of the earnings of the different completed divisions for the past year is promised on the 1st of July, and it is expected to be favorable. The Central Vermont Railroad, which completes the trunk line to Montreal, came under the control of James McHenry at the recent election, and it is expected that he will visit this country before the Erie election on the 8th July next, to take measures for the more permanent consolidation of the different lines from Cincinnati and Cleveland in the West, by the way of New York to Montreal and Boston in the East.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending June 8, are: freight, $37,349 68; passengers, $39,122 56—total, $76,472 19.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "1."

American Railroad Journal.

Saturday, June 28, 1873.

Stock Exchange and Money Market.

The Money movement of the week has been, on the whole, quite easy and favorable to borrowers, on an accumulating supply of funds seeking temporary and lucrative employment. The demand for accommodation has been on a moderate scale, with call loans quoted down to 3@6, and strictly choice to good mercantile credits at from 6@8 chiefly at 7 per cent per annum. The comparatively tame speculation at the Stock Exchange was against anything like a pressure for aid for speculative purposes. The mercantile wants were readily supplied by the city banks and private lenders, the demand for the better grades of business paper having been quite active from both sources. During the closing days of the month loans will be changed to a considerable extent to prepare for the July interest disbursements, and the market may consequently be temporarily higher; but the impending disbursements of nearly sixty millions of interest and dividend money will soon restore the easy working of the loan and discount business. The prepayment without rebate of the July coin-interest on the public debt, which amounts to about $25,000,000, commenced on Wednesday on the conpon bonds. By far the larger part of this belongs to Europe. Owing to the delay in the preparation of the schedule, interest on the United States registered bonds will not be paid at the Sub-Treasury until Saturday, the 28th inst., without rebate. The city banks last week reported an increase of about 2¼ millions in their deposit line, nearly ⅜ths of a million in their legal tender, and nearly half a million in their specie reserves. They enlarged their loan and discount averages about 1⅛ million, and contracted their circulation slightly.

The city banks have again made a handsome gain on their obligatory reserve, the last statement showing that they had $12,166,375 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, reduced its coin balance about 1⅞ths million; while adding about 2¾ millions to its currency reserve. Its currency reserves at the close of the week were $26,081,978; and its coin hoard, $41,329,293.

The clearances of the banks averaged through the week 88¼ millions a day, and amounted in the aggregate, for the whole week, to $529,430,403, as against $139,261,871 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $2,299,534 and reduced its coin reserve $1,888,845 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $27,398,300, against $19,912,000 same time last year. The city bank deposits are now $220,392,500 against $228,931,000, week ending June 22, 1872. The legal tender reserve amounts to $46,704,200, against $53,929,400 same time last year. The circulation now stands at $27,352,000 against $27,528,100 same time last year. The loans are now $278,903,800 against $292,806,800 at this date last year.

The coin reserve of the city banks is now about 27⅜ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is 46¾ millions against about 34⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 220⅜ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

The U. S. Sub-Treasury office last week received $5,105,839 of currency, and $6,458,124 of gold, the latter including $1,741,000 from customs; and disbursed $2,806,295 of currency and $8,346,969 of gold, the latter embracing $177,208 of coin interest.

Government revenues have been yielding rather less satisfactorily, since our last. The excises yielded within the week about 1¾ millions, and thus far in the current fiscal year beginning with July 1, 1872, 111½ millions. The customs at the port of New York, for the week, were $1,658,061, and at the outports, about $550,000 more, in coin or coin certificates.

Gold has been much depressed and lower early in the week, the speculative demand having been on a much restricted scale, and the customs and export drains light. The later dealings have been more extensive, and indicative of reviving confidence on the part of operators for higher figures, despite the impending liberal coin interest disbursements on Treasury account, and the free produce exports. The range of the price during the week has been from 115@116, and the closing quotation on Wednesday was 115⅜ against 116 on Wednesday of the preceding week. The specie outflow last week, was $1,067,891. The Gold Exchange Bank clearances have averaged about 65¼ millions per day during the week.

The U. S. Treasury balances on Tuesday were as follows: Currency, $8,700,000; and coin, $77,000,000. Of which the Certificates amounted to $36,000,000.

The customs demand for Gold last week, averaged $290 167 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873, have been $1,814,137, against $727,137 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $129,153,474 against $151,841,700 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $72,109,679, against $76,455,716 during the same time in 1871-2.

The export drain of specie was $1 067,891 last week, against $753,243 same week preceding year. The shipments since July 1, 1872, have been $60,619,622 against $56,239,548 during the same portion of 1871.

Foreign Exchange has been stiffening somewhat in price, though the demand has not been very active, and the liberal supply of bills made against our Domestic exports and continued moderate negotiations abroad, and the employment of United States Bonds as a medium of remittance, have all tended to keep Exchange on London within the gold-shipping points. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109⅜; sight bills on London, at 110⅛@110¼. The week's exports of Domestic Produce have been to the currency value of $5,728,915.

The monthly sale of Scranton Coal on Wednesday resulted in the prompt disposal of 75,000 tons within the advanced range of $4 42½@$5 32½, as against $4 30@$5 22½, in May.

Government securities have been offered with reserve at the current rates, which have been influenced by the fluctuations in Gold. The demand has been fair for the favorite issues, chiefly on investment account.

U. S. sixes of 1881 closed on Wednesday of this week at 122⅛@122⅜; U. S. Five-Twenties of 1862, 116¼@116⅜; U.S. Five-Twenties of 1864 at 116¾@117; U. S. Five-Twenties of 1865 118@118⅛; U. S. Five-Twenties of 1865 consolidated 119⅞@120; U. S. Five-Twenties of 1867, 120¾@120⅞; U. S. Five-Twenties of 1868, 120¼@120¾; U. S. Ten-forties at 113¾@114; U. S. Fives of 1881 (Funding Loan) 114⅜@114½; Six per cent. currency Sixes from 114¼@114½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 11.	June 18.	June 25.
Consols	92⅞	92⅝	92½
U. S. 5-20s, 1865	92⅛	92⅝	92¾
" 1867	94⅝	*92¼	92⅜
" 10-40s	88⅛	89	89
New Fives of 1881	89½	89½	89¾
Erie	49¼	49¾	49½

* Ex July coupon.

The Railway and Miscellaneous share specula-

tion has been somewhat brisker, but without buoyancy as to values. The later dealings indicated a tame and barely steady movement.

State bonds have been in quite moderate demand, and unsettled as to price.

There has been some increase of demand for Railway Mortgage Bonds on investment account at firm rates. Central Pacific Sixes have been more sought after at from 102⅞@103. The Chesapeake and Ohio Seven per cent gold bonds have been selling quite freely at 90, and interest. Chesapeake and Ohio Sixes have been also in fair request at 88½ and interest. Western Pacific Sixes have been in demand at 95. The Northern Pacific 7-30 Loan has been more sought after at par and interest.

General business has been devoid of animation in the line of foreign goods, with values quoted more or less irregular. In the way of Metals, there has been a slow movement. Copper has been quoted heavy and lower, with sales reported of 100,000 lbs. Lake, at 28½c.@29c. Scotch Pig iron has been unsettled as to price, under pretty free offerings, and a comparatively limited demand; sales have been reported of 300 tons Eglinton, and 300 tons Glengarnock on private terms; outside lots of the former being quoted at $41, and of the latter at $43, and in the regular way, $44 and $45, respectively; 150 tons Eglinton, and 150 tons Cambroe at $42, 60 days, flat. Other kinds of stock dull and somewhat irregular as to price. We quote: No. 1 American Pig quoted nominally at $48@$49; No. 2 do. $44@$46; Wrought Scrap at $44 75@$46; English rails at $70, gold; American Rails at works, $80@$82 50; old Double Head and T Rails at $52. Pig Lead has been held firmly, but quiet, at 6¾c., gold, for ordinary foreign. Spelter has been inactive at 7⅝c.@7⅞c., gold. Pig-tin has been in more confident demand, with Straits quoted up to 31½c.,@ 32c., at the close, with sales of 1,500 slabs, and 15 tons English at 30c.; Banca, 36c.@36½c., gold. Tin Plates have been quiet but quoted firm; 500 boxes Coke on private terms. Charcoal Plates quoted here $11@$11 37½; Charcoal Terne, $9 75 @$10 25; Coke, $8 50@$9 50; Coke Terne, $7 75 @$9 gold, per box. Zinc continues nominal.

Domestic produce, has been moderately active, especially in the line of Breadstuffs, Pork, Lard, and Petroluem, which have been quoted cheaper; and of Tobacco, which has ruled steady. Cotton, has been dull for early delivery, and tamer for forward delivery than through the preceding week. Middling upland Cotton left off at 21c. per lb. The receipts at all the ports, since Sept. 1, have been 3,489,361 bales, against 2,652,733 bales same time in the preceding year; exports 2,509,710 bales against 1,907,503 bales in the previous year; stock at the ports at latest dates, 219,100 bales against 151,615 bales same date 1871.

Foreign merchandise has been quiet as a rule, with prices favoring buyers. The week's imports amounted to $5,790,952, including $870,305 of dry goods.

Ocean freights have been moderately active with Grain and Petroleum room in most demand. but with berth rates closing less firmly.

At the Live Stock Markets, Beeves have been in moderate demand at from 9@13½ cts. Veals at 4½@9½ cts.; Sheep at from 4@6½ cts.; Spring Lambs, 8@12 cts.; Swine at 5¼@5½ cts. per lb., all live weight. The week's receipts were 10,464 Beeves, 4,344 Veal Calves, 18,231 Sheep and Lambs, and 24,699 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Pacific of Mo., 43½; do. 1st mort., 86; Atlantic and Pacific pref., 22; New Jersey Southern R. ☞ The semi-annual interest on the Registered First Mortgage 7-30 Gold Bonds of the Northern Pacific Railroad Company, due July 1, 1873, will be paid, as hitherto, by mailing to the address of each bond-holder of record, at the closing of the books, a coin check for the amount of interest due. All bond-holders who have changed their address since January 1, 1873, are requested to send their present address to the office of the Company, 23 Fifth avenue, New York, immediately. The transfer books, which are now closed, will be opened on Tuesday, July 1, 1873.

☞ The first train on the Toronto, Grey and Bruce Railway ran through to Owen Sound on the 14th inst. The traffic on the line is steadily improving, as is shown by the following figures, representing the earnings for each month of the present year:—January, $14,214 94; February, $15,389 03; March, $12,874 37; April, $15,850 60; May, $19,776 03.

☞ Articles of association have been filed with the Secretary of State at Indianapolis, Ind., of the Dayton, North Vernon and Louisville Railroad Company, who design building a road by the most practicable route, from North Vernon, Jennings county, Indiana, to Dayton, Ohio.

☞ The coupons of the first mortgage bonds of the Central Pacific Railroad Company the Western Pacific Railroad Company, and the California and Oregon Railroad Company, due July 1, will be paid in gold at the office of Fisk & Hatch, 5 Nassau street.

☞ The Secretary of War has approved of the plans for the construction of the Milwaukee and Northern Railway Bridge across Fox River at Green Bay. Work on the structure will be commenced at an early day.

☞ The North River Railroad, which is to connect the Shenandoah Valley Railroad with the iron and coal regions of West Virginia, was inaugurated formally at Bridgewater Valley, Rockbridge Co., Va., on the 18th of June.

☞ The Illinois Central Railroad Company have declared their usual Half-yearly Dividend of Five per cent, payable Aug. 1, the transfers to close July 15.

☞ Hon. Anson P. Morrill has been elected President of the Maine Central Railroad Company, vice Judge R. D. Rice, resigned.

☞ The Granite Railway Company has declared a dividend of 4 per cent, payable July 15.

BANKING HOUSE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK.
June 24, 1873.

☞ We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government bonds.

The Chesapeake and Ohio Seven per Cent. Gold Bonds, principal and interest payable in gold in New York city; interest payable Jan. 1 and July 1; bonds of $1,000 each, coupon or registered. Price **90** and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD, **a great East and West Trunk Line,** 420 miles in length, extending from Atlantic tide-water at Richmond to Huntington, the most favorable point of railroad connection with the Ohio River, is completed, and doing a large and profitable business.

ITS TRAFFIC in the transportation of Agricultural Products and general merchandise between the West and the Eastern and South Atlantic States, and in the development of the IMMENSE IRON AND COAL RESOURCES OF THE ALLEGHANIES AND THE GREAT KANAWHA VALLEY, is growing as rapidly as it can be organized.

ITS PASSENGER TRAVEL between the East, and West, and South-west, and to the White Sulphur and other celebrated medicinal springs on its route, is large and rapidly increasing.

Its earnings during the current year will be much larger than has heretofore been anticipated, and will largely increase from year to year.

None of the other great East and West Trunk Lines and Coal and Iron thoroughfares, whose revenues are now so enormous, commenced their business with anything like the assurance of traffic which has greeted the opening of the Chesapeake and Ohio, and its growth promises to equal in magnitude and excel in rapidity that of the most successful of its predecessors.

These facts, together with the thorough construction and substantial character of the Road itself, and the great value of the Company's property and franchises, enable us to recommend their Securities with the utmost confidence.

Pamphlets, containing full information concerning the Road and the country it traverses, will be furnished upon application.

We continue to deal in Government Securities, **Central Pacific, Western Pacific, and Chesapeake and Ohio Six per cent. Bonds,** buy and sell Stocks and Bonds at the Stock Exchange on commission, for cash, make Collections, receive Deposits, on which we allow interest at the rate of Four per cent., and do a general banking business.

FISK & HATCH.

☞ The earnings of the Erie Railway Company for the week ending June 15, 1873, were $414,418, and since November 1, 1872, $11,371,876—an increase over the corresponding period of the previous year of $319,973.

☞ The coupons and the registered interest of the seven per cent bonds of the Chesapeake and Ohio Railroad Company, due July 1, will be paid in gold on and after that date at the office of Messrs. Fisk & Hatch,

TWO MILLION OF BONDS.

NATIONAL CITY BANK
NEW YORK, June 20, 1873.

The undersigned, commissioners, offer for sale Two Millions of the Joint First Mortgage Bonds of "The Central Railroad and Banking Company," "The Macon and Western," and the "South-western" railroad companies of Georgia, bearing seven per cent. interest, coupons payable 1st January and July, and the bonds falling due the 1st of January, 1893, principal and interest payable at this bank.

These bonds are secured by a first lien on the combined properties of the above named roads, consisting of 707 miles of track, full equipments of rolling stock and appurtenances, together with valuable assets of real estate, stocks and bonds, amounting in the aggregate to at least $16,000,000.

The Central Railroad Company has paid annual cash dividends of not less than ten per cent. for more than twenty years, and occasionally extra dividends. Since the war alone, annual dividends of ten per cent. and over have been paid, amounting to sixty-two per cent. on the capital stock.

The Macon and Western, and the South-western Railroad Companies have paid regular annual dividends of eight to ten per cent. for about the same period of time.

The $2,000,000 are a part of a total of $5,000,000 authorized by the Legislature of the State of Georgia, and secured as stated by a joint 1st mortgage on the entire property of the three companies. They are now offered with a view to complete the connections of the roads by land and sea, to meet at their maturity in 1875 the $1,000,000 of 1st mortgage bonds issued for rebuilding a large portion of the Central Railroad, broken up by the operations of war, and to pay all bonds of the South-western and Macon and Western Roads (not secured by mortgage or other lien) maturing in 1875 and 1876.

The whole mortgage amounts to about $7,000 per mile of road, but no contingency is now anticipated which will ever require the whole amount of the $5,000,000 to be marketed.

For further and full information we refer to pamphlets to be had at the office of the Farmers' Loan and Trust Company, who are trustees for the bondholders under the mortgage, and at the National City Bank, New York.

The undersigned will receive sealed proposals directed to them, care of the National City Bank, New York, until the 16th day of July next, reserving to themselves the right to accept or reject any and all bids. Proposals must be for a price "flat"—*i. e.* accrued interest to go with the bond.

JAMES F. BOZEMAN,
J. F. GILMER,
W. B. JOHNSTON. } Commissioners.

☞ The Lehigh Valley Railroad Company has executed a mortgage to the Fidelity Insurance and Trust Company, as trustees, for $40,000,000, for the purpose of retiring the present outstanding debt and furnishing means for additional facilities demanded by the increased business of the company. The bonds are of the denomination of $1,000 each, bear 6 per cent interest, payable semi-annually in June and December, free of all tax, the bond to run fifty years, being redeemable in 1923.

Journal of Railroad Law.

COMMON CARRIERS MUST USE DILIGENCE TO FIND CONSIGNEE. AFTER REASONABLE NOTICE, GOODS ARE AT RISK OF OWNER.

The facts in the recent case of Zinn *vs.* The New Jersey Steamboat Company, (49 N. Y. 442), are fully and clearly stated in the following opinion by—

ALLEN, J.—Common carriers assume not only the safe carriage and delivery of property to the consignee, but also that merchandise and other property received by them for transportation shall be carried to the place of destination and delivery with reasonable dispatch; and for any unreasonable delay, either in the transportation, or its delivery after its arrival at the terminus of the route, they are responsible. (Hand *vs.* Baynes, 4 Whart., 204; Raphael *vs.* Pickford, 6 Scott, Ch. N. R. 478.) The liability of the carrier to answer for the non-delivery of goods, or the want of reasonable expedition in the delivery, after their arrival at the place of their destination, was not controverted upon the trial.

The defendant in this action was not bound to deliver the merchandise to the consignees at their place of business. A delivery or offer to deliver at the wharf would have discharged the carrier from all responsibility as such carrier. Carriers by water or railroad are not held to a delivery of goods to the consignees at any place other than at the wharf of the vessel or the railroad station, and a notice to the consignee of the arrival of the goods, and of a readiness to deliver, comes in place of a personal delivery, so far as to release the carrier from the extraordinary and stringent liability incident to that class of bailees. (Gibson *vs.* Culver, 19 W. R., 305.)

If the consignee is present the goods may be tendered or delivered to him personally, and he is bound to remove them within a reasonable time. If he is not present he is entitled to reasonable notice from the carrier of their arrival, and a fair opportunity to take care of and remove them. If the consignee is unknown to the carrier, the latter must use proper and reasonable diligence to find him; and if, after the exercise of such diligence, the consignee cannot be found, the goods may be stored in a proper place, and the carrier will have performed his whole duty, and will be discharged from liability as a carrier. But for want of diligence in finding the consignee and giving notice of the arrival of the goods, the carrier is liable for the damages resulting from a delay in the receipt of the goods by the consignee occasioned by such want of diligence. He can only relieve himself from liability by storing the goods, after, by the use of reasonable diligence, he is unable to find the consignee. (Whitbeck *vs.* Holland, 45 N. Y., 13.) A common carrier has not performed his contract as carrier until he has delivered or offered to deliver the goods to the owner, or done what the law esteems equivalent to a delivery. (Smith *vs.* Nashua and Lowell R. R. Co., 7 Foster R., 86; Price *vs.* Powell, 3 Comst., 322.) When the consignee is unknown to the carrier, a due effort to find him is a condition precedent to a right to warehouse the goods, and, as notice to the consignee takes the place of a personal delivery of the goods, and as a due and unsuccessful effort to find the consignee will alone excuse the want of such notice, it follows that if a reasonable and diligent effort is not made to find the consignee, the carrier is liable for the consequence of the neglect. What is a due, a reasonable effort, and what is proper and reasonable diligence, depends necessarily very much upon the circumstances of each case, and, in the nature of things, is a question of fact for the jury, and not of law for the court. What would be reasonably sufficient in one place might be entirely inadequate and insufficient in another, and the extent and character of the inquiries to be made, in the exercise of a reasonable diligence on the part of the carrier, cannot be regulated or prescribed by any fixed standard, as the standard must shift with the varying circumstances of each case. The law cannot and does not define the measure of duty, making it the same in all cases and under all circumstances, in cases like the present; and, therefore the question whether the defendant did use proper and reasonable diligence to find the consignee was properly submitted to the jury. (Whitbeck *vs.* Holland, *supra.*

The motion for a non suit at the close of the plaintiffs' case was properly denied. It had then been proved that the goods had been brought to New York by the defendant, as a common carrier, and been put in store; that the plaintiffs, the consignees, had had no notice or knowledge of their arrival or of their storage, and that between the time of their landing in New York and their receipt by the plaintiffs they had greatly depreciated in value. No attempt had been made to show notice of the arrival of the goods, or that the consignees were unknown or could not be found.

The doctrine of concurrent negligence has no application to the case. It was several weeks after the landing of the goods from the defendant's steamer on the wharf in New York that the plaintiffs learned or knew of their arrival, in any view of the evidence, and at that time the goods had become, in a measure, unsaleable and their market value was diminished. From the time the plaintiffs had notice of the arrival of the goods, and that they were subject to their orders, and a reasonable time had elapsed for their removal, they were at the risk of the plaintiffs, and no liability attached to the defendant for subsequent depreciation in value. The concurrent acts of the plaintiffs and defendant could not contribute to the same injury; their duties were not concurrent but in succession.

The defendant's duty was to give the plaintiffs notice or make due diligence to find them, and until that was done the goods were at its risk; and when the duty was fully performed and the goods put in store, the liability of the carrier ceased, and the risk of loss by depreciation in value was upon the plaintiffs. The duty and liability of the one grew out the performance of duty by the other.

The defendant gave evidence of all that was done to find the consignees, and the effort made was very slight, and would not have justified the court in ruling, as matter of law, that due and reasonable diligence had been used for that purpose.

The inquiries made were casual, and no serious attempt was made to find the consignees or to give them notice of the arrival of the goods. Indeed, on cross-examination, the freight agent of the defendant testified that it was not their custom to give notice to the people in the city, and doubtless the agents and servants of the company acted under a mistake as to the duty and legal liability of the carrier.

There was no question touching the extraordinary liability of carriers in the case. The claim was not against the defendant as an insurer of the safety of the property, but for want of ordinary and reasonable diligence in the performance of a duty resulting by implication from the contract of carriage. The judge, therefore, properly refused to instruct the jury upon the subject of the extraordinary liability of the defendant as a common carrier. As the goods had been shipped from Michigan by railroad, and the plaintiffs had no knowledge that they had been transferred to the defendant at Albany, and were not expecting them by steamboat, there was no occasion for them to be on the lookout for them on the defendant's wharf, or on the arrival of the boats of the company. There was nothing to justify the submission of any question to the jury on this branch of the case. There was no complaint, or reason for complaint, of the manner in which the cause was submitted to the jury, and the verdict is conclusive upon the questions of fact.

The judgment must be affirmed.

All concur except Peckham, J., not sitting, and Grover, J., not voting.

Judgment affirmed.

☞ The directors of the Canton Land Company, at a meeting held in this city on the 20th inst., chose the following Executive committee: Messrs. Charles J. Baker, President; George S. Brown, Vice President; S. L. M. Barlow, Wm. Butler Duncan and Jas. H. Banker. Authority was given to issue $5,000,000 six per cent gold sinking fund bonds, secured by land sales, a part of the proceeds to be devoted to securing the Western Maryland Railroad, and a part—about one quarter—for a cash dividend to the stockholders to reimburse them for money expended on the property for which they received nothing. The bonds are to be brought out in London.

☞ The Maysville (Ky.) *Eagle* says that the Maysville and Lexington Railroad is at present doing as much business as it has capacity for. Not only is every car belonging to the road kept in constant employ, but others from the Kentucky Central are called into use. The cars of the latter road are being brought down to the crossing at Licking, and there filled with staves for Covington. Large quantities of coal, salt and lumber are being taken to the interior. In fact, the prospect is quite encouraging, and if temporary difficulties can be 'tided over' the road will yet be a success.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending June 14, at 438,312 tons, and for the coal year at 7,807,400 tons, against 7,703,508 tons to corresponding time last year, being an increase of 103,892 tons. The bituminous tonnage for the week is 59,692 tons, and for the year 970,963 tons, giving a total of all kinds for the week of 498,004 tons, and for the year of 8,778,663, tons, against 8,580,203 to same time last year, being an increase of 197,860 tons.

BALTIMORE AND OHIO RAILROAD,
OFFICE OF CHIEF ENGINEER,
BALTIMORE, MD., June 18th, 1873.

NOTICE TO CONTRACTORS.

PROPOSALS FOR THE GRADUATION AND MASONRY OF THE VALLEY RAILROAD between Staunton and Salem, Virginia, will be received until the 4TH DAY OF JULY NEXT, at the office of the Company, in Staunton, Virginia, where profiles and speculations can be seen.

Fifty-nine (59) miles of this line are to be let a contract for the remainder, twenty eight (28) miles, (the locations of which are to be designated by the company) has been made.

Payments monthly, in cash, or part in first-class interest-paying County Bonds, as may be agreed upon, with reservation of twenty (20) per cent. until completion of contract.

The Company reserves the right to reject any or all bids.

JAMES L. RANDOLPH,
Chief Engineer Valley Railroad.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 28 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m26

FOR SALE—150 to 200 tons new 30 lb. T Rail—in lots to suit purchasers. Apply to A. & P. ROBERTS & CO., 414 Walnut St., Phila.

SAMUEL FOX & CO.'S
Bessemer Steel Rails.

RAILROAD SECURITIES NEGOTIATED.

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B, water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the Steam Water Station Company,

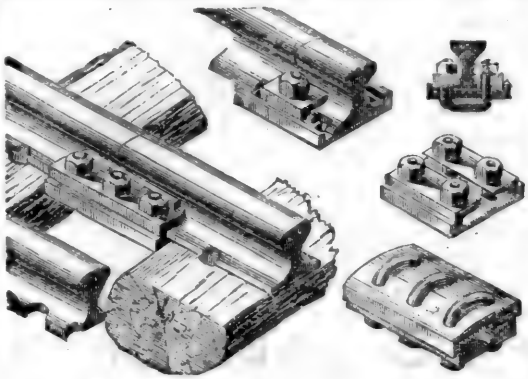
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

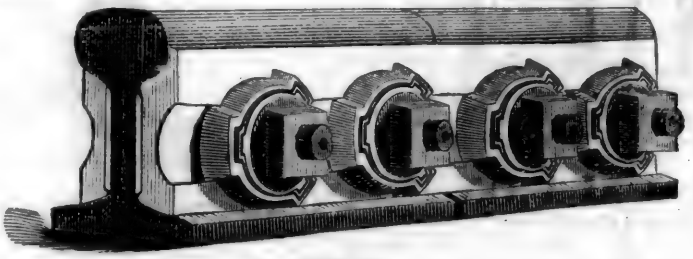
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Chesapeake and Ohio Railroad.

The completion of the Lewis Tunnel on the Chesapeake and Ohio Railroad (4,000 feet long, and which has cost upwards of a million dollars,) closes the last of the heavy rock excavations on that great line. Passenger trains commenced running through it on the 5th instant. The express trains now on the road are said to be running loaded with passengers. New equipment is continually being received to accommodate the freight, which is pressing on the line beyond their present supply of motive power and rolling stock. The coal, iron and timber traffic, in particular, promises to assume important dimensions in the way of coal freights, and of through freights there is little doubt this line will have all it can take or handle conveniently.

☞ At the annual election for directors of the Erie Railway Company, held on the 8th inst., the following gentlemen were chosen: Samuel L. M. Barlow, Adrian Iselin, John Taylor Johnston, W. Butler Duncan, Edwin D. Morgan, Hermann R. Baltzer, George H. Brown, Samuel D. Babcock, Giles Hotchkiss, William T. Hart, Henry L. Lansing, Courtlandt Parker, Homer Ramsdell, Lucius Robinson, Frederick Schuchardt, William W. Shippen, Peter H. Watson. Of these, seven are new members, viz: Messrs. Brown, Baltzer, Hotchkiss, Hart, Iselin, Parker and Robinson. The seven retiring members, whom the above gentlemen succeed, are: John A. Dix, John J. Cisco, John V. L. Pruyn, A. S. Diven, J. Talbot Olyphant, Charles Day and Wm. R. Travers.

TO INVESTORS.

The Northern Pacific Railroad Company having determined to close its 7-30 First Mortgage Gold Loan and thereafter to pay no higher rate of interest than 6 per cent. on further issues of its bonds, THE LIMITED REMAINDER OF THE **7 3-10** LOAN IS NOW BEING DISPOSED OF through the usual agencies.

This affords a desirable opportunity to persons wishing to **reinvest July interest and dividends.**

The company now has more than 500 miles of its road built and in operation, including the entire Eastern Division connecting Lake Superior and the navigation of the Missouri river; the work of construction is progressing satisfactorily; the Company has earned title to nearly ten million acres of its land grant, and sales of lands have thus far averaged $5 66 per acre.

All marketable securities are received in exchange for Northern Pacifics.

JAY COOKE & CO.
No. 20 Wall Street, New York.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending June 28, at 464,219 tons, and for the coal year 8,700,099 tons, against 8,582,952 tons to corresponding time last year, being an increase of 117,147 tons. The bituminous tonnage for the week is 59,540 tons, and for the year 1,117,150 tons, giving a total of all kinds for the week of 523,759 tons, and for the year of 10,817,249 tons, against 9,558,617 to same time last year, being an increase of 258,632 tons.

Peninsular Railroad of Michigan.

A meeting of the stockholders of this company will be held at Battle Creek, Mich., on the 30th inst., for the purpose of considering and deciding upon an agreement made by their Directors with the Directors of the Port Huron and Lake Michigan company for the consolidation of the two companies. To connect their two roads it will be necessary to construct a line from Lansing, Mich., east by north about fifty miles to Flint. With this and with the extension of the Peninsular in Indiana to Valparaiso, where it is to connect with the Pittsburgh, Fort Wayne and Chicago, and with running rights over that road into Chicago, which we believe have been agreed upon, the consolidated company would be able to run trains through between Chicago and Port Huron by a short route, and at the latter place make connection with the Grand Trunk and Great Western of Canada.

☞ The directors of the North and South New Jersey Railroad, recently elected, are: Samuel H. Robbins, of Allentown; Joseph D. Pancoast and Joseph R. Lippincott, of Salem; Randall E. Morgan, of Camden; Edwin A. Ford, of Bordentown; A. G. Ritchie, of Trenton; Edward Howe, of Princeton; William Bell, of Perth Amboy; and Benjamin F. Smith, of New York. This enterprise traverses the State in a new direction, and affords an accommodation much needed. Its path lies across that of nearly every railroad in the State and thus will draw upon them all for its travel and traffic, while its terminal connections will give it a business of great magnitude.

☞ Three dividend-paying railroads in Georgia have united in the issue of two million dollars of bonds to be a joint first lien on these corporations. The bonds will bear 7 per cent, payable at New York, and be due in 1893. The companies are the Central Railroad and Banking Co., the Macon and Western, and the Southwestern.

☞ On the 2d inst. a master's sale in chancery of the Vineland Railway took place in Vineland, N. J. Jay Gould bid $10,000, and there being no other bidders the road was knocked down to him. This sale wipes out all the stock and floating debt.

Boston, Concord and Montreal Railroad.

The earnings of this road for the years ending March 31, 1872 and 1873 were as follows:

	1872.	1873.
From passengers	$197,436 79	$231,534 00
" freight	419,088 86	417,596 35
" mails	9,865 81	10,256 01
" express	7,250 00	8,000 00
" miscellaneous	1,254 25	2,962 42
	$634,895 71	$670,348 78
Expenditures, viz:		
Maintenance of way	$197,929 44	$178,908 20
" motive power	120,083 97	148,171 20
Cost of working road	141,562 31	170,676 59
" management	13,032 26	15,568 28
Miscellaneous	28,035 50	25,309 68
	$500,643 48	$538,633 90
Net balance	$134,252 23	$131,714 88
Balance, March 31, 1872		179,297 62
Interest received during the year		10,286 16
Wood on hand less than last year		1,454 93
Total		$322,703 58
Appropriated as follows:		
Paid coupons, back coupons, interest on over-due bonds, etc		$57,954 94
Paid preferred stock dividends		46,830 00
In hands of superintendent over last year		1,129 27
Engineer's department, oil and stock on hand more than last year		17,066 93
Paid trustees of sinking fund		12,500 00
Paid sundry expenses		5,342 75
Bonds and cash on hand		181,879 69
Total, as above		$322,703 58

Compared with the previous year, the gross earnings show an increase of $35,453 07; with an increase in expenses of $37,990 42—making a decrease in the net earnings of $2,537 35. The report says:

The above shows an increase in passenger receipts, and a slight reduction in freight receipts. This is owing to the disarrangement in our business by the loss of the bridge at East Concord, last April, when our business was interrupted for nearly a month, and also to the severe weather and deep snows the past winter, which at times completely stopped our freight trains.

We have laid 78,196 sleepers, put in 1,375 tons of new 56 lb. iron and taken out 740 tons of light iron, and put into the extension beyond Lancaster.

We have rebuilt, at East Concord, permanent abutments and piers in the most approved manner, and have completed a bridge, except covering; all of which are of the most durable kind, and we believe will stand the test of time.

The expenses caused by the loss of the bridge, in carrying freight around, temporary bridge, cost of abutments, piers, and new bridge, have been large; but it is money well invested for the road, as the improvements are now of the most permanent kind.

As the expense of the above has been large, we have apportioned $10,000 to go into next year's accounts. We have also made large repairs to other bridges on the line of the road.

We have added to our equipment two first-class engines, two first-class monitor-top passenger cars, and one baggage car; have purchased twenty-five adjustable platform cars, and built in our shops seventy platform and box cars, and made full and ample repairs upon all engines, cars, etc.

We have built fifty miles of new fence, and shall continue to build until we get the whole line rebuilt.

The two dividends for the year, on the preferred stock, have been paid and charged in the accounts.

Agreeably to the authority given the directors at the annual meetings, they have made an agreement to have the branch road extended from Peirce's Bridge to the Twin Mountain House, and hope to have it done by July 1st. This extension will facilitate and help the mountain travel very much.

The road from Lancaster to Northumberland was so far completed last August, that we were able to run over it and carry passengers and freight, and the business so far has come up to our expectations.

We shall have to erect suitable buildings at Northumberland, to accommodate the business, such as engine and car houses, wood-sheds, etc.

The union of the White Mountains N. H. Railroad with this corporation, has been accomplished on the terms proposed in the vote of this corporation, at its last annual meeting, on that subject. The stockholders of that road concluded to take the bonds of this company in exchange for their stock, as authorized by the vote referred to, and the stock will be surrendered for cancellation accordingly.

The completion of that union is fortunate for this company. The road above North Haverhill has now become in full a part of its own road, and all the interests of the line from Concord to the White Mountains and Northumberland are united under its entire control and management.

Heretofore this company has been under the necessity, in a great degree, of acting through another corporation, in the protection of its interests and the extension of its enterprises and business in northern New Hampshire, but hereafter all the embarrassments and difficulties of such a position will be avoided, and the company can act directly and fully for itself.

In pursuance of the authority given by the company, by its vote at the annual meeting last year, the directors have determined to make a new issue of bonds to the amount authorized, and to secure the same by a mortgage of all the road, equipment, and franchises of the company.

The bonds will be ready for issue in a short time.

The main object of this issue is to consolidate all the various classes of bonds and other indebtedness now outstanding against the company, into one. That course will greatly simplify the accounts of the company, and place its financial affairs in a clearer and more settled condition, and the amount of the issue will be sufficient to provide for all the present indebtedness, of every form, of the company.

No action has been taken by the directors during the past year to carry into effect the consolidation of the different classes of stock of the company, as contemplated, further than to obtain subscriptions. This delay has been unavoidable, because the progress of the subscriptions to the agreement, by the stockholders, though great, yet has not been sufficient to warrant official action in the matter. The difficulty is not on account of objections by the stockholders to the plan, but in reaching the large number of them, for the purpose of obtaining their signatures.

It is desirable to have the signatures of all the stockholders, if possible, so as to have the change unanimous; and we hope to be able to complete the subscriptions early in the summer.

We shall have, from Concord to Northumberland, and the branch when completed to the Twin Mountain House, a road of 155 miles, and one we think very important for the interest of the State of New Hampshire, and one the securities of which we consider will be very desirable as an investment.

The cost to this time, of the extension, the branch and the Y at Woodsville, is about $900,000, and is not included in the accounts, but has been raised outside and will be paid from the sale of bonds, and proper accounts and vouchers will then be rendered.

The directors have had some surveys made for a road from Meredith Village to Centre Harbor and Ossipee, but they are not quite satisfactory. They will have further ones made, and if the proper aid be rendered will try to build the road.

The total number of passengers carried during the year was 171,511½—equal to 10,290,690 carried one mile. Total number of tons of freight, 92,186—equal to 5,531,160 tons carried one mile.

TRIAL BALANCE, March 31, 1873.

Railroads of Connecticut.

By a recent law passed by the Legislature, the official railroad year is made to close September 30. Heretofore the year has closed December 31. The present report of the General Railroad Commissioners is the first under the new order of affairs.

In looking over the tabulations contained in the volume we find great improvements both in the forms and contents as compared with previous reports. In all important points the forms of the Massachusetts Commissioners, which are the most elaborate published, have been copied, and much new matter, not contained in the reports of the neighbor State, has been added by the General Commissioners. We may now look upon the Connecticut Reports indeed as among the most perfect issued; and return our thanks for the attention of the Hon. JOHN I. HUTCHINSON, one of the Commissioners, in complying with our request for a copy thereof.

Among the most important improvements noticed is the analysis of the railroad bonds, in which the date of maturity, rate, amount, &c., is set forth; the length of railroads (main and branch lines, second-tracks and sidings) owned, and the names and length of leased roads operated, is also given in detail; and a more perfect division of earnings and expenses is adopted. The disbursements from earnings for interest, dividends, &c., are also given. There might be some fault found for the placing of rents, and other correlative receipts among the gross earnings; and certainly leases, rents, taxes and insurance ought not to be placed among working expenses. They more properly belong to "Income Account," which if given in full in these reports would be of great advantage to the reader. Indeed we want a statement of earnings and ex-

penses separately; a separate income account, and a general balance sheet; all of which accounts ought to be demanded from the corporations reporting, and published annually by the Railroad Commissioners. But let us not grumble because we have not all we desire; let us be content with the improved statistical diet furnished to us on the present occasion.

Would it not be a wise thing to call a convention of all parties experienced in railroad statistical matters, whose duty it would be to elaborate a series of forms to be adopted by all railroad corporations and State reporters; and at once require uniform annual returns from all parts of the United States. Such uniformity is as much needed for this country as a uniform scale of weights, measures and monies for the whole commercial world. It is an impossibility to produce uniformity from the heterogeneous heaps of reports as now furnished by companies and States. Let us ask this as a boon to statistical science.

In the following we aggregate the principal parts of the information contained in the report of the Connecticut Commissioners, for the official year ended September 30, 1872.

Capital stock $44,344,550 ..... paid		$35 460,118
Funded and floating debts		43,273,493
Total capital stock and debts		$78,733,611
Cost of railroads and equipments		$74,074,037
Miles of railroad		6 262
Locomotive engines		277
Passenger cars	325	
Baggage cars	126	
Merchandise &c., cars	4,705	
		5,166
Men employed (not including construction hands)		6,506
Miles run by passenger trains	3,239,077	
Miles run by merchan. trains	1,974,598	
Miles run by other trains	465,381	
		5,679,056
Passengers carried		10,134,633
Passengers carried one mile		219,128,491
Merchandise (tons) carried		3,170,761
Merchandise (tons) carried one mile ..		109,061,974
Passenger earnings	$5,725,048	
Freight earnings	4,949,687	
U. S. Mails	125,932	
Expresses	335,339	
Other receipts	215,419	
		$11,368,425
Maintenance of way	$2,048,262	
" motive power and cars	2,169,042	
Cost of fuel	900,943	
Cost of oil and waste	104,009	
Insurance	43,777	
Taxes, state, county and town	400 903	
Miscellaneous expenses	3,209,051	
		7,489,521
Income above expenses		$3,878,904
Amount paid for interest		1,199,661
Amount paid in dividends		2,271,148
Surplus for the year		882,021

‖ Only ten companies paid dividends, in the aggregate averaging 7.9 per cent on the whole stock of said companies; and being 6.4 per cent on the whole stock in all the railroad companies reported.

☞ The earnings of the Central Pacific Railroad in June, 1873, were $1,813,790, against $1,138,272 in June, 1872—an increase of $175,518. For the first six months of 1873 the earnings were $6,320,787, against $5,508,616 for the corresponding period of 1872—an increase of $812,171.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of June, were:

ENTERED FOR CONSUMPTION.

	$129,123,210	$139,903,902	$125,086,690

Imports of dry goods at New York for the year ending with June.

	1871-72.	1872-73.
Manufacturers of wool .	$42,928,912	$40.241,260
" cotton.	27,533,545	27,508,924
" silk ...	36,971.722	30,170,056
" flax ...	19,672,647	17.656,774
Miscellaneous dry goods	12,897,076	9,509,676
Total imports	$139,903,902	$125,086 690

The imports of foreign dry goods at New York for each fiscal year since 1850 have been as follows:

Year.	Value.
1850 1	$64,613,747
1851-2	57,221,062
1852-3	79,192,513
1853-4	92,389,627
1854-5	62,918 443
1855 6	85,898,690
1856 7	92,669,088
1857-8	67,317,736
1858-9	93.549,083
1859-60	107,843,205
1860-1	83,310,345
1861-2	38 156,720
1862-3	61,968,037
1863 4	83,234,966
1864 5	49,853,939
1865-6	137,055,834
1866-7	103,407,278
1867-8	77,254,182
1868-9	92,499,842
1869-70	96,414,276
1870-1	126,123,210
1871 2	139,903,902
1872 3	125,086,690

☞ The George Creek Coal and Iron Company, Baltimore, has declared a dividend of $6 per share for the past six months, payable on and after 10th instant, free of all taxes.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide-water from the commencement of navigation to the 30th ult., inclusive, during the years 1872 and 1873, was as follows:

	Flour, bbls.	Wheat, bushels.	Corn, bushels.	Barley, bushels.
1872....	32,200	1,682,800	6,516,600	401,500
1873....	52,100	3,556,700	3,518,100	22,200
	Inc...19,900	Inc.1,873,900	*2,998,500	*379,300

* Decrease.

By reducing the wheat to flour the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency equal to 894,680 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of June, in the years indicated:

	1871.	1872.	1873.
Canal opened—	April 24.	May 13.	May 15.
Flour, bbls.	78,700	32,200	52,100
Wheat, bushels..	4,328,300	1,682,800	3,556,700
Corn, bushels ...	4,258,000	6,516,600	3,518,100
Barley, bushels..	40,100	401,500	22,200
Oats, bushels....	999,600	1,561,200	810,400
Rye, bushels.....	46,200	203,100	293,100
Malt, bushels....	265,000	254,700	222,200
Feed, lbs.....	1,679,500	2,160,700	2,080,600

The Trans-Andine Railroad.

A correspondent of the Panama *Star* writes to that journal an account of the progress making by the railroad crossing the Peruvian Andes, under construction by Henry Meiggs. We extract as follows:

Sailing forth to the scene of conquest from the station of Monserrate, an enclosure of about ten acres covered with workshops, engine-houses and all the most improved paraphernalia requisite for its purpose, the first object calling our attention was the celebrated stone bridge built in arches across the Rimac, and which constructed by the Spaniards in the middle of the sixteenth century has defied the attacks of time or of its even more powerful South American enemy, the shock of the earthquake. The masonry of this bridge is admitted by the most experienced in the art to be unsurpassed. Hardly had our little engine left behind this relic of colonial times when her smoke darkened the arches of the Balta Bridge, built entirely of iron after the model of that which spans the Thames at Twickenham, and only boasting of its few months of existence. The contrast between the sixteenth and nineteenth centuries was striking, but the ponderous edifice of the forefathers even eclipsed in grandeur the effort of their children. Here too was noticeable the breakwater erected by the contractor of the line, Mr. Henry Meiggs, a solid wall of stone of more than 350 metres in length along the side of the rushing river, effectullay defending the embankment from the encroaches of the torrent when the melted snows from the mountains add to its volume. We now emerge from the city limits, and we steam up on at a 2 per cent grade to the first station of importance on the line, whence the products of the extensive hacienda of Santa Clara, consisting of sugar and cotton, are sent to their market. The station at this point is excellent, far superior to those generally found on American railways, and serves as a depot for the neighboring estates. Then the Favarita passing rapidly through the rich valley of the Rimac, glowing in its agricultural wealth of maize, cotton, sugar cane, vegetable (possibly the most profitable of all the Lima market), lucerne grass or *alfalfa*; giving three crops a year, and supplying in one form to beasts of burden the otherwise three-fold necessities of barley, oats and hay, reaches the station of Chosica. This stopping place is twenty-six miles from Lima, and 2,000 feet above the level of the sea. Thanks to the liberality of Mr. Meiggs, the station building not only meets the requirements of the railroad, but moreover offers the advantages of a first-class hotel.

Cocachacra, the centre of another highly cultivated district a few miles on, is speeded by, and the Indian village of San Bartolome, now an important depot of the railway, 39 miles from Lima, and gay with the banners of the United States and Peru flung out to the invigorating breeze from the Cordilliera on this pleasant feastday, is quickly arrived at. Up to this point of San Bartolome the road, though peculiar and interesting from its object, presented no striking points as regards engineering triumph, but the change now becomes speedily apparent. Running along the valley of the tortuous Rimac for a mile or two our little engine turned on a V, so technically called, and rapidly rushing towards its natural enemies, the Andean chain, commenced the ascent. To say that the locomotive was like a fly scaling a plate of glass would not be an exaggeration. At many points the winding path of the railway is so marked that the voyager looking from the car window can perceive at the distance of a quarter of a mile beneath the line over which he passed five minutes before, but separated from him by a length of two or three miles of rail. This extraordinary, and well may it be called triumphal progress, continues until the height of 1,000 feet is attained from the valley and the starting point of San Bartolome; then a level, for a short spurt, is struck along the mountain side, but while the difficulties of the ascent are forgotten, the cuts and fillings call for even greater astonishment. Cuts of considerable length and height, blasted out from the solid granite, frown down on the engine as if in anger at their defeat; long fillings made up from the remnants of the volcanic rocks found or blasted on the spot; tunnels blown with powder from the reluctant mountain; one beautifully masonaried of 300 feet; another arched in by its mother rock, bringing to mind the Mammoth Cave, with the stalactytes dependant on every side; but through which grand engines of 40 tons weight pass daily four times, dragging huge construction trains behind them. All along this section the works of the unfortunate aborigines may be seen at every moment; the hills are terraced with the ridges where before the invasion of the cruel Spaniard, the maize and wheat necessary for their consumption or for the payment of their tithes were grown.

The Baltimore Bridge Company possesses the honor of having constructed the most perfect iron pier viaduct in the world. We passed over it. The central pier, 252 feet in height, rests on solid masonry over seventy feet square; from end to end the bridge measures 575 English feet, and the width is from twelve to fifteen feet. This is the famed Verrugas viaduct. The scene is more than impressive, it strikes the beholder with awe. Looking down through the open sleepers you see the dwellings of the laborers reduced to mere cardhouses; the figures of the workmen engaged in preserving the structure intact appear as dolls; the immense network of iron roads, girders and binders is like a spider's web, but how strange it seems that while weaving this marvellous web no fly perished in its dangerous intricacies; not one life was lost in its construction

The bridge is left, and safely gliding over an apparently perilous section of track along the mountain side, we arrive at the village of Surco, traveling up a 4 per cent grade, a prosperous village on the old highway from Lima to Janja, a "royal way" measuring three feet in width in its broadest portion. Here are corralled or stabled the mules employed in transporting the plant of the railroad to the higher points, nearly 1,000 in number and admirably managed. Following the rails we shortly reach the end of the laid track, at a gorge of the mountains through which the Rimac rolls noisily along. This point is distant some sixty miles from Callao, and here Mr. Meiggs, desirous of experimenting with all systems, proposes placing an iron bridge built in France, about one hundred and seventy feet long and supported by solid masonry, seventy feet above the torrent. The bridge is already joined together, and the final work will be as follows: The after end will be so weighted as to render it possible to launch the bow of the bridge, so to speak, across the river, the structure being secured and hauled into place by strong tackle; as the bow surges over the gorge the weight on the after end is proportionately increased, the rollers are struck away, and the fore-end lands on the opposite side. French engineers in charge of this delicate undertaking are confident of perfect success.

This is the Callao and Oroya railway over which we have so rapidly passed, and returned to our initial starting point after having traveled 100 miles and ascended to a height of 7,000 feet above the sea—all accomplished with many and long stoppages, some of an hour, within seven hours, going quietly around curves of a minimum radius of 200 metres, some indeed smaller, and climbing up grades of from two to four per cent.

The contract for the building of the road was signed between the government of Colonel Balta and Mr. Henry Meiggs, late in the year 1869, and the first earth was turned in Lima on the 1st of January, 1870, the venerable Archbishop of the capital calling down the blessing of Heaven on the undertaking. The price fixed was 27,600,000 soles (a sole being about 94 cents of an American gold dollar); payments were stipulated to be made as the work proceeded, and the road was to be delivered completed and equipped to the government within six years from the date of contract. This, Mr. Meiggs is confident, will be faithfully fulfilled.

It was at first estimated that there were 7,000,000 cubic yards of filling and excavation. There are many cuts of a difficult character made from the solid rock; four viaducts of iron, measuring in the aggregate 1,290 metres; 88 bridges over the river Rimac, and 42 tunnels through live rock covering a distance of nearly 20,000 metres. The work challenges the admiration of the world!

Illinois Central Railroad.

The statement of this Company for the month of June, 1873, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	1,157.14 for	$9,578 74
Acres Interest Fund Lands Sold	..... for	.....
Acres Free Lands Sold...	102.66 for	1,041 26
Total sales during the m'th of June, 1873	1,259.80 for	$10,620 00
To which add Town Lot Sales	..... for	65 00
Total of all	1,259.80 for	$10,685 00
Cash collected in June, 1873		$46,777 28

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, July 19, 1873.

Stock Exchange and Money Market.

Business, financial and commercial, in the wholesale line, was quite generally suspended from Thursday, July 3, to Monday, July 7, so that the week has been a broken one, in trade circles, and the movements in most lines have been comparatively moderate. The Money market has assumed an unusually easy aspect, with funds in search of lucrative employment accumulating rapidly, and rates of accommodation favoring borrowers decidedly. Call loans were quoted at the close as low as from 2@4 per cent; with choice to very good commercial credits at from 5½@7½ per cent per annum. At these modified figures, the wants of all responsible borrowers were quite promptly provided for. The city banks derived much additional strength, in the line of their reserves, from the July interest and dividend disbursements; and, in their last weekly exhibit, they reported large gains in the way of specie and deposits, while showing a moderate loss of legal tender notes. The cash balances of the U. S. Sub-Treasury were reduced in both the coin and currency forms, but not to any very important extent, notwithstanding the free liquidation of interest claims, particularly in coin, in payment of the July coupons, and registered interest obligations, on account of the national funded indebtedness. The city banks last week reported an increase of about 8⅜ millions in their deposit line, with a decrease of nearly a million in their legal tender, and a gain of over 5⅞ millions in their specie reserves. They enlarged their loan and discount averages about 5⅜ millions, and again contracted their circulation slightly.

The city banks have made a further large gain on their obligatory reserve, the last statement showing that they had $16,608,000 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, reduced its coin balance nearly 1½ millions; and its currency reserve about 1⅔ millions. Its currency reserves at the close of the week were $25,262,285; and its coin board, $39,267,592.

The clearances of the city banks averaged through the week 95½ millions a day, and amounted in the aggregate, for the whole week, to $478,571,387, as against $438,988,739 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance $1,402,466 and its coin reserve $1,448,742 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $33,551,400, against $28,785,500 same time last year. The city bank deposits are now $232,369,400 against $241,774,900, week ending July 6, 1872. The legal tender reserve amounts to $48,168,000, against $52,508,600 same time last year. The circulation now stands at $27,276,200 against $27,508,400 same time last year. The loans are now $286,905,800 against $296,901,800 at this date last year.

The coin reserve of the city banks is now over 83½ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is 48⅛ millions against about 34⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 232⅜ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

Under the official programme for July, Government proposes to sell, Gold, as follows: Thursday, July 17, $1,500,000; Thursday, July 24, $1,000,000; Thursday, July 31, $1,000,000; and on Wednesday, July 16th, to buy in $500,000 of U. S. Five-Twenty Bonds.

The cash balances in the Treasury Department on Tuesday were as follows: Currency, $9,098,459; special deposit of legal tenders for the redemption of certificates of deposit, $32,160,000; coin, $72,280,791. Coin certificates outstanding, $40,156,800; outstanding legal tenders $356,000,000.

The U. S. Sub-Treasury office last week received $1,998,838 of currency, and $7,827,440 of gold, the latter including $1,266,000 from customs; and disbursed $8,401,304 of currency and $9,376,182 of gold, the latter embracing $615,000 of coin interest.

Government revenues have been yielding moderately, since our last. The excises yielded within the week about three millions, and for the fiscal year ending with June 30th, 1873, $115,067,728. The customs at the port of New York, for week, were $1,249,683, and at the outports, about $450,000 more, in coin or coin certificates.

The Gold speculation assumed a more confident temper toward the close, on an enlarged business, though the customs drain was moderate, and the export movement light. The operators for a rise were more determined in their bidding and seemed to view the immediate future hopefully, for their interest. The range of the price during the week has been from 115⅛@115⅞, and the quotation on Wednesday was 115⅝ against 115⅛ on Wednesday of the preceding week. The specie outflow last week, was $401,515. The Gold Exchange Bank clearances have averaged about 46¼ millions per day during the week.

The customs demand for Gold last week, averaged $273,200 a day. The arrivals of specie from Europe, Havana and other foreign ports last week were $2,050, and thus far in 1873, have been $1,962,011, against $755,131 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1 1873, has been $64,871,356 against $77,742,175 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $41,974,273, against $46,188,875 during the same time in 1872.

The export drain of specie was $401,515 last week, against $2,624,812 same week preceding year. The shipments since January 1, 1873, have been $28,700,768 against $39,745,237 during the same portion of 1872.

Foreign Exchange has been in more demand and quoted dearer toward the close. Bankers' sixty day bills on London closed on Wednesday at 109¼@109⅜; sight bills on London, at 110⅛@110¼. The week's exports of Domestic Produce have been to the currency value of $4,964,510.

Government securities have been in much better demand, largely on investment account, at firmer and buoyant prices.

U. S. sixes of 1881 closed on Wednesday of this week at 119⅝@119⅞; U. S. Five-Twenties of 1862, 117@117¼; U. S. Five-Twenties of 1864 at 117½@117¾; U. S. Five-Twenties of 1865 118⅛@118¾; U. S. Five-Twenties of 1865 consolidated 117⅝@117¾; U. S. Five-Twenties of 1867, 118¼@118½; U. S. Five-Twenties of 1868, 118@118½; U. S. Ten-forties at 114⅝@114⅞; U. S. Fives of 1881 (Funding Loan) 115@115¼; Six per cent. currency Sixes from 114⅛@114⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 25.	July 1.	July 9.
Consols	92⅛	92¼	92⅞
U. S. 5-20s, 1865	92¾	93	93⅛
" 1867	92⅜	92¾	93⅛
" 10-40s	89	89⅜	90¼
New Fives of 1881	89¾	90	90¾
Erie	49⅛	49	48⅞

The Railway and Miscellaneous share speculation has been decidedly more active than usual of late, and prices have been generally quoted stronger.

State bonds have been more sought after at firmer rates, as a rule.

An improved demand has been noted for the favorites of the Railway Mortgage Bond Loans

on investment account, and prices have been generally well maintained, closing on the older issues of substantial loans, more firmly, influenced in good part, by the prevailing ease in Money. Central Pacific Sixes have been in demand at from 100⅛@100⅜ ex the July three per cent coupon. The June earnings of the Central Pacific Railroad were $1,313,790, as against $1,138,272 in June of last year; and thus far in 1873, $6,320,787, as against $5,508,616 same time in 1872, showing a gain of $812,171 for the first half of the current year. The Chesapeake and Ohio Seven per cent gold bonds have been quite actively sought after at 90, and interest. Chesapeake and Ohio Sixes have been more inquired for at 88½ and interest. Western Pacific Sixes have been in fair demand at 92¼@92½, ex the July coupon of three per cent. The Northern Pacific 7-30 Loan has been selling quite freely, to investment buyers, at par and interest. The balance of the defined limit of this loan is consequently being marketed with encouraging rapidly.

The movements in most business lines have been on a restricted scale, since our last. In the Metal trade, the dealings have been unusually light. Copper has been dull and rather weak, with sales of 100,000 lbs., in lots, at 28½c. per lb. Iron has been very dull, no important transactions having been reported, while values have been quoted very irregular. We quote: Eglinton Pig at $42; Glengarnock, at $43; No. 1 American Pig at $45@$48; No. 2 do. $41@$46; Wrought Scrap at $45@$48; English rails at $65@$68, gold; American Rails at works, $75@$80. Old Rails $49@52. Pig Lead has been in limited demand, at $6 62½@$6 75, gold, for foreign. Spelter has been more active, but less firm at 7½c.@7⅝c., gold; sales, 50 tons. Pig-tin has been in fair request, with Straits quoted at 31¾c.; English at 29¾c.@30c., and Banca, at 30c., gold; sales have been reported of 250 slabs Straits on private terms; 100 slabs do., at Boston, to New York buyers, at 31½c., gold; and 20 tons English, to arrive, at 29¾c., gold. Tin Plates been quiet within the previous range; sales 500 boxes Charcoal at $11 25, and 250 boxes do. Terne at $10, gold; Charcoal Plates quoted here $11 12½@$11 50; Charcoal Terne, $10@10 50; Coke, $9 25@$10; Coke Terne, $8 75@$9, gold, per box. Zinc very dull and nominal. Hardware has been quiet, with values quoted somewhat unsettled.

Domestic produce, has been moderately active, the main business in Breadstuffs having been in grain for shipment, and prices closing with rather more steadiness. Provisions have been stronger in price, and, toward the close, in better request. Middling upland Cotton left off tamely at 20¾c. per lb. The receipts at all the ports, since Sept. 1, have been 3,505,000 bales, against 2,660,678 bales same time in the preceding year; exports 2,546,500 bales against 1,910,100 bales in the previous year; stock at the ports at latest dates, 223,100 bales against 147,750 bales same date 1871.

Foreign merchandise has been rather slow of sale yet generally quoted about steady as to price. The week's imports amounted to $4,112,009 including $859,925 of dry goods.

Ocean freights have been decidedly more active with rates on grain and Petroleum room and tonnage closing more firmly.

At the Live Stock Markets, Beeves have been in moderate request at from 7½@13 cts. Veals at 4@9½ cts.; Sheep at from 4@5¾ cts.; Spring Lambs, 7@11 cts.; Swine at 5⅛@5⅜ cts. per lb., all live weight. The week's receipts were 8,866 Beeves, 3,939 Veal Calves, 17,789 Sheep and Lambs, and 33,018 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Banking House of Fisk & Hatch,

No. 5 Nassau-St., }
New York, July 7, 1873. }

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds—

THE CHESAPEAKE AND OHIO SEVEN PER CENT. GOLD BONDS; principal and interest payable in gold in New York; interest payable Jan. 1 and July 1; coupon or registered. Price **90** and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD, IS A GREAT EAST AND WEST TRUNK LINE, 420 miles in length, extending from Atlantic tide-water at Richmond to Huntington, the most favorable point of railroad connection with the Ohio River, and developing the richest IRON, COAL, AND TIMBER regions in the United States.

It is completed and doing a large, profitable, and rapidly increasing business.

ITS FREIGHT TRAFFIC, PASSENGER TRAVEL AND EARNINGS during the current year will be much larger than has heretofore been anticipated, and they are developing with a rapidity which shows the Chesapeake and Ohio to be one of the most valuable and successful railroads in the country.

These facts, together with the substantial and enduring character of the Road itself, its advantages for economical and profitable operation, and the unquestionable security of the bonds of the Company, enable us to recommend them with the utmost confidence.

Pamphlets, containing full information concerning the Road and the country it traverses, will be furnished upon application.

We continue to deal in Government Securities, CENTRAL PACIFIC, WESTERN PACIFIC, AND CHESAPEAKE AND OHIO SIX PER CENT. BONDS, buy and sell Stocks and Bonds at the Stock Exchange on Commission, for cash, make Collections, receive Deposits, on which we allow interest at the rate of 4 per cent., and do a general banking business.

FISK & HATCH.

Knoblauch & Lichtenstein,

No. 37 Broad-st., New York.

OFFER FOR SALE

$200,000

7 Per Cent. First Mortgage Bonds,

30 YEARS TO RUN,

OF THE

CENTRAL R. R. EXTENSION COMPANY

OF LONG ISLAND,

At 90 and Accrued Interest in Currency

The road runs from Farmingdale, the present terminus of the Central Railroad, to Babylon on the South Shore of the Island. According to contract, the road will be finished by July 15th, ready for this summer's travel.

These Bonds being a *home security*, and among the best ever offered in this market, we take special pleasure in recommending them.

Pamphlets or further particulars will be promptly furnished on application.

Central Railroad of New Jersey.

Office Central R. R Co., of New Jersey, }
July 1st, 1873. }

To the Stockholders:

A comparison of the receipts, expenses and net earnings of the six months ending June 30th, with the corresponding six months of the previous year, gives the following results (the receipts and expenses for June being partly estimated):

	1873.	1872.	Increase.
Receipts.	$4,185,011 96	$3,455,956 58	$679,055 38
Expenses	2,116,478 00	2,062,426 87	54,051 13
Net Earnings...	$2,018,533 96	$1,393,529 71	$625,004 25

The above shows the net result of the business for the present year to the 1st instant to be $625,004 25 better than the previous year, which would have fully justified a dividend of five per cent. had not the dividends paid in 1873 exhausted the surplus of earnings. To restore these, the dividend has been limited to four per cent.

John Taylor Johnston, President.

☞ The earnings of the Union Pacific Railroad for May, 1873, were $1,007,831 27, the expenses (including $100,970 for taxes) $490,322 23, and the net earnings $517,509 04. In May, 1872, the earnings were $890,442 07, the expenses, $470,715 11, and the net earnings $419,726 96—showing an increase in earnings of $117,389 20, with an increase in expenses of $19,607 12, making the increase in net earnings $97,782 08. From January 1 to May 31, 1873, the earnings were $3,613,112 59, the expenses $1,935,796 79, and the net earnings $1,677,315 80—showing an increase in gross earnings compared with 1872 of $606,955 35, and an increase in net earnings of $666,635 89.

☞ The Central Pacific Railroad Company have elected Leland Sandford, C. P. Huntington, Mark Hopkins, E. H. Miller, R. Robinson, C. H. Cummings, and William E. Brown directors for the ensuing year.

☞ The earnings of the Ohio and Mississippi Railroad in June, 1873, were $282,302 06, against $262,326 80 in June, 1872—an increase of $19,975 26.

TWO MILLION OF BONDS.

National City Bank. }
New York, June 20, 1873. }

The undersigned, commissioners, offer for sale Two Millions of the Joint First mortgage Bonds of "The Central Railroad and Banking Company," "The Macon and Western," and the "South western" railroad companies of Georgia, bearing seven per cent. interest, coupons payable 1st January and July, and the bonds falling due the 1st of January, 1893, principal and interest payable at this bank.

These bonds are secured by a first lien on the combined properties of the above named roads, consisting of 707 miles of track, full equipments of rolling stock and appurtenances, together with valuable assets of real estate, stocks and bonds, amounting in the aggregate to at least $16,000,000.

The Central Railroad Company has paid annual cash dividends of not less than ten per cent. for more than twenty years, and occasionally extra dividends. Since the war alone, annual dividends of ten per cent. and over have been paid, amounting to sixty-two per cent. on the capital stock.

The Macon and Western, and the South-western Railroad Companies have paid regular annual dividends of eight to ten per cent. for about the same period of time.

The $2,000,000 are a part of a total of $5,000,000 authorized by the Legislature of the State of Georgia, and secured as stated by a joint 1st mortgage on the entire property of the three companies. They are now offered with a view to complete the connections of the road by land and sea, to meet at their maturity in 1875 the $1,000,000 of 1st mortgage bonds issued for rebuilding a large portion of the Central Railroad, broken up by the operations of war, and to pay all bonds of the South-western and Macon and Western Roads (not secured by mortgage or other lien) maturing in 1875 and 1876.

The whole mortgage amounts to about $7,000 per mile of road, but no contingency is now anticipated which will ever require the whole amount of the $5,000,000 to be marketed.

For further and full information we refer to pamphlets to be had at the office of the Farmers' Loan and Trust Company, who are trustees for the bondholders under the mortgage, and at the National City Bank, New York.

The undersigned will receive sealed proposals directed to them, care of the National City Bank, New York, until the 16th day of July next, reserving to themselves the right to accept or reject any and all bids. Proposals must be for a price "flat"—*i. e.* accrued interest to go with the bond.

JAMES F. BOZEMAN, }
J. F. GILMER, } Commissioners.
W. B. JOHNSTON. }

☞ The Westchester and Philadelphia Railroad Company have declared a dividend of 4 per cent on preferred and consolidated preferred stock, payable on the 15th instant.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending June 22, are: freight, $38,887 21; passengers, $31,775 76—total, $70,662 97.

☞ The Directors of the Canada Pacific Railway have accepted the terms proposed by Sir Hugh Allen for the construction of the road.

Journal of Railroad Law.

RAILROAD COMPANIES AS COMMON CARRIERS AND AS FORWARDERS—WHEN A THROUGH CONTRACT IS IMPLIED.

The late case of Babcock *vs.* The Lake Shore and Michigan Southern Railway Company, (49 N. Y., 491), was an action to recover the value of a quantity of petroleum oil destroyed by fire while in the possession of the defendant as common carrier. An appeal was taken to this Court from a judgment of the General Term affirming a judgment for the defendant by the lower court without a jury.

The following is the able opinion of the court delivered by—

ALLEN, J.—To exempt the defendant, the successor in liability to the Buffalo and Erie Railroad Company, from the common law responsibility of common carriers, extending to all losses except those resulting from the act of God or the public enemies, it must appear that the oil of the plaintiff was, at the time of its destruction, in the possession of the Buffalo and Erie Railroad Company, for transportation under a special contract, restricting the liability of the carrier, made by and with the plaintiff, or some one authorized to act in his behalf. The contract with the Atlantic and Great Western Railway Company was special to its terms, and by it the liabilities of the carrier were greatly restricted, and a loss by fire was excepted from the risks of the carrier, and if that was a through contract, that is, a contract for the carriage of the property to and a delivery of it at Albany, its ultimate destination, each carrier in the course of its transit, including the Buffalo and Erie Railroad Company, was entitled to the benefit of the exemptions from liability secured by it. It would be regarded as made for the benefit for all who should undertake the carriage of the goods upon the terms and conditions prescribed by it.

If it was not a through contract, then the Buffalo and Erie Railroad Company received the goods as common carriers, and are liable as such for all losses not within the recognized exceptions, that is, except those which were inevitable or occasioned by public enemies.

If the first carrier, the Atlantic and Great Western Railroad Company, only undertook for the carriage of the oil to Corry for an agreed compensation, and the delivery at that place to another carrier, there was no authority resulting from the relation, or the contract between that company and the plaintiff, to enter into a special contract in behalf of the plaintiff, with the next carrier at Corry, to limit and restrict the liability of such carrier in any respect. There was no agency created; the whole duty of the Atlantic and Great Western Railway Company was that of carrier, and terminated with the delivery of the goods to the next carrier, and the common law liability of the carrier receiving the goods attached at once and by necessary implication upon their receipt.

The goods were received by the Atlantic and Great Western Railway Company at Oil City, in Pennsylvania, addressed to J. W. O. & Co., Albany, New York, and, had they been received without a special contract, a contract would not have been implied on the part of the railway company to carry the goods or provide for their carriage beyond the terminus of its road. Its whole duty would have been performed by transporting them to the extent of its own route, and delivering them to the next connecting carrier, that is, the railway company would have been liable as a carrier over its own road and as a forwarder from the terminus of its line. This is the recognized rule in this and other States, although it is otherwise in England. But the goods were received by the Atlantic and Great Western Railway Company under a special contract, and upon the interpretation of that contract, and the effect to be given to it the decision of this case hinges. In the agreement the goods were described as "56 bbls. R. Oil, Car 1, 848," and in margin "mark. J. W. O. & Co., J. W. Osborne & Co., Albany, N. Y." The mark or direction of the property was given to identify and distinguish it from other property of the same character, and was not inserted as a part of the agreement, and from it a contract to carry it to Albany would not be implied. The agreement was by "this (The A. & G. W. R.) company and connecting roads," to deliver the property at Corry station, which was the terminus of the roads of that company, upon payment of freight and charges thereon. The freight was specified at $25 00 per car. This was the freight to Corry, and no rate was agreed upon or specified for transportation beyond that place. By the agreement the plaintiff "in consideration of the reduced rate given and specified above for the transportation of petroleum," assumed certain risks, including that by which the property was destroyed, "while in transit, or the depots or station of any of the companies whose lines of road it be transported upon or over."

The plaintiff did "in consideration of having the petroleum transported at such reduced rates," release the A. & G. W. R. Co. and all other companies over whose lines of road it may pass, from all claims for loss or damage by fire," etc.

The agreement was made by filling up a printed form adapted to a contract for the transportation of goods beyond the route of the contracting carrier, and over the lines of other and connecting roads to distant places. The parties merely inserting in writing the date and place of shipment, the name of the owner, the description of the property, the freight, and the place of delivery (Corry Station). The commencement and termination of the responsibility of the carrier (the A. & G. W. R. Co.) were expressed clearly and distinctly in the written part of the contract.

The goods were not lost or destroyed between the place of their receipt and Corry, not until after they had left Corry in charge of other carriers and had come into the possession of the Buffalo and Erie Railway Company, in the course of their transit to Albany. The contract was for the carriage of the oil to Corry, and only so much of the printed matter of the blank form used as is consistent with and appropriate to that contract is of any effect. The intent of the contracting parties is to be gathered from the entire instrument, the written part controlling where that and the printed are in conflict, and the latter to be rejected when incompatible with or inappropriate to the intent of the parties, as clearly indicated by the written portion. The printed form is very general, and contains provisions adapted to contracts differing essentially from this, some of which are not adapted to a contract for the carriage of goods wholly within the limits of the contracting carrier's line of road, and such parts as are inapplicable must be rejected as surplusage, and the written portion of the agreement prevail. The limitation of the carrier's liability by the contract is necessarily confined to the service contracted for, and the carriers who were parties to it. Carriers who are not named in a contract for the carriage of goods, and who are not formal parties to it, may, under certain circumstances, have the benefit of it. Such is the case when a contract is made by one of several carriers upon connecting lines or routes for the carriage of property over the several routes for an agreed price by authority, express or implied, of all the carriers. So, too, in the absence of any authority in advance, or any usage from which an authority might be inferred, a contract by one carrier for the transportation of goods over his own and connecting lines, adopted and acted upon by the other carriers would enure to the benefit of all thus ratifying it, and performing service under it. But in such and the like cases the contract has respect to and provides for the services of the carriers upon the connecting routes.

There was no agreement here for the carriage of oil beyond Corry, no note of freight agreed upon to any other point, and the carrier was entitled to receive the freight earned, $25 00 per car, on delivery of the oil at that place. There was no consideration for an agreement by the plaintiff to relieve the carriers who should thereafter receive the property for transportation from the common law liabilities, and no such agreement was made. It is claimed that the finding of the judges by whom the cause was tried, that the Buffalo and Erie Railroad Company received the property 'under and in pursuance of said agreement, upon its said railroad from Brocton to Buffalo," is conclusive as a finding of facts, and entitled the defendant absolutely to the benefit of the stipulations of that contract. The answer is that the transportation from Brocton to Buffalo is not within the limits of the contract, and it was simply impossible that goods could be carried between those places in pusuance of a contract expressly providing for an entirely different transportation, or a transportation between two other places on a different route. While $25 00 per car freight might have been a reasonable or a reduced rate for transportation from Oil City to Corry, it may have been an entirely inadequate or an exorbitant rate for transportating the same property from Corry to Brocton, Brocton to Buffalo, or Buffalo to Albany. It is certainly improbable that the same freight was to be the compensation to each of the railroad companies by whom the oil should be carried in its transit to Albany.

The contract was not intended as a through contract. The plaintiff has no claim under it either against the Atlantic and Great Western Railway Company, or any of the connecting roads for the carriage of the goods beyond Corry, and it necessarily follows that its stipulations did not extend to or affect the carriage beyond that place.

The Camden and Amboy R. and T. Co. were held liable as common carriers under a contract somewhat like this, made with the Pennsylvania Railroad Company, under which the goods were transported by the latter company to Philadel-

phia and there delivered to the former company.

Bristol and Exeter Railway Company *vs.* Cummings (5 H. and N., 969), merely held, carrying out the doctrine of Muschamp *vs.* The Lancaster and Preston Junction Railway Company (8 M and W., 421), which has not been followed in this State, that the contract of carriage in that case was a through contract made by the Great Western Railway Company for the carriage of the goods to their ultimate destination, and that the contracting carrier was solely liable for the loss of the goods in transit, although they were lost while in course of transportation by the defendant who received them from the first carrier at the terminus of its road for transportation to the place to which they were directed. This case would not be followed with us, but each carrier would be held responsible for a loss or damage to the goods while in his custody, and the only question would be as to the extent of his liability, and whether he was entitled to the benefit of any stipulations in the contract made with the first carrier. The defendant, upon the case made and facts found by the judge at the trial, was subject to all the common-law liabilities of carriers, and the stipulations of the contract with the Atlantic and G. W. R. Co. did not extend to the transportation of the goods by the defendant. It is not necessary to consider at this time the liability of the parties, in case it should appear that the oil was being carried at a reduced rate of freight.

The judgment must be reversed and a new trial granted.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 28 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m26

STEEL AND IRON RAILS.

Sole Agents in the United States for
SAMUEL FOX & CO.'S
Bessemer Steel Rails.

RAILROAD SECURITIES NEGOTIATED.

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B, water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the Steam Water Station Company,

LENG & OGDEN,

IRON AND STEEL DEALERS & IMPORTERS,

No. 4 FLETCHER STREET, NEW YORK.

Sole Agents for Credenda Steel Gun Barrels and Moulds, and the Cold Drawn Patent Weldless Steel Tubes.

A. W. LADD,

NO. 5 DEY STREET, NEW YORK,

Will cut to order for Bridge and Railroad Builders, WHITE PINE, GEORGIA and FLORIDA PINE, HEMLOCK and OAK TIMBER.

Agent for ROBERT BROWN, Telegraph Contractor.

Telegraph Lines of any length built with Brooks' Patent Paraffine or Glass Insulation and American Compound or English Galvanized Wire at the lowest rates and shortest notice. Also, Wire Fence for Railroads.

PACIFIC MAIL
Steamship Company's
LINE TO
California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
ASPINWALL, PANAMA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

July 10, 1873—Steamer OCEAN QUEEN, Capt. SEABURY, will leave Pier No. 42, North River, at 12 o'clock noon for Aspinwall direct, connecting at Panama with the steamer NEVADA Capt. ——, about 29th inst., leaving Panama for San Francisco, and calling at Acapulco, Manzanillo, Mazatlan; also connecting for all Central American and South Pacific Ports. Departures of 16th and 20th each month from New York connect with the Company's steamer, touching at San Benito, Tonata, Salina Cruz and Port Angel. The splendid steamship COSTA RICA will leave San Francisco on or about July 24, for Honolulu, Sandwich Islands.

One of the company's splendid steamers will leave San Francisco, July 16, 1873 for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

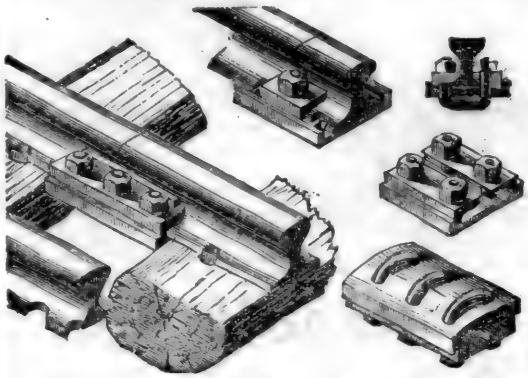
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

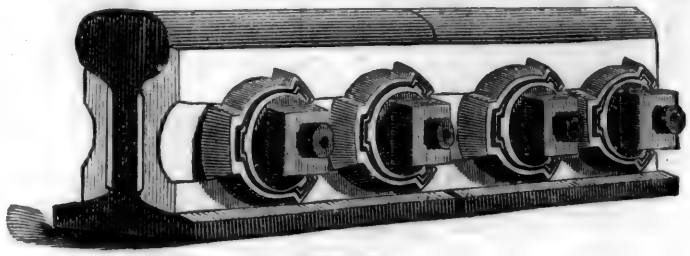
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

The Yellowstone Navigable.

The Yellowstone has its source in the mountain lake of that name, lying between the Big Horn and Upper Missouri branches, and is characterized by many islands, and by bold sweeping curves, frequently infringing on the hillsides. Between Clark's Fork and the mouth of the Big Horn it is a rapid river, flowing some three or four miles per hour, and is from five hundred to six hundred yards wide. After passing the Big Horn, and thence to Powder River, it resembles the turbid Missouri, and expands into a volume 900 yards wide. It is unobstructed by difficult rapids, and contains numerous densely-wooded and heavily-timbered islands, and the sand-bars could easily be removed at very little expense. Captain Reynold's party, who explored it some years ago, represent its floods as neither sudden nor excessive. They followed it up several hundred miles, and expressed the opinion that it could be navigated all the way to the point where it issues from the mountains, by boats drawing three feet of water, from the middle of May to the 1st of August, and pronounced it better for steamboat navigation than the Missouri. The total length of the Yellowstone is about five hundred and fifty miles, and if our present information is tolerably correct, about three hundred and fifty miles of the river will be opened to the busy steamboats of the Western waters. The Northern Pacific Railroad (which traverses the natural channel of the Yellowstone), with its southern connections to Cheyenne and Yankton, will greatly assist in populating and developing the Yellowstone basin and the many adjoining river valleys, and bringing their untold mineral wealth and the wonders of their volcanic phenomena within the reach of the settler and the tourist. The completion of these highways to the great National Yellowstone Park and Lake, lying amid the most fascinating and stupendous scenery of the world, and in a climate the most favored, will attract thousands of visitors from every part of the globe.—*New York Herald.*

TO INVESTORS.

The Northern Pacific Railroad Company having determined to close its 7-30 First Mortgage Gold Loan and thereafter to pay no higher rate of interest than 6 per cent. on further issues of its bonds, THE LIMITED REMAINDER OF THE **7 3-10** LOAN IS NOW BEING DISPOSED OF through the usual agencies.

This affords a desirable opportunity to persons wishing to **reinvest July interest and dividends.**

The company now has more than 500 miles of its road built and in operation, including the entire Eastern Division connecting Lake Superior and the navigation of the Missouri river; the work of construction is progressing satisfactorily; the Company has earned title to nearly ten million acres of its land grant, and sales of lands have thus far averaged $5 66 per acre.

All marketable securities are received in exchange for Northern Pacifics.

JAY COOKE & CO.
No. 20 Wall Street, New York.

☞ The Nashua and Rochester Railroad is now in readiness for the laying of the rails from Rochester to Epping, to which place it is expected the line will be opened by August first. The entire road will, it is thought, be completed by April first, 1874, and thus open a new line to travel from Portland to New York via Rochester, Nashua and Worcester.

Railroad and Mining Operations in Virginia.

Virginia seems to be at last entering upon the career of prosperity for which she is so eminently qualified by the extent and variety of her resources, the diversity of her productions and the salubrity of her climate. A small but steady flow of immigration has set in for that State, which must exercise an important influence on her future destinies. The new comers are more distinguished for intelligence and vigor than for numbers. They belong to the very best and more desirable classes. From nearly all parts of the State we hear of small companies of persons from England, Scotland, Germany, France, and other European counties purchasing lands and settling down to the cultivation of the soil. And, perhaps better still for Virginia, persons from other States are making their home in the Old Dominion. Only a few days ago land was purchased in the vicinity of Manassas for twenty five families from Michigan, part of whom have already arrived. Nor is this an isolated case. In all parts of the State are to be found newly-settled Northern families who appear to be well satisfied with their condition and prospects, and whose relations with the people of the State are of the most cordial character. The new comers, for the most part, possess capital and resources which enable them to occupy an important position in their new homes.

Nor is this all. A large amount of outside capital is being invested in the State. Some of the most enterprising and wealthy citizens of New York have invested largely in mineral lands in Virginia. Investments from other sources have also come to our knowledge, and the aggregate of Northern capital represented in that State must be quite large. It is also known that the attention of foreign capitalists has been attracted to Virginia. A gentleman who recently arrived in Richmond to negotiate on the part of the British holders of Virginia securities was also intrusted to investigate the mineral and manufacturing capabilities of the State. There can scarcely be a doubt as to the nature of his report. The mineral wealth of all other countries appears as poverty in comparison with the wonderful resources of Virginia. It is scarcely an exageration to assert that her mere surface deposits of coal and iron ore would suffice for the consumption of all the generations of mankind for centuries to come.

With these incomparable advantages and with the additional benefit of contiguity to the Atlantic sea-board, the prosperity of Virginia is only a question of time. As yet her mineral resources have been almost untouched. In the Kanawha Valley the deposits of splint coal are especially valuable and extensive. This coal derives its name from the character of the fragments or pieces into which it separates. Its freedom from sulphur and other impurities renders is especially

valuable in smelting ores and in the manufacture of iron and steel, and in this respect is a valuable substitute for charcoal. It is equal in quality to the very best English cannel coal, and the Cannelton Company, consisting chiefly of New York capitalists, mines this coal, ships it to New York, and sells it at a profit of from $8 to $12 per ton, against $22 for English cannel. This coal is by no means limited to the Kanawha, but is found in all the adjacent valleys and in the entire region. This coal is virtually imbedded in strata of iron ore, the whole character of the mineral formations establishing the conclusion that nature herself has destined the two States of Virginia and West Virginia as the centre of the iron industry not only of the United States, but also of the entire continent.

The completion of the Chesapeake and Ohio Railroad, which intersects this entire mineral region affords an outlet on the one hand to the seaboard and on the other to the great markets of the Ohio and Mississppi valleys.—*Daily Bulletin.*

Proposed Coal Depot on Staten Island.

It is reported that the Philadelphia and Reading Railroad Company have purchased a large area of land with an extensive water-front at Stapleton, Staten Island, where they intend to have their coal yards. A bill has passed the Legislature of this State granting to Jacob Vanderbilt and others the right to build a suspension bridge over the Kills, between New Jersey and Staten Island, and a similar bill will be brought before the New Jersey Legislature. The Philadelphia and Reading Company, it is said, have purchased the right of way across the Island, and intend to run their coal trains direct to Stapleton. It is reported, also, that the Brooklyn Steam Transit Company intend to make a connection with the Philadelphia and Reading Company's wharves by a ferry from Stapleton to or near Fort Hamilton. It is estimated that the Staten Island bridge will be about 900 feet span, and cost about $100,000,000.

North Eastern (S. C.) Railroad.

The earnings of this road for the years ending February 28, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$97,659 85	$121,684 73
" freight	190,067 44	255 348 01
" express	7,858 51	5.430 32
" mails	13,866 64	12,999 96
	$305,452 44	$395,463 02
Expenses, viz:		
Maintenance of road	$64,051 45	$54,277 52
Motive power	60,075 27	85 876 84
Repairs of cars	22,076 62	30,578 70
Transportation	45,446 10	52.514 79
Salaries and general exp.	12,149 56	12,447 31
	$203,799 00	$235,695 16
Net earnings	$101,653 44	$159,767 86

Compared with the year 1872, the gross earnings of 1873 show an increase of $90,010 58; with an increase in operating expenses and additions to equipment of $31,896 19—making the increase in net earnings, $58,134 42. The ratio of operating expenses to receipts is 50 per cent; ratio of total expenses to receipts 59.6 per cent. The President in his report says:

Reviewing the above, you will notice the large, and gratifying increase of $90,010 58, (or nearly thirty per cent,) in the aggregate earnings of this, over the past year. The accompanying tabular statements of the superintendent, will show that we have transported this season, 82,719 passengers, 39,349 bales cotton, 112,445 barrels naval stores, and 4,692,000 feet of lumber; against the previous one, 65,415 passengers, 29,793 bales cotton, 82,770 barrels naval stores, and 3,612,000 feet lumber—with an increase of $35,814 27 in our miscellaneous upward freights—as a consequence of the generally improved condition of the agricultural and other interests, directly contributing to our business.

The expenses of the road have been $235,695 16, including an amount of $38,032 70, expended for two new locomotives, 1 passenger, 1 mail and 11 freight cars.

The financial condition of the company will appear from the accompanying statements of the treasurer, as follows:

At credit of profit and loss, from proceeds of transportation for 1872 '73		$159,767 86
Charged, during that period, with interest on bonded and other obligations	$99,213 52	
Current interest	3,648 07	
At debit of profit and loss, 28th Feb., 1872, (with $146 11 since added)	3,526 86	
		106,388 95
At credit of profit and loss, Februa- 28, 1873		$53,378 91

The indebtedness of the company, is as follows:

17,987 shares capital stock, $50	$899,350 00
1,640 first mortgage 8 per cent bonds, each for $500, payable 1st September, 1899	820,000 00
17 old first mortgage bonds, still outstanding (and to be redeemed)	8,500 00
644 second mortgage bonds, each for $500, payable 1st September, 1899, for	322,000 00
Less 161 deposited with trustees for security of preferred stock, (as stated below) 80,500	241,500 00
7 old second mortgage bonds, each for $500, still outstanding, (and to be redeemed)	3,500 00
1,610 shares 8 per cent preferred stock, of $50, (secured by 161 second mortgage bonds,)	80,500 00
Real estate bonds	28,000 00
Bills payable	25,949 14
Certificates of indebtedness	109,028 23
Outstanding interest	4,508 50
Profit and loss	53,378 91
Total	$2,274,214 78

To meet this, we have the road, 102 miles long, with its sidelings, equipment, &c., at a cost of $2,148,130 65

With assets, as shown by the treasurer amounting to $126,084 13

$2,274,214 78

The entire issues of our new first and second mortgage bonds are, respectively, for $840,000, and $322,000—but there are still out and awaiting redemption, $8.500 of the old first mortgage and $3,500 of the old second mortgage bonds, or, a total of $12,000—to redeem which when presented, we have on hand a corresponding amount, in new bonds. Having placed the former among our obligations, the latter are necessarily included among our assets. We have also placed among our assets, $12,000 of new first mortgage bonds, to be specially applied, towards payment of the company's real estate bonds for $28,000 when same is required. We should further explain, that, when the company determined in 1858, to issue their preferred stock, it was resolved to secure it by the deposit of a corresponding amount of their second mortgage bonds, in the hands of trustees for its security; hence, it is not a distinct liability—but rather, a substitute for, or representative of, an equal amount of second mortgage bonds. As both bear the same rate of interest, the conversion of one into the other has been consented to at the option of their respective holders—some desiring the preferred stock, because of its being registered, and transferable only on the company's books; while others prefer the bonds, for the greater convenience which they afford, in the collection of interest, facilities of transfer, etc. The amounts of either may thus be varied, but the aggregate of both, will always be represented by the sum of $322,000.

The road, generally, is in good condition. Such of its rails as require renewal, are now being taken out, and heavier substituted, with improved fish plate fastenings,—a process which will be continued, as the necessity for it arises.

Our motive power, consisting of 14 locomotives, is all in running order, with the exception of one, now in our shops, undergoing a thorough repair. During the year, one of light capacity, after a lengthened service, was condemned as not worth that cost—while two others, from the Rhode Island Works, have been added to our supply.

Our rolling stock consists of 14 first and second class passenger coaches, 5 mail and baggage cars, 73 box, and 54 platform and 15 gravel cars—all of which, under the usual current repairs, are in serviceable order. The whole equipment of the road should be increased, to meet the demands upon it,—not only for our increasing local business but also, for that opened to us at Columbia, and points on the Charlotte Road, through the Wilmington, Columbia and Augusta Road.

The fact of our passing through the year without any accident, or casualty of a serious nature, entitles the subordinate officers and employees of the company to this acknowledgment of their zeal, and careful attention in the discharge of their respective duties.

In conclusion, we regret having to inform you that two important suits, involving the liability of the company to taxation by the State and city authorities, have recently been decided adversely to it, by the Supreme Court of the United States. The company claimed its exemption from taxation, under a special act of the legislature to that effect, passed in the year 1855; but, it was contended that this exemption was only held by us, subject to a right of repeal, by any subsequent Legislature, in conformity with the provisions of an act passed in the year 1841, and which right the Legislature exercised in the year 1868. We have the above information by telegraph, the decrees of the court having only been delivered on the 31st ultimo.

BALANCE SHEET, February 28, 1873.

Construction, equipment, right of way, &c.		$2,148,130 65
Investment in 86 second lien eight per cent bonds of the North Eastern Railroad Company		40,850 00
17 new first lien eight per cent bonds of this company, on hand for the redemption of 17 Old First Mortgage bonds still outstanding		8,500 00
24 new first lien eight per cent bonds of this company, on hand, and applicable towards payment of real estate bonds		12,000 00

Superintendent.—S. S SOLOMONS.

Secretary.—C. WILLIMAN.

Michigan Central Railroad.

The directors of the Michigan Central Railroad Company hays issued the following circular:

The stockholders of this company have been heretofore made aware of the large expenditures which have been made and are being made upon the road to enlarge its ability to meet the demands of business pressing upon it. These expenditures have been more than was estimated, because it has been found necessary to press them faster than was originally intended, and also because of the largely increased cost of iron, steel and labor.

The capacity of the road, however, in all its departments, has been largely increased for business, though, even as yet, it is inadequate to the necessities.

The full statement of its affairs comprised in the annual report, which is now in press, will soon be before every stockholder. It will show what has been done, and what remains to be done, and the necessities therefor, and also the financial condition of the company.

The net earnings of the past six months have been about 8½ per cent, and the reason why it has not been larger will also appear in the report, which will enable the stockholders to judge as to the future of the property of the company.

In the circumstances, however, and with the amount which it is evident must be yet expended upon the road, the board have thought it the wisest and best policy for the stockholders not to divide the earnings made, but to allow them to be used to add to the value of the property.

It has become evident that it will require the full amount of the proceeds of its mortgage bonds, and some more, to complete the improvements necessary, and the board believe that the best interests of the company are promoted by using the present net earnings rather than raise money at large sacrifice, now or in the future, or attempt to carry a large floating debt.

They regret very much the necessity of passing a dividend, but believe they will be justified by the stockholders, when they shall have read the annual report. Their confidence in the value of the property is unshaken, though so large an amount of money has been, and still is required to make it adequate to present and future demands upon it. By order of the Board,

J. F. JOY, President.

Baltimore and Ohio Railroad.

At the regular monthly meeting of the president and directors of the Baltimore and Ohio Railroad Company yesterday, President Garrett in the chair, various matters of importance were disposed of. On application of the Washington City, Virginia Midland and Great Southern Railroad Company (late Orange and Alexandria) for aid in prosecuting its Danville extension, and offering satisfactory collateral securities, it was determined unanimously by the Baltimore and Ohio board to advance from time to time, as might be needed, in money and credits, the aggregate amount of $700,000, with the view of insuring the completion of this important line southward at an early date. A proposition from the same company to permanently lease to the Baltimore and Ohio Company that portion of its Manassas branch line extending from Strasburg to Harrisonburg, a distance of fifty one miles, was accepted, at a rental of $89,250, gold, annually. This is on a capitalized basis of $1,275,000, or $25,000 per mile, on which 7 per cent is to be paid per annum as the condition of the lease.—This contract gives an unbroken control of the line through to the point at which the Valley Railroad, now in course of construction, begins in its progress to Staunton and thence to Salem, on the Atlantic, Ohio and Mississippi road.

President Garrett formally announced his contemplated trip to Europe, which he found necessary, and on which he will depart from Baltimore early. His many years of arduous labor in his present position have somewhat impaired his health, and his physicians have suggested his temporary withdrawal. He would have preferred resigning the presidency, but it had been urged that that was not requisite, and therefore he now contemplates in deference to that sentiment only a temporary severance of his connection with the company.

Appropriate resolutions in acceptance were adopted, expressive of the regret of the board on account of the circumstances prompting Mr. Garrett to this step, and returning thanks for his able and faithful service through the long period of his connection with the company, and with the hope of his entire recovery, and in due time re-assumption of the duty of the presidency.

Mr. John King, Jr., the vice president, was then, on motion of Mr. Sollers, a State director, seconded by Mr. Galloway Chester, unanimously elected president *pro tempore*, and on a committee waiting on and informing him accordingly, Mr. King appeared and accepted the position.

The committee consisted of J. Spear Nicholas, J. Carroll Walsh and Thomas O. Sollers. Complimentary remarks were made by several members in tribute to the retiring president, as well as in expression of the confidence reposed in the capacity and experience of the newly-elected president *pro tempore*. Mr. Garrett took occasion also to express his appreciation of the thoroughness, fidelity and capacity of both Mr. King and Mr. Wm. Keyser, the second vice-president of the road, in whose joint hands, as its chief executive officers, its affairs would remain in his absence. It may be stated that Mr. King came into the service of the company in the ticket department on the 13th of September, 1854. Subsequently he became acting paymaster, then auditor of the company, and after that combined with it the duties of general freight agent. On the 12th December, 1866, he was elected vice-president, since which period he has filled that office. Mr. King was in the service really before Mr. Garrett's connection with the road, Mr. G. having first been made a director in July, 1855, and president in 1858. Mr. Garrett has thus been fifteen years in the service of the company.—*Balt. Sun, July 4.*

American Coal Areas.

The extent and general distribution of our coal measures is for obvious reasons a subject of universal interest. Present wants and uses are no indication of what the future demand will be. At no distant day it is likely that we shall be called upon to export largely from those coal-producing districts nearest the seaboard. It is only lately, however, that the extent and value of our coal supply has been understood and appreciated even in this country. We have as yet no exact survey to show how much we have in reserve, but from the most careful and trustworthy estimates, it appears that we have of known fields an area of not less than 230,000 square miles. The geographical distribution of this is about as shown in the following table:

	Area in sq. miles.	No. of Beds.	Thickness of Miasma.
New England Basin	700	23	2,500
Penn. Anthracite	434	2 to 5	2,000 to 3,000
Appalachian Basin—			
Pennsylvania	12,222	..	825 to 2 535
Maryland	550	32	1 500
West Virginia	16,000	24	1,250
Ohio section	10 000	10	1,500
East Kentucky	10,000	..	.....
Tennessee & Ala.	14 100	7	578
Michigan Basin	9,700	..	123
Illinois Basin—			
Illinois	41,500	10	600 to 2,500
Indiana	6 500	13	650
West Kentucky	3,700	11	612
Missouri Basin	100,000	..	....
Texas Basin	5,500	..	....

The above includes the seven principal coal areas of the country. The eighth, of which comparatively little is known, lies within what is known as the Rocky mountain region, and consists chiefly of beds of soft bituminous coal and lignites, which are already coming into general use, and which, in a country naturally deficient in wood, have a great and constantly increasing value. With these resources of fuel and the many fields of future production yet undiscovered, we can sustain the greatest possible individual development for many centuries to come, while the geographical distribution of our coal basins is such that when increased transportation facilities shall have established a more intimate intercommunication between the States, no combination of mine-owners and carriers will long be able to deprive any part of the country of the advantages of a cheap and abundant supply.

☞ The Lynchburg *Virginian* says that arrangements have been made by the corporation of which the Lynchburg and Danville Railroad Company forms a part, to raise immediately the sum of $700,000, whereby the line to Danville will be pushed forward to completion at an early day. It has been moving rather slowly for some people, of late, though the company was doing all that could be done with the means at command to finish the work. They will have ample means now, and we doubt not that the line will be open this fall.

Movements of Produce at New York.

Receipts of certain articles of domestic produce at the port of New York for the first six months of the year:

	1872.	1873.
Ashes, bbls.	8,748	8,528

☞ The Nashua and Rochester Railroad is nearly in readiness for the laying of the rails from Rochester to Epping, to which place it is expected the line will be opened by August 1. The entire road will, it is thought, be completed by April, 1874.

The Pennsylvania Air Line.

The new through route from Washington to New York *via* Potomac Railroad and the Baltimore tunnel is called "the Pennsylvania air-line" route. The route is over the lines of the Pennsylvania Railroad Company. From Philadelphia it runs through Lancaster to Columbia, Pa., where the Susquehanna river is crossed, and thence by way of York to Baltimore. The tunnel being completed, passengers are carried through without delay. Throughout the road is double track, laid with steel rails and stone ballast. The equipment is entirely new, and is as perfect as it can be made. Two express trains run entire between New York and Washington daily, leaving New York from foot of Desbrosses and Cortland streets, and Philadelphia from depot Pennsylvania railroad, Thirty-second and Market streets.

Statement of the Public Debt of the United States July 1, 1872.

DEBT BEARING COIN INTEREST.

Interest paid by United States, $18,509,280 90; interest repaid by transportation of mails, &c., $4,223,140 82; balance of interest paid by United States, $14,286,140 08.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1873.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

State Credit of Florida.

The following is a statement of the present financial condition of the State of Florida:

Bonds issued in 1871, of $100 each, bearing interest at 7 per cent, payable at Treasurer's office, in Tallahassee.	$350,000
Bonds issued 1873, authorized by the act approved Feb. 21, 1873, of $1,000 each, interest at 6 per cent, payable in gold, January and July, in Tallahassee or New York.	265 000
Other outstanding bonds, with interest due thereupon to Jan. 1, 1873.	493,000
Total	$1,108,000
The school and seminary funds are creditors of the State, for money borrowed during the late war	268,045

Upon this debt due the school and seminary funds the interest has been paid to July 1, 1873.

On the 15th of May there were outstanding $220,506 77 of controller's warrants and Treasurer's certificates, bearing no interest, receivable for taxes, which will be absorbed by the taxes collected this year.

The act of 1873 authorized the issue of $1,000,000 of bonds, bearing 6 per cent gold interest, and maturing in thirty years, $500,000 to be sold at not less than 80 cents, net. Of these, the $265,000 mentioned above have been sold, and 379 of the hypothecated bonds of 1868 and 1869 have

been redeemed and canceled, and the rest under hypothecation will be redeemed when presented.

There remains $235,000 of the gold bonds to be sold. When this is accomplish and the other $500,000 of these bonds are applied to the redemption of the outstanding bonds named in the act, than the debt will be as follows:

Bonds of 1871	$350,000
Bonds of 1873	1,000,000
School and seminary debt	262,045
Total	$1,612,045

A tax of four mills upon the dollar is levied upon the real and personal property of the State to pay interest upon and form a sinking fund for the redemption of the bonds of 1873, and this tax can be applied to no other purpose.

The valuation of the taxable property being $30,000,000, there will be levied a tax of $120,000 for this purpose; allowing very liberally for delinquency.

This will pay the interest and form a sinking fund of at least two per cent upon the principal of the bonds.

The controller is directed by the law of 1871 to apportion annually such an amount among the several counties, as will pay the interest and one per cent of the principal of the bonds of 1871.

One hundred and thirty-two thousand dollars of the bonds mentioned as "other outstanding bonds" are held by the Indian Trust Fund in Washington, and it is expected that the claims of the State of Florida against the United States during the Indian war will be sufficient to extinguish this amount.

In 1870 the State loaned its credit to the Jacksonville, Pensacola and Mobile Railroad Company by the issue of bonds to the amount of $4,000,000, taking a first mortgage for a similar amount upon the road as security, of which amount about $3,000,000 have been sold.

No other bonds in aid of railroads are outstanding, and no more will be issued, as the act entitled "An act relating to the indebtedness of the State" prohibits the further issuance of bonds for any purpose whatever. C. A. Cowgill, Controller.

June 14, 1873.

Prospects of the English Iron Market.

It is now two years since the first decided movement in the price of iron, and prices for a considerable portion of that period have been nearly double those current during many preceding years. It is probable that the climax has been reached. The last "turn" in the trade has been characterized by features altogether different from those which have accompanied any similar period of prosperity. On previous occasions when prices advanced almost the whole of the rise went into the pockets of the masters, and, therefore, as soon as a decline set in, the competition to secure any profit that might remain quickly brought prices back to their old level. It is different now. It is estimated that two-half to one thirds of the late advance was due to the increased remuneration of labor, so that there is no great margin for reduction without touching wages, and this will be a difficult as well as tedious operation. As the present prices of manufactured iron do not show any margin for profit on the current prices for pig iron and coal, it remains to be seen what are the prospects of a fall in these materials. As regards the prospects of coal, we have shown from evidence given before the Parliamentary Committee that, while there was every certainty of a considerable fall from late extreme prices, the downward course would be greatly retarded by the action of the men, who would resist any attempt to reduce the present high rate of wages, and thereby so far limit the output of the pits as to prevent stocks from accumulating. It can only be as the consequence of some serious stoppage in the iron trade (which it is estimated consumes nearly one-third of the whole amount of coal raised) that prices will fall to the actual cost of production, which, with the high wages now ruling and likely to rule for some time, must be very considerably above the old fashioned rates.

As respects pig iron, it may be noted, in proof of the exceptionally strong position it holds, that during the last month or so, while coal has been tending downward there has been but little change in the price of pig iron: there have been fluctuations, but the latest tendency has been upwards. This arises from the exceptional demand that has been so long experienced, and that more especially for export. Considering how largely the consumption of the last two years has been in excess of the production, there must be a very serious falling off in the demand before pig iron goes largely into stock again, which it must do before we can anticipate very much lower prices. There are do doubt evidences that the late high prices are at last beginning to tell on the foreign demand for manufactured iron, but against this it must be noted that the export demand for pig iron (even at late extreme prices) is in excess of the large figures for 1872, for the returns for the first four months of 1873 are 417,905 tons, against 382,385 tons in 1872. It should also be borne in mind that stocks abroad are everywhere at their lowest, as holders consider present prices quite exceptional and dangerous, so that foreign orders, even though limited in extent, cannot be long withheld. It is fair to assume that while high prices must interfere with and limit the use of iron in many forms, they must, on the other hand, have the effect of stimulating production. The stimulus is very manifest at present among our Trans-atlantic cousins, and it is estimated that during the present year will increase their production about 500,000 tons, which will bring up the total to about 2,800,000 tons. To sum up, we remark that any reduction in manufactured iron can only be looked for as the result of a fall in price of coal and pig iron. Coal is being reduced in price, but this fall seems likely to be greatly affected by the restrictive action of the colliers. Pig-iron is low in stock, and there must be a very serious falling off in demand before stocks accumulate and prices decline. While apprehensive of the stimulus which high prices give to production, it is necessary to remember the restrictive influences which are arresting development in this country, and also the extraordinary increase in demand which the experience of the last few years has revealed.—*Liverpool Albion.*

The New Railroad Law of Illinois.

The Illinois Board of Railroad and Warehouse Commissioners have published a circular giving their construction of the new railroad law of that State. They say:

Some important questions having arisen under the act of May 2, to prevent extortion and unjust discrimination, we deem it proper to make known to the public our construction of certain portions of the act. We would first direct attention to the first section, which declares that if any railroad corporation doing business in this State shall charge or receive more than a fair and reasonable rate of toll or compensation for the transportation of passengers or freight, the same shall be deemed guility of extortion, and upon conviction be punished by specific penalties. The avowed object of the statute is to prevent extortion as well as unjust discrimination. In making their rates of charges conform to the requirements of the third section, defining what would be prima facie evidence of unjust discrimination, the railroad companies must not ignore the first section, forbidding extortion. In our judgment the rates of charges prior to this date have been in the main unreasonably high, and any increase thereof would be a clear violation of the law. After due consideration we have arrived at the following conclusions:

1. The provisions of the act are applicable as well to through as to local freights, so far at least as to require that less should be charged for the transportation of domestic or local freights from one point to another within this State, than the sum charged for the transportation of through or foreign freights the same distance within the State, and for its transportation from or to a point without the State. Thus: The charges from a point west of the State to a point within the State, must not be the same as or less than the charges from the west line of the State over the same road to the same point of destination. So the charges from a point within the State must not be the same as or less than the charges from the same point of departure over the same road to the east line of the State.

So also, the charges from a point west of the State to a point east of the State must not be the same as or less than the charges over the same road from the west line of the State. The general principal is, that the charges for any distance within this State must not be the same or greater than the charges for a greater distance.

2. A reasonably less rate may be charged per 100 pounds, per ton, or per car, where large amounts of freight are shipped by the same person, than where small shipments are made, without violating the act. Discriminations of this character as upon fair business principles were just and reasonable before the passage of the act, are now prohibited thereby, but seem to be recognized therein by the words "like quantity" frequently occurring in the third section of the act.

3. Where two or more railroads are owned and operated by different companies, and are connected so as to form, in fact, one continuous line, and either of such companies receives freight upon its road to be shipped to some point upon the other road, the same may be treated, for purposes of such shipment, as one entire line, and the same rate may be charged as if one company owned the road upon which the freight was shipped for the entire distance, instead of charging the aggregate of the local rates on each road for the distance shipped thereon.

4. The act expressly provides that nothing therein contained shall be so construed as to prevent railroads from issuing commutation, excursion, or thousand-mile tickets, as the same hitherto have been issued by such corporations.

A New Bergen Tunnel.

The Delaware, Lackawanna and Western Railroad Company have filed, in the office of the Secretary of State in Trenton, N. J., a map describing the route for their new tunnel under Bergen Hill, under the provisions of the general railroad act passed by the legislature last winter. The eastern entrance to the tunnel will be a few roads from the Ravine road, near the Jersey City and Hoboken boundary line. Thence the tunnel will extend in a straight line to near the mouth of the Erie tunnel on the west side of the hill, and the road then will traverse the Erie track at an elevation of thirty-five feet. From the opening the tunnel will extend 1,500 feet to Oakland avenue, whence there will be a cut of 1,200 feet to Bergen Wood avenue. The tunnel will then be continued 1,700 feet to the terminus. At the Hackensack River the company intend to build a new bridge near that of the Pennsylvania Railroad. An English firm, it is reported, have contracted for the entire work, agreeing to forfeit $100,000 if they do not complete it in eighteen months.

☞ At a recent meeting of the directors of the Columbus and Hocking Valley Railroad the officers of the company were instructed to proceed with the construction of the Monday Creek and Snow Fork branches. A semi-annual dividend of five per cent was declared, payable on the first day of August next.

☞ The earnings of the Erie Railway Company for the week ending July 7, 1873, were $344,516, and since November 1, 1872, $12,617,512—an increase over the corresponding period of the previous year of $385,260.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." *A dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, July 19, 1873.

Stock Exchange and Money Market.

There has been a very easy movement noted in the Money line since our last, with unusually liberal offerings of funds, seeking prompt and lucrative employment both at bank and through private channels; while the demand for accommodation, from all sources, has been comparatively moderate, the main inquiry having been from borrowers, for speculative use at the Gold and Stock Exchanges. The reduction of the Bank of England rate tended to make the price of aid in the local market, more favorable to the borrowing element. Call loans were quoted at from 3@5; and best discounts at 6@7 per cent per annum. Many lenders seemed eager to place their balances, in the form of time loans, extending through the Fall and early Winter months. The city banks, in their last weekly statement, made an encouraging exhibit. The most notable gain, in the line of reserves, was in that of the deposits The excess of Gold and Greenbacks over the line of 25 per cent to deposits and circulation is nearly the same as last week, and the present excess is about $4,000,009 larger than this time last year when the price of Money on call loan was the same. It is, therefore, reasonable to calculate that the prevailing ease in the loan and discount market will run into the early Fall. The Sub Treasury also added moderately to its reserves. The city banks last week reported an increase of over 6½ millions in their deposit line, over ⅛th of a million in their legal tender, and of about 1⅛th million in their specie reserves. They enlarged their loan and discount averages about 1¼ million and their circulation slightly.

The city banks receded slightly on their obligatory reserve, the last statement showing that they had $16,435,725 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, augmented its coin balance nearly half a million; and its currency reserve over half a million. Its currency reserves at the close of the week were $25,763,200; and its coin board, $39,791,958.

The clearances of the city banks averaged through the week 77⅛ millions a day, and amounted in the aggregate, for the whole week, to $462,657,569, as against $478,571,887 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $400,914 and its coin reserve $524,365 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $34,658,000, against $28,223,400 same time last year. The city bank deposits are now $238,916,900 against $245,508,000, week ending July 13, 1872. The legal tender reserve amounts to $48,329,900, against $53,440,700 same time last year. The circulation now stands at $27,291,800 against $27,466,400 same time last year. The loans are now $286,174,500 against $296,597,800 at this date last year.

The coin reserve of the city banks is now over 84⅝ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is 48⅜ millions against about 84⅞ millions April 5th, 1873, and 55⅛ millions on the statement of June 15th, 1872; and the deposits are now about 238⅞ millions, against 186⅞ on the 12th of April, 1873, and 247⅛ millions on the 20th of July 1872.

Under the official programme for July, Government proposes to sell, Gold, as follows: Thursday, July 24, $1,000,000; Thursday, July 31, $1,000,000.

The cash balances in the Treasury Department on Monday were as follows: Currency, $8,029,036; special deposit of legal tenders for the redemption of certificates of deposit, $33,190,000; coin, $80,828,246.

The U. S. Sub-Treasury office last week received $5,051,664 of currency, and $9,122,737 of gold, the latter including $2,252,918 from customs; and disbursed $4,650,750 of currency and $8,598,371 of gold, the latter embracing $3,063,402 of coin interest.

Government revenues have been on a moderate scale since our last. The excises yielded within the week about two millions, and for the fiscal year ending with June 30th, 1873, $115,067,728. The customs at the port of New York, for the week, were $2,252,918, and at the outports, about $750,000 more, in coin or coin certificates.

Under speculative manipulations of the new clique of operators for a rise, Gold has been ranging higher in price, with more than usual activity reported. The customs drain was on a more extensive scale, and the export movement heavier. The range of the price during the week has been from 115½@116⅛, and the quotation on Wednesday was 116 against 115⅝ on Wednesday of the preceding week. The specie outflow last week, was $3,624,589. The Gold Exchange Bank clearances have averaged about 56⅜ million per day during the week.

Wednesday's specie exports were $1,231,133.

The customs demand for Gold last week, averaged $375,486 a day. The arrivals of specie from Europe, Havana and other foreign ports last week were $20,187. and thus far in 1873 have been $1,932,198, against $2,732,839 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1 1873, has been $67,216,766 against $79,364,531 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $45,037,675, against $49,940,839 during the same time in 1872.

The export drain of specie was $3,624,589 last week, against $4,882,534 same week preceding year, The shipments since January 1, 1873, have been $30,997,318 against $44,627,771 during the same portion of 1872.

Foreign Exchange has been quoted higher, closing steady, on a moderately active demand for prime bills. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109¼; sight bills on London, at 110¼@110½. The week's exports of Domestic Produce have been to the currency value of $5,427,890.

Government securities have been quite freely purchased, and prices have been quoted firmer on reduced offerings of all issues. On Tuesday, the New York members of the "Syndicate" having in charge the negotiation of the new 5 per cent Government bonds reported that on the preceding day the Prussian Government bought in London $2,000,000 more. The amount reported as purchased before was $10,000,000, a part of which was made up of 6 per cent bonds. Thus the German Government has taken within a few weeks $12,000,000 one kind and another of United States securities.

U. S. sixes of 1881 closed on Wednesday of this week at 119¾@120; U. S. Five-Twenties of 1862 at 117⅛@117½; U. S. Five-Twenties of 1864 at 117½@117¾; U. S. Five-Twenties of 1865 118¾@119; U. S. Five-Twenties of 1865 consolidated 117¾@118; U. S. Five-Twenties of 1867, 118¾@119; U. S. Five-Twenties of 1868, 118¾@118½; U. S. Ten-forties at 114¾@115; U. S. Fives of 1881 (Funding Loan) 115@115⅝; Six per cent. currency Sixes from 114½@114¾.

Government bought in on Wednesday $207,850 Five-Twenties from 115 49@115 87, out of an aggregate offering of only $323,150.

The Railway and Miscellaneous share speculation has been quite active on a generally stronger range as to price, though the later dealings indicated much irregularity as to values, on the street favorites.

State bonds have been in good demand and quoted firmer.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 1.	July 9.	July 16
Consols	92¼	92⅞	92⅝
U. S. 5-20s, 1865	93	93½	93¾
" 1867	92¾	93⅛	93¼
" 10-40s	89⅜	90⅛	90¾
New Fives of 1881	90	90¾	*89⅞
Erie	49	48⅞	46½
Ill. Central	..	....	*82

* Ex interest.

There has been a much better inquiry noted for the favorites of the Railway Mortgage Bond Loans at firm and buoyant prices. Central Pacific Sixes have been in much better request at from 100⅜@100½ ex the July three per cent coupon. The Chesapeake and Ohio Seven per cent gold bonds have been selling freely at 90, and interest. Chesapeake and Ohio Sixes have been in good demand at 88½ and interest. Western Pacific Sixes sold at 92¼@92½, ex the July coupon of three per cent. The Northern Pacific 7-30 Loan has been of ready sale, to investment buyers, at par and interest.

General business has shown rather more animation. The Metal trade is reviving gradually. Copper has been in very limited demand, and quoted at 27½c.@28c. for Lake, showing less firmness. There has been mere doing in Iron, but at irregular prices, with sales reported of 400 tons Scotch Pig, on private terms; 300 tons Glengarnock do. at $42@$43; 600 tons No. 1 American do. at $48; 200 tons No. 2 do. at $43@$44. We quote: Eglinton Pig at $42@$43; Glengarnock, at $43; No. 1 American Pig at $46@$48; No. 2 do. at $42@$46; Wrought Scrap at $46@$48; English rails at $65@$68, gold; American Rails at works, at $75@$80. Old Rails $50@52. Of Steel Rails, 4,000 tons have been disposed of on private terms. Pig Lead has been very quiet at 6½c@6⅝c., gold, for foreign. Spelter has been dull yet steady at 7½c.@7⅝c., gold; Pig-tin has been in moderate request, with Straits quoted at 31¾c.; English at 29½c.@29¾c., and Banca, at 36c., gold; sales have been reported of 100 slabs Straits at 31¾c.; 25 tons English at 29½c.@29¾c., gold. Tin Plates been quiet at former figures; 500 boxes Charcoal Terne sold at $10 50, gold; Charcoal Plates quoted here at $11 12½@$11 50; Charcoal Terne, $10@10 50; Coke, $9 25@$10; Coke Terne, $8 75@$9 gold, per box. Zinc inactive and nominal. Hardware is attracting more attention. Groceries are in more request and held with more confidence.

Domestic produce has been moving more freely. Cotton has been less firm; but for future delivery closed in favor of sellers. Breadstuffs and Provisions have been generally stronger in price. Middling upland Cotton left off tamely at 20¾c. per lb. The receipts at all the ports, since Sept. 1, have been 3,518,985 bales, against 2,662,993 bales same time in the preceding year; exports 2,559,162 bales against 1,912,663 bales in the previous year; stock at the ports at latest dates, 218,950 bales against 134,350 bales same date 1871.

Foreign goods have been rather more sought after. The Dry Goods trade has shown more animation. The week's imports of foreign goods and merchandise amounted to $9,432,296 including $1,840,138 of dry goods.

Ocean freights have been moderately active with rates on Grain, Naval Stores, Tobacco, and and Petroleum room and tonnage closing in favor of shipowners.

At the Live Stock Markets, Beeves have been in more demand at from 8@13 cts. Veals at 3@9½ cts.; Sheep at from 4½@6 cts.; Spring Lambs, 7@12½ cts.; Swine at 5¼@5¾ cts. per lb., all live weight. The week's receipts were 9,412 Beeves, 3,722 Veal Calves, 22,318 Sheep and Lambs, and 38,996 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Jacksonville, Pensacola and Mobile Railroad, for a long time in embarrassed circumstance, was to have been sold July 7th by U. S. Marshall under a decree in of favor 1st mortgage bondholders. Just previous to time of sale, an association of gentlemen purchased the decree from the bondholders and organized anew as follows: Col. D. P. Holland, Pres't, Tallahassee; D. G. Ambler, Vice Pres't, Jacksonville; J. G. Gibbe, Gen'l Manager, Tallahassee; E. W. Demy, Treasurer, Jacksonville; F. B. Popy, Sup't, Tallahassee; Jas. L. Taylor, Gen'l Freight and Ticket Agent, Tallahassee.

☞ At an adjourned meeting of the Directors of the Erie Railway Company, held on the 16th inst, the following officers were elected for the ensuing year: P. H. Watson, President; George H. Blanchard, second Vice-President; James C. Clark, third Vice-President; H. Tyson, fourth Vice-President; A. R. McDonough, Secretary. Executive Committee—S. L. M. Barlow, W. B. Duncan, Edwin D. Morgan and Frederick Schuchardt. Finance Committee—Samuel D. Babcock, Adrian Iselin, H. R. Baltzer and George H. Brown. On motion of President Watson, the first Vice-Presidency of the Board was left vacant for the present.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending July 5, at 344,185 tons, and for the coal year 9,094,740 tons, against 8,986,007 tons to corresponding time last year, being an increase of 108,733 tons. The bituminous tonnage for the week is 58,944 tons, and for the year 1,176,094 tons, giving a total of all kinds for the week of 403,129 tons, and for the year of 10,270,884 tons, against 10,008,109 to same time last year, being an increase of 262,725 tons.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending June 30, are: freight, $60,581 01; passengers, $33,576 17—total, $94,157 18.

☞ The earcings of the Baltimore and Ohio Railroad and branches in June, 1873, were $1,323,797 47, showing an increase, as compared with June, 1872, of $111,855 65.

☞ The earnings of the Burlington, Cedar Rapids and Minnesota Railroad in June, 1873 were $96,696 04, against $74,242 48 in June, 1872—an increase of $22,453 56.

☞ The coal tonnage of the Columbus and Hocking Valley Railroad during the month of June was 53,712 tons; total earnings of company for same time, $75,510 09.

Knoblauch & Lichtenstein,

No. 37 Broad-st., New York.

OFFER FOR SALE

$200,000

7 Per Cent. First Mortgage Bonds,

30 YEARS TO RUN,

OF THE

CENTRAL R. R. EXTENSION COMPANY

OF LONG ISLAND,

At 90 and Accrued Interest in Currency

The road runs from Farmingdale, the present terminus of the Central Railroad, to Babylon on the South Shore of the Island. According to contract, the road will be finished by July 15th, ready for this summer's travel.

These Bonds being a *home security*, and among the best ever offered in this market, we take special pleasure in recommending them.

Pamphlets or further particulars will be promptly furnished on application.

Central Railroad of New Jersey.

Mr. John Taylor Johnston, President of the Central Railroad Company of New Jersey, has issued the following notice to the stockholders:

It has been deemed desirable to consolidate the stock of the Newark and New York, the Perth Amboy and Elizabeth and the High Bridge Railroads with the stock of the Central Railroad Company of New Jersey. The above are all branches of the main road, and the stock is entirely the property of the Central, and included among its assets. By the provisions of the charter the assent of three quarters in interest of the stockholders is required before this consolidation can be made, and though the transportation is formal, this provision has to be complied with. This assent has been already given to the purchase of the Newark and New York branch, but as it was not immediately acted on, it has been deemed safer to have the authority renewed. Stockholders are requested to sign their assent.

☞ The work of grading and preparing the road bed of the new railroad from New York to Philadelphia via Keyport, Farmingdale, New Lisbon, Medford, Marlton and Kaighn's Point, Camden, is progressing with considerable rapidity. Large forces of men are operating at different points along the route. It is estimated that the distance from Camden to New York by this road is only eighty-six miles, twenty of which will be by steamboat. This road will run almost its entire length through a good agricultural stretch of country and afford market facilities which the people have long needed.

☞ The directors of the North and South Jersey Railroad Company have elected Randall E. Morgan, of Camden, president; William Bell, of Perth Amboy, first vice-president; George H. Vanderbeck, of Allentown, second vice president; Dr. H. H. Longstreet, of Bordentown, treasurer; Samuel H. Robbins, of Allentown, secretary; Robert S. Van Rensselaer, of Bordentown, engineer-in-chief; N. McConnaughty, of Somerville division engineer. The chief engineer was ordered to proceed with the surveys at once.

☞ Banking House of Fisk & Hatch,

No. 5 Nassau-St., New York, July 18, 1873.

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds—

THE CHESAPEAKE AND OHIO SEVEN PER CENT. GOLD BONDS; principal and interest payable in gold in New York; interest payable Jan. 1 and July 1; coupon or registered. Price **90** and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD, IS A GREAT EAST AND WEST TRUNK LINE, 420 miles in length, extending from Atlantic tide-water at Richmond to Huntington, the most favorable point of railroad connection with the Ohio River, and developing the richest IRON, COAL, AND TIMBER regions in the United States.

IT IS COMPLETED AND DOING A LARGE, PROFITABLE, AND RAPIDLY INCREASING BUSINESS.

ITS FREIGHT TRAFFIC, PASSENGER TRAVEL AND EARNINGS during the current year will be much larger than has heretofore been anticipated, and they are developing with a rapidity which shows the Chesapeake and Ohio to be one of the most valuable and successful railroads in the country.

These facts, together with the SUBSTANTIAL AND ENDURING CHARACTER OF THE ROAD ITSELF, ITS ADVANTAGES FOR ECONOMICAL AND PROFITABLE OPERATION, AND THE UNQUESTIONABLE SECURITY OF THE BONDS OF THE COMPANY, enable us to recommend them with the utmost confidence.

Pamphlets, containing full information concerning the Road and the country it traverses, will be furnished upon application.

We continue to deal in Government Securities, CENTRAL PACIFIC, WESTERN PACIFIC, AND CHESAPEAKE AND OHIO SIX PER CENT. BONDS, buy and sell Stocks and Bonds at the Stock Exchange on Commission, for cash, make Collections, receive Deposits, on which we allow interest at the rate of 4 per cent., and do a general banking business.

FISK & HATCH.

Poor's Manual.

The sixth series of the Manual of the Railroads of the United States, edited by H. V. Poor, has just been issued. It is a large book of 750 pages, and contains complete and reliable reports of all the Railroads of the United States for the last fiscal year.

From the introduction, we learn that there were 67,104 miles of Railroad in the country on the 1st of January, 1873—which is somewhat less than the mileage as given in the Journal. Of these, 6,427 miles were opened during the year. A tabular statement gives the operations of 425 different Railroads, aggregating 57,323 miles. The Manual is the most complete work of the kind ever issued. It is published by H. V. & H. W. Poor, 68 Broadway, price $5.00.

☞ At a meeting of the directors of the Indianapolis, Cincinnati and Lafayette Railroad, at Indianapolis, on the 10th inst., it was voted to accept the transfer of the railroad from the receiver, pursuant to order of the U. S. Circuit Court. M. E. Ingalls was elected president.

Journal of Railroad Law.

RAILROAD COMPANIES—WHEN THEIR RESPONSIBILITY FOR CARRIAGE OF BAGGAGE CEASES.

The late case of Dininny *vs.* The New York and New Haven Railroad Company, (49 N. Y., 546), was an action brought against defendant as a common carrier to recover for the loss of the contents of a trunk.

The opinion of the court was delivered by—

PECKHAM, J.—The Supreme Court reversed the judgment entered upon the report of the referee, and granted a new trial? but as it is not stated to have been reversed upon a question of fact, it is deemed to have been exclusively upon questions of law. The referee found, upon evidence, that "the plaintiff caused the demand to be made for said trunk, and contents within a reasonable time, and made reasonable efforts, and within a reasonable time, to demand and procure the trunk and contents; and that the defendant refused and neglected to deliver the contents of said trunk.

This finding, so stated, includes the finding that there was no delivery at all of the trunk and contents to the plaintiff; that what occurred at the depot some time after eight o'clock in the even ing when the plaintiff's son went there with a wagon for the trunk, was no delivery. Under these findings the defendant still held the trunk as a common carrier. The responsibility of a common carrier, as to baggage continues until the owner has a reasonable time and opportunity to receive and take it away.

It is found in the case at bar that the plaintiff did not have such time and opportunity. This was by reason of the absence of the defendant's agent from the depot.

For fifteen minutes plaintiff's wife waited after the arrival of the cars and looked for this baggage. It seems the baggage-master had quietly and quickly put it in the depot room, and left the place for his dwelling, some quarter of a mile distant. It is no answer, it is idle to say she could not have carried home the trunk if she had found it. True; but, she could have and would have made an arrangement on that subject, and, it is presumed, would have fulfilled it and taken home the trunk that night, and thus prevented the loss.

That was the first and a plain neglect by the defendant. In proper season immediately after tea, and at eight o'clock, the trunk is sent for; and at this time a wagon and horse are procured. Again the man in charge is absent, and, before the plaintiff's son could get him there the horse and wagon-man get impatient and leave. This is the second and plain neglect of the defendant. It plainly appears by the evidence that it was difficult on that day to get a wagon to transport baggage, and difficult to detain one unnecessarily. The defendant was bound to be there at the depot a proper and reasonable time at first for the delivery of that baggage. Not being so there, the baggage was locked up at defendant's peril. When plaintiff again, in a reasonable time, called for it, the master's negligent absence again prevented its delivery. The taking off of the check, &c., from the trunk, and its partial delivery to the plaintiff's son, under the impression by him, that the horse and wagon were still there, was not a delivery. The departure of the horse, &c., occurred, be it marked, by reason of the neglect of the master to be there at the depot. The referee has found, necessarily, that the failure to await the return of the son who had gone in pursuit of the baggage-master was not unreasonable, under the circumstances; and, as the son testified, it was agreed by them, at the master's suggestion, that another could not be procured that night. Thus it plainly follows that the entire failure to remove the trunk that night was caused by defendant's negligence. In such case, the defendant's liability as a common carrier is not discharged.

Suppose the plaintiff, with a horse and wagon, had gone to the depot at eight in the evening, and waited with two men for two hours, while a third man was vainly hunting the baggage-master, and then, hearing nothing of him, had gone home; but the master arrived within ten minutes thereafter, when no team could be obtained, that night, yet the man supposing the wagon still there had a partial taking of the baggage, as here, would it be contended there was any delivery.

The precise length of time a party shall wait for finding the master is not and cannot well be settled as matter of law. It is found here, as matter of fact that the waiting was reasonably long; and no error in law was committed thereby.

The order of the Supreme Court should be reversed, and judgment absolute ordered for the plaintiff upon the finding of the referee.

Order reversed and judgment accordingly.

Erie Railway.

At a meeting of the directors of this company, held on the 8th inst., the following report was submitted:

GENERAL OFFICE OF THE ERIE RAILWAY COMPANY, NEW YORK, July 8, 1873.

To the Stockholders of the Erie Railway Company:

The general law of this State requires that a report shall be annually made for the year ending September 30, but the recent change in the time for the holding of the elections of this company from October to July would seem to make it proper that a partial report of the operations of the company to this time should now be presented; but this report is, from necessity, far from complete, even for the current six months, as the returns are not yet all in for the month of May last. In the course of the next few weeks a complete report of all operations to the 1st of July can be made, and it is intended that such a report shall then be made as will show, with precision, the actual condition of this company's affairs for the past six months.

The earnings of this company have continued steadily to increase. For the past half year they have largely exceeded those of any similar period since the completion of the road. The reforms begun in the management of the company's business have diminished the relative expenses in almost every department, and these expenses will be still more largely diminished as the reforms in progress are developed; and when the present plans for a double track and narrow gauge upon the whole line shall be carried into effect there is no reason why the cost of operating this road, in comparison with its gross earnings, should not be as low as upon any of the other great trunk lines.

We are rapidly increasing our facilities for business. We have put in this season, already, twenty miles of sidings, and laid ten miles of second track, and we have increased our coal, postal and other cars. We are preparing to reduce the heaviest grades upon the line; and, when this is done, taken in connection with the cheapness of fuel—in respect of which the Erie Company possesses very decided advantages over any of its rivals for business in this State—this company will be able to overcome the disadvantages under which it has suffered in the past, in comparison with other lines originally possessing better gradients or greater control of local traffic. These advantages, now beginning to be realized, will increase in the future; and the day is not far distant when our proximity to and connection with the anthracite and bituminous coal fields of Pennsylvania and Ohio will far more than counterbalance the advantages heretofore possessed by other lines.

The funded debt of the road has been increased during the year by the addition of ten millions of convertible bonds, of which eight millions have already been sold at par, in currency. The remaining two millions will probably be placed at the same rate as soon as they will be needed for our new construction and equipment, now in progress. Assuming all these bonds to be negotiated, the funded debt of the company will then be as follows:

Reported July 1, 1872	$30,040,140
Convertible bonds	10,000,000
Total	$40,040,140

The stock capital of the company is unchanged, as reported July, 1872, viz:

Common stock	$78,000,000
Preferred stock	8,536,910
Total	$86,536,910

The floating debt of the company as reported July 1, 1872, was $6,463,668 20.

The present floating debt is nearly $1,700,000, or equivalent to one month's current receipts, showing a reduction since last July of $4,750,000 and upwards.

The grading for the double track is rapidly progressing. Upwards of forty miles will be ready for the rails in August, and during the Autumn a further portion of eighty miles will be completed, making in all 120 miles to be constructed this season.

During the present season we expect to change the existing gauge of the road from Attica to Painted Post, a distance of one hundred miles, and to lay a third rail from Attica to Buffalo and from Painted Post to Waverly, the third rail on the latter being already nearly complete. This will give us a narrow gauge connection with Philadelphia and the anthracite coal fields. As rapidly as is consistent with an economical change of our present motive power and rolling stock, it is proposed to narrow the gauge of the whole of the main line and branches.

Not only is this change demanded for the purpose of reducing working expenses, but because we cannot, so long as our gauge is not in conformity with that of our Western, Eastern and Southern connections, secure a large amount of traffic now offered to us, if we could receive and transport it without breaking bulk. The motive power and rolling stock of the company is in a more efficient condition than at any previous period, as is shown by the increased service which it performs. But the imperative demands of our traffic will require, by the time the narrow gauge track is extended eastward to Waverly, the immediate addition of 2,000 narrow-gauge cars and 100 narrow-gauge locomotives, which we are now about to put under contract.

In the month of February last, in addition to the annual dividend of seven per centum on the preferred stock, a further dividend of one and three quarters per centum on the common stock was declared, and afterwards paid.

The accounts, based upon which this dividend was declared, have already been published, and have, in addition, been most carefully scrutinized by a committee of the Legislature. At the time of making this dividend sundry important items of account had to be estimated, because of the incompleteness of the returns and the backwardness of the bookkeeping; but in every instance, when these estimated items came to be corrected by the actual returns and the completion of the accounts, it was found we had underestimated the receipts,

overestimated expenses, and, therefore, underestimated the actual net earnings; and nothing has since occurred to show, or even to raise a doubt, that this dividend was not fully earned, or was not properly declared and paid. On the contrary, it is believed that the system then inaugurated, of carrying the cost, paid from earnings of all additions to the property and equipment of the road to capital account, taking care, in all cases, to make ample allowance for the necessary expenditures for a full and liberal reparation of the road its equipment and machinery in every department, and of then dividing the whole of the actual net earnings of the company among its stockholders for the time being, is a policy equally honest and wise, and to this policy of fairly dividing the actual earnings at short intervals, say semi annually among the whole body of stockholders the present Board is fully committed upon principle.

As before stated, a full report of all the affairs of the company, including its earnings for the first six months of the present calendar year, is necessarily deferred to about the end of August next. All of which is respectfully submitted. By order of the Board. PETER H. WATSON, President.

☞ The Schuylkill Navigation Company has declared a dividend of 60 cents per share on the preferred stock of the company, and 30 cents a share on the common stock. The dividends will be paid in scrip on and after July 15th, convertible into mortgage loans of the 6s of 1872 and 1897 on and after September 3d, 1873, in sums of one hundred dollars and upward.

☞ Wm. Shirley has been elected President, John W. Numsen Treasurer, and Edward D. McConkey Secretary of the Baltimore, Pimlico and Pikesville Railroad Company.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 28 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m26

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.
NEW YORK, June 23, 1873.

SAMUEL FOX & CO.'S
Bessemer Steel Rails.

RAILROAD SECURITIES NEGOTIATED

LANSDELL'S
Patent Steam Railroad Water Station.

DISPENSES WITH **Tanks, Tank Houses, Stationary Power,** AND **Attendance.**

CAN NOT **FREEZE** IN ANY **CLIMATE,** UNDER ANY **CIRCUMSTANCES.**

COSTS LESS Than One Half the Price of a FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

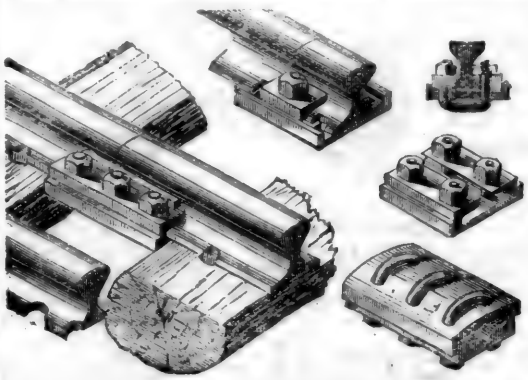
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

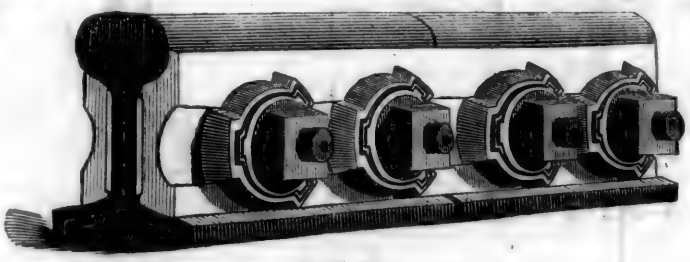
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York, Saturday, July 26, 1873.

Brooklyn Rapid Transit Company.

About two years ago a charter was obtained from the Legislature organizing the Brooklyn Rapid Transit Company, and defining the province of the same. One year ago the charter was altered and amended so that the company might have further privileges. Since that time the arrangements for carrying out the enterprise have been quietly progressing. The capital stock of the company, by the terms of the charter, is $5,000,000, with power to increase to $7,000,000. Of this stock $500,000 are already taken, and upon this $500,000 ten per cent—$50,000—has been paid in. The officers of the company are as follows: S. B. Chittenden, President; Mr. William R. Sheldon, Secretary; John T. Martin, Treasurer. The committee on organization consists of Messrs. Chittenden, Turner and Taylor, and the office of the company is in Montague street, in the Mercantile Library building. The incorporators of the company were Messrs. J. S. T. Stranahan, Alexander McCue, Edward W. Fiske, Demas Barnes, Thomas Sullivan, Jacob I. Bergen, John W. Prentice, John T. Martin, William Richardson, Samuel H. Many, Felix Campbell, Robert Turner and Archibald M. Bliss. The directors for, 1873 are S. B. Chittenden, John T. Martin, H. B. Claffin, Robert Turner, Robert S. Bassing, E. C. Litchfield, W. E. Dodge, J. R. Shippard, W. Newton Adams, Gilliam Schenck, Henry W. Sage, John Lefferts, J. N. Smith, W. H. Taylor and Ditmas Jewell. The surveys for the work are now being made, and have been in progress for some two weeks. It is believed they will be completed in a month or six weeks.

The object of this survey is to get an idea of the probable route, not to absolutely determine it, as well as to see where tunnels will need to be made and where bridges will have to be erected.

It is not at all certain what the route will be, but it is intended to begin at a point in Washington street near where the bridge will pour forth its living stream of travel, from thence to or near Boerum place, and up Schermerhorn street to the junction of Flatbush, Fourth and Atlantic avenues. From there it is contemplated to make two branches—one in the direction of East New York and another towards Coney Island, the latter probably via Butler street or some adjacent avenue. —*N. H. Herald.*

TO INVESTORS.

The Northern Pacific Railroad Company having determined to close its 7-30 First Mortgage Gold Loan and thereafter to pay no higher rate of interest than 6 per cent. on further issues of its bonds, THE LIMITED REMAINDER OF THE **7 3-10** LOAN IS NOW BEING DISPOSED OF through the usual agencies.

This affords a desirable opportunity to persons wishing to **reinvest July interest and dividends.**

The company now has more than 500 miles of its road built and in operation, including the entire Eastern Division connecting Lake Superior and the navigation of the Missouri river; the work of construction is progressing satisfactorily; the Company has earned title to nearly ten million acres of its land grant, and sales of lands have thus far averaged $5 66 per acre.

All marketable securities are received in exchange for Northern Pacifics.

JAY COOKE & CO.

No. 20 Wall Street, New York.

☞ Business on the Milwaukee and Northern Railway is increasing at a very rapid rate since the extension of the line to Green Bay.

Philadelphia and Reading Railroad.

The Pottsville *Miners' Journal* says that this company have opened a new branch of their road between Philadelphia and Chester, by which an improved connection is made with the Philadelphia and Baltimore Railroad, and a direct communication opened up with all points on its line, as well as with Washington and the South. The facilities for southward travel, offered by this direct route to the south, will no doubt be appreciated and taken advantage of by the traveling public of Norristown, Phœnixville, Pottstown, Reading, Pottsville, Lebanon, Harrisburg, Allentown, Williamsport, and other towns upon the line of the Philadelphia and Reading Railroad. The land along the new branch is admirably adapted and abounds in excellent locations for manufacturing establishments and will doubtless be rapidly appropriated to this purpose, being now made easily accessible from the great coal and iron producing districts of the Lehigh and Schuylkill Valley.

The Mineral Springs of Virginia.

WHERE THEY ARE AND HOW TO REACH THEM.

The central or mountainous part of the territory which used to be known as the State of Virginia, and which is now divided into Virginia and West Virginia, abounds in mineral springs, scenery, and objects of interest; and that part of the country is destined to become more than ever before a favorite point of resort for tourists and invalids. Hitherto access has not been of the most modern description; although in former times, before the war, many Southern and Western families were wont to ascend the Mississippi and Ohio to the head of navigation at the Falls of Kanawha and then take their private carriage or stages over the Gauley Mountain to the celebrated White Sulphur and other famous medicinal springs in Greenbrier, Bath, and Rockbridge Counties. The opening of the Chesapeake and Ohio Railroad now affords direct and comfortable access to this romantic district. Express trains, with palace cars, are now running connecting both the Eastern cities via Washington, and Western cities via Cincinnati, with the various springs. Most of the Virginia hotels have been enlarging their capacity and otherwise adding to the attrac-

tions of their Summer haunts. The air of the mountains is bracing, the scenery is wild, and at points is said to excel anything to be found elsewhere between the Hudson and the Rocky Mountains for sublimity and grandeur. The canon of New River through which the railroad trains now pass continuously, is a wonder in its way, rivaled only by the canon of the Colorado of the West. Communication with New York is maintained by continuous rail, and by the Old Dominion line of steamships to Norfolk or Richmond, thence by rail. The following gives a list of the principal Virginia springs and hotels in the upland region, with the manner and cost of reaching them:

Names of Springs, &c.	Nearest Railroad Stations.	Capacity of Accommodation.	Railroad Fare, Excursion.	Steamer, Room and Meals Exc. Fares.
Augusta or Stribblings	Staunton	500	$25 65	$27 10

Analysis of Anthracite Coal.

Mr. William Kenkrick, Mining Superintendent of the Philadelphia Coal and Iron Company, has sent to Dr. John C. Cresson, No. 417 Walnut street, Philadelphia, for analysis, a specimen of anthracite coal from the Mammoth Vein, Indian Ridge Colliery, Shenandoah; a specimen from the same vein at Bast's Colliery, Big Mine Run, near Ashland; and a speciemen of red ash coal from the Diamond vein at Forrestville. The result of the analysis of the properties of one of the Mammoth vein specimens will be sent to the Russian Government, while that of the other and of the red ash will be sent to France.

The object is to see if the coal can be used as fuel by the locomotive engines of the railways of those countries.

The Philadelphia and Reading Railroad Company has used anthracite coal for fuel in its passenger engines for more than fifteen years, and in its freight engines for even a longer period of time, and it has been found both effective and economical. This fact proves conclusively that anthracite coal is admirably adapted for fuel purposes on railways.

☞ Articles of consolidation between the Chicago and Atlantic Railway Company party of the first part, and the Chicago and Atlantic Extension Railroad Company party of second part, and the road now in process of construction known as the Baltimore, Pittsburgh and Connellsville Railroad, were filed on the 14th inst. in the office of the Secretary of State, at Indianapolis. The object of the consolidation is to form one continuous line from Pittsburgh to Chicago. The capital stock of said consolidation is fixed at four millions of dollars.

Cincinnati, Hamilton and Dayton Railroad.

The income of this company for the fiscal year ending March 31, 1873, was as follows:

From passengers		$337,891 35
" freight		590,160 65
" mails		9,485 56
" express		16,285 09
" rents from other companies		197,488 84
" rents from real estate		8,341 00
" mileage of cars		26,577 10
" interest		16,441 60
" miscellaneous		2,194 88
		$1,204,865 57
Expenses, viz:		
Wood, coal and oil	$110,005 10	
Shops and engine houses	11,197 21	
Maintenance of way	169,557 39	
Bridges	13,010 50	
Locomotive power	86,857 37	
Passenger train expenses	58,042 23	
Freight train expenses	67,807 63	
Other train expenses	13,725 81	
Station expenses	93,547 49	
Office expenses	44,024 51	
Miscellaneous expenses	42,218 08	
		709,492 82
Leaving a balance of		$495,372 75
From which deduct—		
Dividends, October, 1872, and April, 1873, four per cent each	$280,000 00	
Interest on bonds	144,990 00	
Taxes	48,877 75	
		473,867 75
Leaving a surplus for the year of		$21,505 00
Add sundry profit and loss		24,416 34
Add balance from previous year		705,200 57
Total		$751,121 91
Deduct loss in operating Dayton and Michigan Railroad	$54,063 86	
Amount on account steel rails	27,407 90	
		81,471 26
Total as in Balance Sheet		$669,650 65

The operating expenses have been 58.89 per cent of gross earnings. Number of passengers carried, 750,687. Number of tons of freight moved, 564,542. Number of miles run by trains earning revenue, 549,574. Earnings per mile of do., $2 19.24; expenses, $1 29. Income per mile of road, $20,081 09; expenses, $11,824 88.

The President in his report says:

During the past year, two dividends of four per cent each have been paid to the stockholders. The net earnings show a fraction over 8½ per cent on the capital stock. The regular business of our several roads was seriously interfered with by the breaking out of the horse disease in Cincinnati early in November, causing a complete stagnation of business for some three or four weeks: freights consigned to parties in this city blockaded our depots, and we were forced to refuse freights from stations on our own roads, as well as from connecting roads for Cincinnati. After leaving this city it visited Hamilton, Dayton, Toledo, and spread throughout the North and West, and seriously interfered with the business of the company. This and the severe winter following have materially reduced the current earnings, while, at the same time, these causes have added considerably to our operating expenses.

The large number of trains now running daily between Cincinnati and Hamilton, requires, for the more economical and safe working of this section of the road, the extension of the double track from Carthage to the latter named point, which should be built this season, and that this entire track between Cincinnati and Hamilton should be laid with steel. It is necessary, therefore, that the proper provision should be made to meet this expenditure. The managers of the Atlantic and Great Western and Erie Companies having given assurance that the tracks of their roads would, during the present summer, be changed from the six foot to the compromise, four feet nine inch gauge; we have refrained from ordering any steel rails for the Cincinnati, Hamilton and Dayton road this season; when this contemplated change is made, we will have on hand some eight thousand tons of iron now used for the accommodation of the broad gauge business, which, with a small additional cost, would enable us to re-lay our main track between Cincinnati and Dayton with the best quality of steel rails.

We have now in our track some 22¼ miles steel, and 2 miles steel capped rails, some seven hundred and fifty-one tons steel, having been laid during the past season, at a cost of $88,367 20 the difference in cost between steel and iron having been charged to surplus earnings, and in addition thereto seven hundred and thirty-one tons of re-rolled iron, at a cost of $26,390 41 have been laid; the credits from old rails reducing the actual cost to $74,787 10.

In the judgment of your board of directors, considering the heavy traffic passing over our road, it seems to be a useless expenditure of money to continue the laying of iron rails, and no time should be lost in re-laying the entire tracks of this company with steel between Cincinnati and Dayton, and the means to accomplish this object should be provided without unnecessary delay.

In order to secure future dividends, from the low rates of passengers and freights now prevailing, an additional volume of business must be moved, and freight trains run at a much reduced rate of speed to accomplish this object, with safety, and economy; double tracks laid with the best quality steel rails should be adopted, and the saving from such a course would in a few years not only pay the present expenditure but go far towards meeting the bonded debt of the company as the same becomes due.

There has been laid in the track of the Dayton and Michigan Railroad during the year, 1,572½ tons of re-rolled iron at the cost of $122,763 25, and there will have to be used in this track this season some 2,000 tons of rails to make good the destruction of iron during the past winter.

The Cincinnati, Richmond and Chicago Railroad was furnished with 283 tons re-rolled iron at the cost of $10,186 71; this road will require about the same amount this year.

There have been built at the company's shops at Lima the past year, 137 cars, as follows: for Cincinnati, Hamilton and Dayton Railroad 64 new box cars, at a cost of $46,809 20; for Cincinnati, Hamilton and Indianapolis Railroad 2 new cabooses, 50 new box and 21 new platform cars at a cost of $51,672 79. These shops are now occupied in completing the balance of the order for 200 cars for the latter company. At Cincinnati shops one first-class passenger coach has been built at a cost of $6,482 63, also one new engine at a cost of $9,458 10, both being charged to C. H. and D. running expenses; four new freight engines have been purchased and paid for at a cost of $51,000.

On the Cincinnati, Richmond and Chicago Road, bridges Nos. 1, 2, 7, 21 and 22 have been repaired; and the following re-built: Nos. 3, 97 feet, No. 5, 98 feet, No. 13, 37 feet, No. 14, 69 feet, No. 17, 46 feet, and No. 18, 41 feet, besides one abutment of No. 13 re-built, and large culvert near Camden Station.

On the Dayton and Michigan Road, bridges Nos. 2, 4, 8, 11, 14, 16, 17 and 18 have been repaired; Sidney, Poplar, Pushetа and Laramie creek trestles repaired; new corn house built at Troy and freight depot repaired and painted; pas-

senger depot at Piqua repaired; turn table at Sidney and freight depot and station house repaired; new water station at Weston; turn table and water houses at Perrysburg repaired.

On the Cincinnati, Hamilton and Dayton Road, bridge No. 8 (New river) had new arches put in; rebuilt overhead bridge near Cumminsville; repaired bridge No. 1 and put new floor on bridge on Sixth street; built a large crane at west end of freight depot requiring a large amount of masonry and other expensive work at a cost of $8,570 60; also coal elevator near Freeman street for coaling locomotives, at a cost of $4,346 86; rebuilt retaining wall between I. C. and L. and C. H. and D. from Carr street nearly to Freeman street, 247 feet in length, 18 feet high, and 7½ feet thick on bottom, at a cost of $3,426 60; painted roof of engine house Cincinnati at a cost of $977 21; also sewer on Hoadly street at a cost of $1,731 20, all of which have been charged to running expenses.

Your company now owns and controls 345 miles of railroad, distributed as follows: Cincinnati, Hamilton and Dayton 60 miles; Dayton and Michigan 142 miles; Cincinnati, Richmond and Chicago 45 miles; Cincinnati, Hamilton and Indianapolis 98 miles.

The equipment of the several roads are as follows:

	C. H. & D.	D. & M.	C. R. & C.	C. H. & I.	Tot.
Locomotives	33	23	5	19	80
Passenger coaches	30	15	1	9	55
Mail cars	2	1	1	....	4
Baggage cars	11	8	3	6	23
Caboose cars	12	12	1	5	30
Box cars	231	329	80	175	815
Stock cars	30	92	19	50	191
Platform cars	156	233	62	111	562
Hand cars	24	20	5	17	66

In addition to the above the C. H. and D. owns 50 box and 50 platform cars, now being used in the interest of the Saginaw and Cincinnati Lumber Transportation Company, and run between Cincinnati and Saginaw, Michigan.

When the 100 box cars now in course of construction at Lima for the C. H. and I. road are completed, we will have 1,668 freight cars of all kinds. Our equipment has been kept in good order, and new cars are substituted in place of those broken up.

Our machine shops at Cincinnati are entirely inadequate to the requirements of the company, the more so, since, the purchase of the Junction road, they having only a temporary frame shed at Indianapolis, we are compelled to do the repairs of the engines and cars of that company in our shops here. It will be necessary therefore to purchase more ground in this city, or move our shops to some convenient point on the line of the road where we can be furnished with a proper amount of ground necessary for shop purposes at a much less figure.

The Junction Railroad, a line extending from Hamilton to Indianapolis, having by a decree of the courts of Indiana and Ohio, been offered for sale on the 26th day of November, 1872, was, (in accordance with a resolution passed by the stockholders of this company at their last meeting, authorizing the Board of Directors to make the purchase of said road) purchased for this company for the nominal sum of one million dollars. The actual consideration was expressed in contracts made to facilitate the purchase with the holders of the mortgage bonds of the Junction Railroad Company. One hundred thousand dollars was required to be paid in cash and has been paid. The remainder of the purchase money was paid in a new issue of bonds, secured by a mortgage on the road, a new corporation having been organized under the laws of Indiana and Ohio, to which the title was transferred. The whole issue of these bonds is two million five hundred thousand dollars. By the terms of the contract with the holders of the old bonds, this company guaranteed the payment of principal and interest of the new bonds. Of these one million seven hundred and ninety thousand have been issued and applied in exchange for the outstanding bonds and overdue coupons of the former company. The remainder are applicable to the repair and equipment of the road. The actual cost to this company of ninety-eight miles of road, with rolling stock, real estate, &c., was one million eight hundred and ninety thousand dollars. The conditions of the sale having been approved by the courts, the possession of the Junction Railroad was surrendered by the Receiver on the 1st day of December, 1872, and passed into the control of the new corporation organized on the 23d day of December, 1872, under the name of the Cincinnati, Hamilton and Indianapolis Railroad Company. The entire amount of the nominal capital stock in the corporation is the property of and remains unissued in the control of this company; and will represent the ultimate value of the road beyond its mortgage debt, less whatever advances may be required for the repair, equipment and improvement of the road. The remaining mortgage bonds seven hundred and ten thousand dollars, will be disposed of as soon as satisfactory prices can be obtained for them, and the proceeds used for the purpose of putting the road in good condition, large quantities of cross-ties, and ballast with some ten miles of iron are required for this purpose, beside an addition to the equipment of the road. Five first-class coal burning locomotives have already been purchased, and at this date delivered. One hundred and fifty box and fifty platform cars are being built at Lima; one hundred of these having been delivered. The bridge at Brownsville some 450 feet in length was destroyed by fire on the evening of the 24th December, 1872, and has been rebuilt. Timber has been ordered for the purpose of re building the long bridge over the Miami river at Hamilton. Considerable real estate has been purchased at Indianapolis, and some other lots have been examined for future purchase.

It is the desire and expectation of your managers to have this road in good running order for the coming fall and winter business; when this is accomplished there is scarcely a doubt but that it will at once become popular and remunerative.

The board of directors have reason to congratulate the stockholders upon the fidelity and diligence exhibited by the officers and employes of the company in the discharge of the duties of their respective position, for which the thanks of the board are due and are hereby tendered.

The income from operations of the Dayton and Michigan Railroad during the year was $1,034,567 10; and the operating expenses were $722,110 18, taxes $32,833 52, interest on bonds $211,496 93, dividend on preferred stock $88,274, and dividend on common stock $33,916 73—making a total of $1,088,630 46, and showing a loss of $54,063 36.

The income from operations of the Cincinnati, Richmond and Chicago Railroad was $229,634 94; and the operating expenses $158,661 23, taxes $1,000 93, and interest on bonds $43,279 38—total $203,841 54, and leaving for net earnings the sum of $25,793 40.

The gross income from operations of all the roads was $2,469,067 61; the operating expenses $1,590,264 23, taxes $83,612 20, interest on bonds $399,765 41, dividends D. & M. R. R., as above, $122,190 73—total $2,195,832 57—leaving a balance of $273,235 04.

There were expended for permanent improvements during the year $780,120 18, as follows: for real estate at Dayton and Brighton, $35,552; for right of way, $250; for 4 locomotives, 50 flat and 50 long box lumber cars, $121,000; for account Dayton and Michigan Railroad, $117,576 82; for depot grounds, East Toledo, $79,461 21; advanced on account of purchase of Cincinnati, Hamilton and Indianapolis Railroad, new equipment, and renewal of bridges, road, etc., $426,825 15.

Assistant Supt.—LEWIS WILLIAMS.

☞ The work of widening the New Jersey Railroad from Elizabeth to Rahway has been completed, and all is ready for the laying of the two more steel tracks, which are to be put down one on each side of the present tracks. The Elizabeth *Journal* says this double-tracking is to be eventually completed along the whole of the New Jersey road wherever the right of way can be procured. Negotiations have been going on for some time for the right of way for a similar widening of the road between Waverly and North Elizabeth.

☞ The Kellogg Bridge Company, of Buffalo, N. Y., is constructing for the Louisiana bridge, which is being built for the use of the Chicago and Alton Railroad Company, across the Mississippi at Louisiana, Mo., a pivot draw span, 442 feet long over all, making two clear openings of 200 feet; also one span of 252 feet, and one span of 222 feet from centre to centre of piers. It is expected that these will be completed by Nov. 1.

☞ The Central Railroad Company of New Jersey is rapidly pushing the work in the construction of third and fourth tracks. A large portion is laid between Elizabeth and Easton, only the connections being required to complete them ready for use. The new rails are of steel.

Railroads of the State of Pennsylvania.

A Tabular statement of the Railroads of the State, their Capital and Cost, Earnings and Expenses, Dividends, &c., for the fiscal year ended December 31, 1872.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, July 26, 1873.

Stock Exchange and Money Market.

The Money movement has been in favor of borrowers as a rule, though no marked changes in rates have been noted, since our last; call loans having been quoted generally at from 2@5, mainly at 3@4; and choice to good mercantile credits at from 6@8 per cent per annum. The offerings on both bank and private account have been very liberal, and lenders have been even more accommodating in their views. The renewed activity at the Stock and Gold Exchanges has tended to stimulate the speculative demand; but the wants of responsible borrowers have been quite promptly provided for at the ruling quotations. The heavy specie exports diminished the coin reserves of the city banks; while the deposit and legal tender averages were enlarged. The percentage of reserve to liabilities held by the national banks is 30.87, and by the state banks, which are under no restrictions as to reserve, 26.62, making the average of both classes, 30 34 per cent. The U. S. Sub-Treasury at this point augmented both its currency and specie reserves, during the week. The reports from trade circles are of a more encouraging movement in the Dry Goods line. The domestic jobbing houses are better employed, and there is no great excess of foreign goods coming in to discourage the Importers. Of course a good many of the latter complain of inadequate profits and make frequent references to the poor trade in the Spring, but it is abundantly evident that the fine promises of the new or coming crops, and the large receipts to meet the export demand for the produce of last year's crops, have put a very cheerful look upon the prospects of trade. In turn, the same causes are helping the traffic of the railroads, and indirectly, financial confidence in Wall-street. The city banks last week reported an increase of over 1¼ millions in their deposit line, and over half of a million in their legal tender, with a decrease of about 2⅜th millions in their specie reserves. They enlarged their loan and discount averages nearly 1¾ millions and reduced their circulation slightly.

The city banks again receded slightly on their obligatory reserve, the last statement showing that they had $14,274,125 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, augmented its coin balance nearly half a million; and its currency reserve nearly 1½ millions. Its currency reserves at the close of the week were $27,238,653; and its coin hoard, $40,700,374.

The clearances of the city banks averaged through the week about 87⅞ millions a day, and amounted in the aggregate, for the whole week, to $527 666,746, as against $462,657,569 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $1,475,453 and its coin reserve $908,716 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $32,273,600, against $29,571,800 same time last year. The city bank deposits are now $240,206,400 against $247,551,300, week ending July 20, 1872. The legal tender reserve amounts to $48,872,500, against $52,895,600 same time last year. The circulation now stands at $27,281,500 against $27,376 000 same time last year. The loans are now $289,878 100 against $297,214,500 at this date last year.

The coin reserve of the city banks is now a little over 32¼ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is 48⅞ millions against about 34⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 240¼ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

Under the official programme for July, Government proposes to sell Gold, as follows: Thursday, July, 31, $1,000,000.

The cash balances in the Treasury Department on Tuesday were as follows: Currency, $8,090,529; special deposit of legal tenders for the redemption of certificates of deposit, $33,995,000; coin, $78,939,813; including coin certificates, $43,268,200; outstanding legal tenders, $356,000,000.

Government revenues have been on a rather more liberal scale, since our last. The excises yielded within the week about two millions, and thus far in the current fiscal year commencing with July 1, 1873, $5,774,064. The customs at the port of New York, for the week, were $2,344,198, and at the outports, about $800,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $4,180,506 of currency, and $6,001,531 of gold, the latter including $2,473,000 from customs; and disbursed $2,705,052 of currency and $5,092 815 of gold, the latter embracing $1,243,849 of coin interest.

There has been quite a spirited speculative movement noted in Gold, since our last, the operators for higher rates having evinced decidedly more determination and confidence though the actual dealings have not been very extensive. The customs drain has been on an enlarged scale, while the export movement has been quite heavy, said to have been in good part, on speculative account. The range of the price during the week has been from 115¾@116⅜, and the quotation on Wednesday was 115⅞ against 116 on Wednesday of the preceding week. The specie outflow last week, was $4 944 534. The Gold Exchange Bank clearances have averaged about 36⅛ millions per day during the week.

The specie exports on Wednesday were $337,575.

The customs demand for Gold last week, averaged $412,170 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $1,932,198, against $2,732,839 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $69,692,400 against $81,311,255 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $46,281 524, against $51,829,645 during the same time in 1872.

The export drain of specie was $4,944,534 last week, against $4,641,026 same week preceding year. The shipments since January 1, 1873, have been $36,569,889 against $48 254,281 during the same portion of 1872.

Foreign Exchange has been in better supply and quoted cheaper, on a less active inquiry. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109⅜; sight bills on London, at 110@110¼. The week's exports of Domestic Produce have been to the currency value of $6,529,662.

Government securities have been quite confidently dealt in, in good part by purchaser, for investment account at higher prices, closing buoyantly. Most of the favorite issues have been in limited supply, in the open market.

U. S. sixes of 1881 closed on Wednesday of this week at 120@120¼; U. S. Five-Twenties of 1862, 117@117¼; U. S. Five-Twenties of 1864 at 117¾@118; U. S. Five-Twenties of 1865 119⅛@119⅜; U. S. Five-Twenties of 1865 consolidated 118@118⅛; U. S. Five-Twenties of 1867, 119@119¼; U. S. Five-Twenties of 1868, 118⅛@118¾; U. S. Ten-forties at 115⅛@115¾; U. S. Fives of 1881 (Funding Loan) 115¾@116; Six per cent. currency Sixes from 114⅜@114⅝.

In the Railway and Miscellaneous share speculation the dealings have shown much more activity, with values quoted much stronger, though fluctuating widely, especially on Erie Shares, which have been very freely dealt in, the operators for a higher range of prices having had the advantage, very decidedly.

State bonds have been rather stronger in price, on a fairly active inquiry for the favorite loans, chiefly on investment account.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 9.	July 16.	July 23.
Consols	92⅞	92⅝	92¾
U. S. 5-20s, 1865	93½	93¾	93⅞
" 1867	93⅛	93¼	93¾
" 10-40s	90⅛	90¾	91
New Fives of 1881	90¾	*89⅞	90¼
Erie	48⅞	46½	46⅞
Ill. Central	....	*82	83

* Ex interest.

Railway Mortgage Loans of the more substantial character have been in very good request at generally firm and buoyant prices. Central Pacific Sixes have been in good demand at from 100½@100¾ ex the July three per cent coupon. The Chesapeake and Ohio Seven per cent gold bonds have been more inquired for at 90, and interest. Chesapeake and Ohio Sixes have been of ready sale at 88½ and interest. Western Pacific Sixes at 92¼@92½, ex the July coupon of three per cent. The Northern Pacific 7-30 Loan has been more actively sought after, by investment buyers, at par and interest.

General business has shown more life, though the dealings thus far have not been indicative of anything like a comprehensively active movement. Metals have been in moderate supply. Copper has been depressed and lower, with sales reported of 75,000 lbs. at 26½c.@26¾c. per lb. Pig iron has been held with more firmness, though on a rather moderate demand, with sales reported of 30 tons Gartsherrie at $50; 75 tons Coltness at $51 50; 50 tons Eglinton, in lots, at $47, with full parcels quoted at $44@$45, and Glengarnock at $45@$46, here, and $43 to arrive; and 650 tons American on private terms. Other kinds of Iron quiet. We now quote: Eglinton Pig at $44@$45; Glengarnock, at $45@$46; No. 1 American Pig at $45@$48; No. 2 do. at $41@$45; Wrought Scrap at $46@$48; English rails at $65@$68, gold; American Rails, at works, at $75@$80. Old Rails $50@52. Pig Lead has been quiet since our last with foreign quoted at 6⅝c., gold, for ordinary. Spelter has been dull at 7½c.@7⅝c., gold. Pig tin has been inactive with sales reported of only 5 tons English, to arrive, at 29c., gold.; Straits quoted at 31½c.@31¾c.; English at 29½c., and Banca, at 35c., gold. Tin Plates slow of sale; Charcoal Plates quoted here at $11 12½@$11 50; Charcoal Terne, $9 75@10 50; Coke, $8 75@$9 25; Coke Terne, $7 75@$9, gold, per box. Zinc neglected. Hardware and Earthenware have been quiet.

Domestic produce has been attracting more attention; and Breadstuffs, Provisions, Cotton, Wool, and Tobacco have been quoted steadier in price, though Flour, Wheat, Corn, Oats, Pork and Lard closed rather weak. Middling upland Cotton left off tamely at 21c. per lb. The receipts at all the ports, since Sept. 1, have been 3,532,574 bales, against 2,665,965 bales same time in the preceding year; exports 2,582,744 bales against 1,915,936 bales in the previous year; stock at the ports at latest dates, 191,840 bales against 126,625 bales same date 1871.

Foreign goods have been in more general request, especially Dry Goods, and Groceries, and held with more firmness. The week's imports of foreign goods and merchandise amounted to $6,530,355 including $2,256,767 of dry goods.

Ocean freights have been more active, and rates have been generally well maintained. The main call has been for room, suited to the Grain, Petroleum, Tobacco, and Naval Store trades.

At the Live Stock Markets, Beeves have been in less demand yet held more firmly at from 8½@13¼ cts. Veals in moderate request at 3@9½ cts.; Sheep at from 4½@6¼ cts.; Spring Lambs, 7@11½ cts.; Swine at 5¼@5¾ cts. per lb., all live weight. The week's receipts were 7,311 Beeves, 3,025 Veal Calves, 31,035 Sheep and Lambs, and 30,267 Swine.

The Hudson Highlands Suspension Bridge.

It is stated that the Erie Railway and the New York, Boston and Montreal Railroad have combined in offering the Hudson Suspension Bridge Company a loan of $8,000,000 for the construction and operation of the bridge. The offer has been accepted, but the details of the terms of agreement have not yet been completed. The bridge is to span the river in the Highlands, and is to reach from Anthony's Nose to Fort Clinton, The location will necessitate the building of a branch road from Turner's on the Erie Railway, running in an easterly direction, and another branch road from Anthony's Nose to Lake Mahopac or Brewster's to connect with the New York and New England and other railroads. Surveys have been made for both of these branch roads, but the route has not been definitely settled.

The great piers of the bridge are to be not of masonry but of iron. The estimated cost of the bridge is now over $3,000,000. The design of the bridge is the combination truss and catenary single span. The main cables will consist of two series, the upper and the lower, the former being hung from the towers on each side, and the latter being anchored in the rocks near the base of the towers. There are to be twenty-four cables fourteen inches in diameter each, and divided into four systems. The body of the bridge will be constructed of a combination of steel and iron wire work. There will be two decks, one for the accommodation of foot passengers and the other for railroad trains. The length of clear span of the bridge is to be 1,660 feet, which, with the length of the approaches, will give a total length of 2,450 feet. It will be elevated above high water at least 150 feet. It is estimated that there will be required to construct the bridge 70,000 miles of wire, 17,000 tons of iron and steel and 60,000 yards of masonry.

☞ The National Railway Company has filed in the office of the clerk of the county of Mercer, at Trenton, N. J., as security to bond holders, a first mortgage, amounting to $3,500,000. The mortgage is secured by the American Trust Company. The bonds are for $1,000 each, to run twenty years, at 7 per cent annual interest in gold, and are convertible at the option of the holder or company into bonds that may be issued under a $5,000,000 mortgage on the same railroad, when consolidated with the Philadelphia and Yardleyville Railroad, the building of the latter in connection with and as part of the through line from New York to Philadelphia, intended by the National Railway Company, furnishing the basis for such proposed increase of bonds from three and a half to five millions.

☞ The Mahoning Coal Railroad Company have filed papers with the Secretary of State of Ohio, looking to the construction of two short branches.

Knoblauch & Lichtenstein,

No. 37 Broad-st., New York.

OFFER FOR SALE

$200,000

7 Per Cent. First Mortgage Bonds,

30 YEARS TO RUN,

OF THE

CENTRAL R. R. EXTENSION COMPANY

OF LONG ISLAND,

At 90 and Accrued Interest in Currency

The road runs from Farmingdale, the present terminus of the Central Railroad, to Babylon on the South Shore of the Island. According to contract, the road will be finished by July 15th, ready for this summer's travel.

These Bonds being a *home security*, and among the best ever offered in this market, we take special pleasure in recommending them.

Pamphlets or further particulars will be promptly furnished on application.

Iron Ore of Piedmont, Va.

The Alexandria *Gazette* says that President Barbour, of the Washington City, Virginia Mid land and Great Southern Railroad, and Major R. F. Mason, of the land bureau of the same road, and Gen. Pleasants and Mr. Lorentz, engineers of the Reading (Pennsylvania) Railroad, and the gentlemen who accompanied them in their tour of inspection over the main line of the former road, have returned to Alexandria, Va., after a most pleasant trip, and then adds:

The engineers are more than satisfied with the result of their inspection of the iron ore in quality, and quantity in which they were particularly interested, and express themselves very confident that at no distant day there will be a large traffic in iron ore over the road. With a view further to ascertain the advantages for the transportation of iron, Messrs. Barbour, Randolph, Pleasants and Lorentz on Tuesday visited Jones' Point and the river front at the southern end of Alexandria, where suitable wharves can, at a comparatively small outlay, be constructed for the shipment of iron and the receipt of anthracite coal, it being the purpose of the Reading Company, if satisfactory arrangements can be effected, to ship coal to that place, and in return take iron, either in the ore or pigs. It is the impression that it will be found much more profitable to have furnaces at Alexandria, where land can be had at a very low figure, and thus save the cost of transporting the ore. General Pleasants and Mr. Lorentz express the opinion that the quality of the iron ore in Albemarle, Nelson and Amherst and on the line of the Danville extension is equal to that of Missouri and Lake Superior, and as being in almost inexhaustible quantity.

☞ Governor Dix has appointed Randolph Wilthaus, Abram Duryea, Edward R. Bell, J. F. DeNavarro and Q. A. Gilmore, commissioners to locate the line of the proposed Gilbert Elevated Railroad in New York City.

☞ The appointments of General Superintendents on the Northern Central Railroad are as follows: between Harrisburg and Baltimore, G. Clinton Gardner; between Erie and Harrisburg, W. A. Baldwin; between Williamsport and Canandaigua, J. A. Redfield.

☞ BANKING HOUSE OF FISK & HATCH,
No. 5 NASSAU-ST.,
NEW YORK, July 25, 1873.

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds—

THE CHESAPEAKE AND OHIO SEVEN PER CENT. GOLD BONDS; principal and interest payable in gold in New York; interest payable Jan. 1 and July 1; coupon or registered. Price **90** and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD, IS A GREAT EAST AND WEST TRUNK LINE, 420 miles in length, extending from Atlantic tide-water at Richmond to Huntington, the most favorable point of railroad connection with the Ohio River, and developing the richest IRON, COAL, AND TIMBER regions in the United States.

IT IS COMPLETED AND DOING A LARGE, PROFITABLE, AND RAPIDLY INCREASING BUSINESS.

ITS FREIGHT TRAFFIC, PASSENGER TRAVEL AND EARNINGS during the current year will be much larger than has heretofore been anticipated, and they are developing with a rapidity which shows the Chesapeake and Ohio to be one of the most valuable and successful railroads in the country.

These facts, together with the SUBSTANTIAL AND ENDURING CHARACTER OF THE ROAD ITSELF, ITS ADVANTAGES FOR ECONOMICAL AND PROFITABLE OPERATION, AND THE UNQUESTIONABLE SECURITY OF THE BONDS OF THE COMPANY, enable us to recommend them with the utmost confidence.

Pamphlets, containing full information concerning the Road and the country it traverses, will be furnished upon application.

We continue to deal in Government Securities, CENTRAL PACIFIC, WESTERN PACIFIC, AND CHESAPEAKE AND OHIO SIX PER CENT. BONDS, buy and sell Stocks and Bonds at the Stock Exchange on Commission, for cash, make Collections, receive Deposits, on which we allow interest at the rate of 4 per cent., and do a general banking business.

FISK & HATCH.

☞ The point of connection of the Shenandoah Valley Railroad with the Chesapeake and Ohio Railroad will soon be decided. Two points are spoken of—Staunton and Fishersville. Colonel A. W. Harman, one of the contractors on the Valley Railroad, left for Lexington Thursday, to break ground there for the extension from Staunton to Salem. Friday, ground will be broken in Rockbridge, Botetourt and Roanoke. The line will go by way of Fincastle.

☞ The Richmond *Dispatch* states that the Church Hill tunnel under that city, by which the Chesapeake and Ohio Railroad will be enabled to land its freights on the wharf of the James river, is nearly completed, and that a double track is to be laid by that company through the tunnel.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending July 8, are: freight, $34,027 00; passengers, $32,999 98—total, $67,026 98.

☞ Mr. Henry Tyson, the Fourth Vice President of the Erie Railway Company, is also President of the Baltimore City Passenger Railway Co.

Journal of Railroad Law.

COMMON CARRIERS—THEIR LIABILITY FOR SAFE DELIVERY OF GOODS BEYOND THEIR OWN LINES—RULES AS TO LIMITING THEIR OWN LAW LIABILITIES.

The facts of the recent case of The Illinois Central Railroad Co. *vs.* Frankenberg (54 Ill., 88) are fully and clearly stated in the following opinion by—

BREESE, C. J.—The question presented by this record is one of great importance to the public and to the railroad interests of this country, and has our most careful consideration.

It is a question on which the courts of this country are not in harmony with themselves, nor with those of England, to whose decisions we are accustomed to refer as evidence of what the common law is, on any subject which has engaged their deliberations.

The question is, as to the extent of the liability of a railroad company as common carriers of goods and property.

While there is no difficulty in defining, in general terms, when the liability of common carriers begins, the courts of this country are not agreed as to the point when it terminates.

A common carrier is defined to be one who undertakes, for hire, to transport the goods of such as choose to employ him, from place to place. Railway companies are under obligations to receive and transport all goods which may be offered to them for such purpose, and without delay. They can not lie by, as the wagoners in early times were accustomed to do, for a rise in the price of freights. They are regarded by all courts as common carriers, resting under a duty to transport such articles as may be delivered to their agent authorized to receive them. They may demand the freight money in advance and if not paid, refuse to carry the goods, but when they are received they are at the risk of the carrier, and from which time he is regarded as an insurer, and held to the most stringent responsibilities, from which he can only be relieved by the operation of one of two causes, the act of God or the public enemy. Public policy has always demanded this rule, inasmuch as the goods are entirely in the power of the carrier, and it being so easy for him to conceal his fraud or misconduct, and so difficult for the owner to prove it, that the law does not permit the inquiry, but supplies the want of proof by a conclusive presumption. Porter *v.* Chicago and Rock Island R. R. Co., 20, Ill., 407. Baldwin *v.* American Express Co., 23 ib., 197.

The liability of the carrier commencing with the receipt of the goods, it necessarily continues until they are delivered by him at their place of destination, where the owner or consignee is bound to be present to receive them, and pay the freight for them, if not previously paid. If he be not present to receive the goods, they can be placed in a safe and sufficient warehouse when the liability of the carrier ceases, and that of a warehouseman begins.

The important question now arises, is he thus bound to carry and deliver to a point or place not on his route?

This is a question not settled by the courts of this country, though the received doctrine may be said to be, that the carrier is not responsible beyond his own route, except upon his special undertaking so to be liable.

By the law of common carriers, their liability was fixed on the receipt of the goods to be carried. They are insurers of the goods, and if not delivered at their place of destination, they are accountable for them, and when called upon to account for them, the onus of proof is upon them, and they are chargeable with their value, unless the loss was caused by a force superior to human agency, which no foresight could have guarded against, or by the public enemy.

This is the extent of the liability of common carriers by the common law. The receipt of goods by them is all that is necessary to fix this liability, so that if a parcel or package be delivered to a railroad at Chicago, marked for Louisville, Kentucky, or at any other place off their route, and they receive it to carry, they are bound, by this rule of common law, if the parcel or package be lost, to account to the owner for its value. The contract of the shipper is with the carrier in whose custody he placed the goods.

A responsibility so vast being cast upon carriers by the common law, it soon became a question how they could remove or lessen it. A resort was had to a general notice, which was held by this court and other courts to be insufficient. Western Transportation Co. *v.* Newhall, 24 Ill., 466. But it was held by this court, in the case of the Illinois Central R. R. Co. *v.* Morrison *et al.*, 19 *ib*, 136, that such carriers may relieve themselves from their general liability by special contract. In that case Morrison, by his writing, under seal, in consideration by a reduction of freight charges upon a lot of cattle, assumed the risk of transportation, and released the company from all claims which might arise from damage or injury to the stock while in the cars, or for delay in its carriage or for escape from the cars and, generally, from all claims except such as might arise from the gross negligence or default of the agents or officers of the company.

We have examined all the cases cited upon both sides of this question, and pondered them, anxiously desiring to recognize a rule which, while it shall not perplex and injure the commercial interests of the country, shall at the same time protect the carrier's interest, or, at least, be of so much service to it that the proprietors of that interest may know and understand the full extent of their obligations to the public.

So long ago as 1860, in this court in the case of same company against Copeland, 24 Ill., 332, expressed a decided partiality for the rule in Muschamp's case, 7 Mees. and Wels., 421, so much relied on by the appellee, and in which case all the authorities, English and American, were fully examined, and we said though this point was not in the case we were inclined to yield to the force of the reasoning of the English courts, on principles of public convenience, if no other, and to hold, when a carrier receives goods to carry, marked to a particular place, he is *prima facie* bound to carry to and deliver at that place. By accepting the goods so marked, he impliedly agrees so to do, and he ought to be answerable for the loss.

Again, in the case of the same company against Johnson, 24 ib., 389, there was an express understanding to transport the goods to Wheeling, but the court referring to Copeland's case *supra*, considered that case as holding that a carrier who receives goods to carry marked to a particular place, was bound to carry to, and delivered at, that place—that it was an agreement implied from the mark or direction on the goods, and accepting them so marked, that the liability arose.

Now, on the point of public convenience, which consideration has great weight with us in determining which rule should be adopted, it seems to us that consignors of the productions of our country or other property, by railroad, should not be required, in case of loss or damage, to look for remuneration to any other party than the one to which they delivered their goods. It would be a great hardship, indeed, to compel the consignor of a few barrels of flour, delivered to a railroad in this State, marked to New York City, and which are lost in the transit, to go to New York, or to the intermediate lines of road, and spend days and weeks, perhaps, in indeavors to find out, on what particular road the loss happened, and having ascertained it, in the event of a refusal to adjust the loss, to bring a suit in the court of New York for his damages. Far more just would it be to hold the company who received the goods in the first instance, as the responsible party, and the intermediate roads its agents to carry and deliver, and it is the most reasonable and just, for all railroads have facilities not possessed by a consignor, of tracing losses of property conveyed by them, and all have, or can have, running connections with each other. Above all, when it is considered the receiving company can at the outset, relieve itself from the common law liability, by a special definite agreement, such a rule cannot prejudice them. This rule being known, all parties can readily accommodate their business to it, and no inconvenience can result to any one from its operation.

In the case of the Illinois Central R. R. Co. *v.* Morrison, 19 Ill., 136, there was a formal stipulation under hand and seal, by which the consignor, for a valuable consideration, agreed to release the company from their common law liability as carriers.

In Adams Express Co. *v.* Haynes, 42 ib., 89, it was said, if a shipper takes a receipt for his goods from the company, with a full knowledge of its terms and conditions, intending to assent to the restrictions contained in it, then it becomes his contract as fully as if he had signed it.

By such a contract the rights and duties of the parties to it must be governed, and if the liquidations go to limit the common law liability, and they plainly appear in the instrument, and are not covertly inserted in it and are understood by the consignor, then it must be enforced as any other contract of parties made in good faith.

Testing this case by these considerations, the receipt or bill of lading executed by appellants and accepted by the consignors reciting, as it does, that the goods in question were consigned to Pana, and charges paid to that point, and that appellants should not be liable for loss or damage save on their own road, amounts to a special contract, relieving the company from their common law duty.

It is a question for the jury to determine, whether the terms of the receipt were understood by the consignors and assented to by them. If they were they are bound by them.

The fact that the charges were guaranteed from

Pana, was not for the benefit of appellants but for the benefit of the connecting road whose usuage was to decline the receipt of perishable articles, as these were, unless the charges were guaranteed.

We think justice would be promoted by sending this case back for trial, in the light of the views here presented, and of the rule we think necessary to be established for the government of all such transactions, and for that purpose reverse the judgment and remand the case.

Judgment reversed.

Virginia Railroads.

A letter to the Baltimore *Sun*, dated Richmond, July 13, 1873, says:

The fear that by the building of the railroad from Baltimore down the Virginia valley a great portion of the trade of the West, to come over the Chesapeake and Ohio Railroad, will be diverted from Richmond to Baltimore, is moving our people to take steps for the construction of a "straight shoot" from this city to Lynchburg, and from Lynchburg to Clifton Forge. At this latter point the road would intersect the Chesapeake and Ohio road, and bring us much nearer than we now are to the great West. On the 7th of August a convention to promote this scheme will be held in Richmond. The road from Richmond to Lynchburg will cost, they say, about $8,000,000, and Richmond, Lynchburg and all the counties along the line are reported to be willing to subscribe sums sufficient to build and equip it. The Chesapeake and Ohio, and the Atlantic, Mississippi and Ohio Railroad Companies, have promised to lend their aid for the construction of the branch from Lynchburg to Clifton Forge.

In a few weeks the Richmond and Atlanta Airline Railroad will be completed, and a large and rich section of country opened to the enterprise of Richmond and Baltimore merchants. I say to Baltimore as well as to Richmond merchants, because the new owners of the Richmond and York River Company are about to put five steamers on the route from West Point to Baltimore, and with this connection your merchants may send and receive goods with convenience and cheapness, to and from the very heart of the cotton country.

Milwaukee and Nashua Railway.

The articles of incorporation of the above named company are advertised in the St. Paul *Dispatch* of the 11th inst., and state that the incorporators—consisting of E. P. Greeley, Andy Felt, S. L. Eastman, Wm. B. Perrin, and C. A. Greeley, have associated themselves and become incorporated for the purpose of constructing a railway from some point on the boundary line between the States of Iowa and Minnesota, and within the county of Fillmore, in said state of Minnesota, thence in a northeasterly direction to some point on the Mississippi river in the county of Houston or Winona in said State of Minnesota. The principal place of business of the company is Nashua, Chickasaw county, Iowa, where all of the incorporators reside. Capital stock, $2,500,000.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending July 12, at 854,959 tons, and for the coal year 9,651,261 tons, against 9,515,007 tons to corresponding time last year, being an increase of 136,254 tons. The bituminous tonnage for the week is 47,449 tons, and for the year 1,224,851 tons, giving a total of all kinds for the week of 404,408 tons, and for the year of 10,876,112 tons, against 10,573,864 to same time last year, being an increase of 302,248 tons.

☞ The earnings of the Erie Railway Company for the week ending July 7, 1873, were $344,516, against $337,535 for the corresponding week of the previous year—an increase of $6,981.

NOTICE TO CONTRACTORS.
ENGINEER'S OFFICE BALTIMORE AND AND OHIO RAILROAD.

CAMDEN STATION, Baltimore, July 14, 1873.

PROPOSALS will be received at this office until the 1st of August for the following work on the Ohio and Baltimore Short Line Railway, in Washington county, Pennsylvania:

1st. Section 2, Brady's Tunnel, near Washington, Pennsylvania.

The bid per cubic yard of tunnel excavation, to include timbering and all other expenses incident to the work.

The bid for arching to be for, all stone or all brick, or walls of stone and arch of brick, and to include every expense, except cement. Outside work bid for separately.

2d. Section 16, from station 336 to 386, 130,000 cubic yards embankment, 7,000 cubic yards bridge masonry.

3d. Section 23, west of, and next to the Monongahela river, 200,000 cubic yards excavation, and 25,000 cubic yards stone, quarried and cut (to dimensions to be furnished,) and delivered on the company's barges on the Monongahela river, at points to be agreed upon, which should be named in the bid.

The profile can be seen at Section 2, at the office of J. A. Boyd.

Payments monthly in cash, with reservation of twenty per cent. until completion of work.

The company reserves the right to reject any or all bids.

JAMES L. RANDOLPH,
Chief Engineer B. & O. R. R.

DREDGING MACHINES AND SCOWS
FOR SALE.

One (Osgood Pattern) Second Hand. Price $10,000.
One, Almost New. Price $22 000.
Two Large Dumping Scows, $3,500 Each.
Apply to
A. W. LADD,
5 and 7 Dey Street.

Second Hand Locomotive For Sale.

ONE SECOND HAND ANTHRACITE COAL BURNING LOCOMOTIVE for Sale, weighing 28 tons, eight-wheel connected with cylinders 16 inches by 20 inches. Engine can be seen on application to A. WILHELM, President of Cornwall Railroad, at Lebanon, Pa. 3m26

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.
NEW YORK, June 23, 1873.

A DIVIDEND OF FIVE PER CENT. HAS BEEN declared by this Company, payable on the first day of August next to the holders of full-paid shares, registered at the close of the fifteenth day of July next, after which and until the fifth day of August, the transfer books will be closed.

L. V. F. RANDOLPH, Assistant Treasurer.

RAILROAD IRON.

THE undersigned, agents for the manufacturers are prepared to make CONTRACTS FOR RAILS delivered free on board at ports in England, or exship at ports in the United States.

M. K. JESUP & COMP'Y,

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B, water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the Steam Water Station Company,

LENG & OGDEN,

IRON AND STEEL DEALERS & IMPORTERS,

No. 4 FLETCHER STREET, NEW YORK.

Sole Agents for Credenda Steel Gun Barrels and Moulds, and the Cold Drawn Patent Weldless Steel Tubes.

THE WHARTON

Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

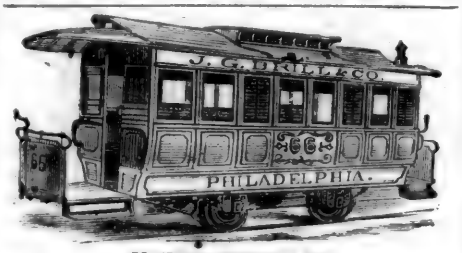
YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.



Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

RAILROAD IRON

Of every Size, Weight and Pattern,

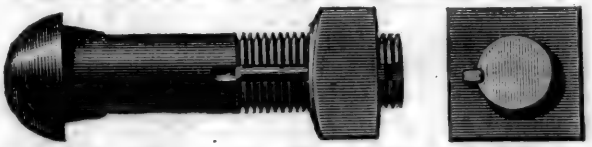
For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

☞ Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.



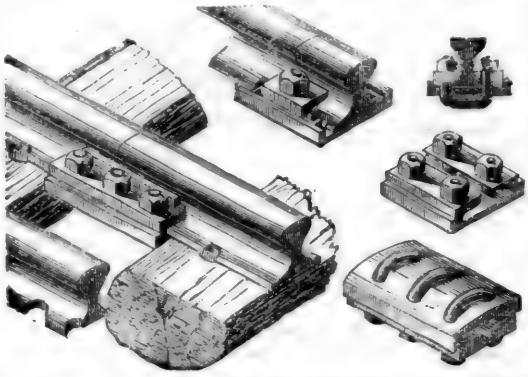
WM. COURTENAY, President. CHAS. F. COBB, Secretary.

THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

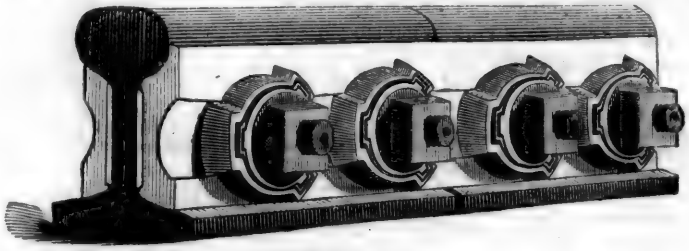
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

The New Pacific Mail Steamship.

The hull of the new Steamship *Grenada*, recently built at Wilmington, Delaware, by the Harlan & Hollingsworth Company—being the third of the new steamers building for the Pacific Mail Steamship Company—has arrived at this port from Wilmington, Del., and is now lying at the Morgan Iron Works, at the foot of East Ninth-street. The machinery for this ship was built in Scotland, the contract having been given for the work some time ago, as the cost abroad was much less than it would have been in this country. The Granada is to be one of the finest American iron steamers ever built. Her length is 300 feet, beam 40 feet, and depth of hold 30 feet 6 inches, and her registry 2,572 tons. She is to be fitted up for both first-class and steerage passengers. She will carry 2,500 tons of dead weight upon a draft of nineteen feet. One marked peculiarity in the construction of this vessel is the large open wells left for the reception of the boilers and machinery. These spaces are open from the bottom of the ship to the hurricane deck, and the boilers and the heaviest parts of the machinery may be lowered into place without disturbing anything. The vessel will be ready to take its place upon the line in September.

Railroad Trains Momentarily Reporting their own Progress by Electricity.

A patent has been secured by G. Natcher, Esq., at present of this place, and which is now controlled, we learn, for the purpose of introduction, by a company of enterprising gentlemen, under the firm name of G. Natcher & Co., for an Electric Railway Reporter or Signal, which is operated on ordinary telegraphic wires attached to tappets, so placed as to receive the weight of the car wheels, which thereby open and close the current of Electricity, which current, striking upon a bell or bells, causes an alarm to be given a rod, a mile or miles, if advisable, in advance or rear of a train. A signal, stationed at a crossing, will be rung instantaneously at any fixed distance as the train approaches thus giving fair notice to all persons to clear the track. One of these alarms placed at a station will report a train, tappet after tappet, until it passes on to the tappets of the next signal station, where a similar report is made and so on to the end of the route. If a train is delayed or wrecked it will be immediately reported at the station and other trains regulated accordingly by which means hundreds of lives and vast quantities of property may be saved. The improvement that enables trains to give notice of their approach to crossings and to approaching trains meets a want that has long been one of the most serious embarrassments to railroading. We doubt whether this invention is second in importance to the Westinghouse brake. The general speed at which trains are now run, owing to the late inventions, makes it absolutely necessary to use electricity as an alarm or signal agent.—*Huntingdon (Pa.) Journal.*

New Freight Line to the West & Southwest.

Another through line of transportation has gone into operation between the leading coast cities and the interior towns. The "Clyde" Lines of Steamers running between Boston and Providence and Philadelphia and Richmond, making close connections with the Chesapeake and Ohio Railroad at the latter point, are now shipping through freight to Portsmouth, Cincinnati, Louisville, Indianapolis, Nashville, Memphis and Saint Louis. The Old Dominion Line of Steamers from New York to Richmond are giving through bills of lading between New York and the same points at the west. The certainty of making good time, and the low rates, are attracting quite a large traffic over this line. It is supposed that cotton, wool and raw products will find their way east over this route, and a corresponding amount of manufactured fabrics in the other direction.

A Second Great Bridge at Louisville.

The great project of building another bridge across the river at this point is assuming a more tangible shape, and it is probable will be shortly pushed to a final consummation. Some time since a charter was obtained for the bridge, and it is now proposed to present to the General Council at one of its earliest meetings, an ordinance providing that a subscription of $500,000 shall be submitted to the people of the east end of the city to aid in its construction. This subscription is conditional upon a like sum being obtained from other sources; and it is stated, seemingly with authority, that the Chesapeake and Ohio and the Ohio and Mississippi Railroads have each promised to take $250,000 of the stock if Louisville votes the other half million. The subscription is only to be submitted to the voters of that part of the city lying east of Third street. It is said there is no doubt of its being carried by a large majority. This bridge will cross the river somewhere between Third street and the eastern limit of the city, the exact location not having yet been decided upon. It is proposed to arrange for two railroad tracks, two street-car tracks, a carriage-way and a foot way. This will make the bridge one of the most complete in the country. By it the Chesapeake and Ohio Railway which within the year will be completed, establishing another unbroken rail communication between this city and the Atlantic seaboard, will make connection with the Northwestern Railroad system. An accurate survey has been made of the river bed. The project is entirely feasible, and there is but little doubt that within the next few years the bridge will be completed.—*Louisville Courier-Journal.*

Portsmouth, Columbus and Michigan R. R.

The Portsmouth, Columbus and Michigan Railway Company filed a certificate of incorporation with the Secretary of State of Ohio on the 15th inst. The proposition is to construct a railroad from Portsmouth through Scioto, Ross, Pickaway and Franklin counties to Columbus, and thence in a northwesterly direction through Franklin, Madison, Union, Logan, Hardin, Auglaize, Allen, Hancock, Putnam, Henry, Defiance and Williams counties to the northern boundary line of Ohio, in the town of Madison. The capital stock is $200,000. The corporators are James S. Gibbs, F. W. Bathrick, G. W. Merrill, Henry Merrill and J. D. Cook.

Central Railroad of Georgia and Leases.

The Central Railroad and Banking Company of Georgia operate about 660 miles of railroad. They have absorbed the Southwestern, the Macon and Western, and the Augusta and Savannah Railroads, all of which are leased by the company, as are also the minor roads known as the Milledgeville and Eatonton and the Upson County Railroads.

The following table gives the details of the several lines embraced in the organization:

Central Railroad—Savannah to Macon	192	miles.
Southwestern Railroad—Macon to Albany, Eufaula, &c	257½	"
Macon and Western Railroad—Macon to Atlanta	102½	"
Augusta and Savannah Railroad—Augusta to Millen	53	"
Millen and Eatonton Railroad—Gordon to Eatonton	89	"
Upson County Railroad—Barnesville to Thomaston	16½	"

—making a total of 660½ miles, or including 59 miles of siding, &c., 719½ miles of equivalent single track.

The company make separate reports for each of the lines operated by them, but they also report in aggregate, which shows that the fiscal results for the last three years have been as follows:

	1869-'70.	1870-'71.	1871-'72.
Central Railroad	$2,308,284 88	$1,855,487 30	$1,656,153 70

Balance to credit of income	289,885 55	139,989 98	252,038 05

The final income balance in each year has been consumed in the purchase of iron, real estate, &c. The results of the year 1871-'72 do not show as favorably as the year preceding owing mainly to competition which forced the lowering of rates, and in a large measure also to short crops. In relation to these facts and other company matters, the President in his report makes the following observations:

The foregoing statement shows that the net earnings for the past year have not been equal to the usual dividends, but inasmuch as the deficit has occured on the Southwestern Road, which was more seriously affected than either of the other two by the very short crop of 1871, and in view of the fact that that company brought a very considerable surplus over and above its dividend at the time of its lease, the board has determined to declare the usual semi-annual dividend of $5 a share, payable so soon as securities which are held can be made available, or whenever the financial condition of the company from other sources will justify.

These securities consist in stocks and bonds of the Savannah, Griffin and North Alabama, and Southwestern Railroads, received for advances to extend said roads, and for advances to other roads tributary to the main line. The company has also paid matured bonds of the Southwestern Railroad (which by the terms of the lease of that road were to be paid by this company). The last amount it is proposed to refund by sale of our joint bonds.

In the last annual report reference was made to competition from other lines of transportation which would be likely to seriously affect the interest of your company, and the amount of the earnings for the past year proves that the fears then entertained by the board have been fully realized. While it is true that the falling off in the receipts of the Central and Southwestern Roads is to a considerable extent due to a very short crop, it must be admitted that low rates for transportation, and a division of the business offering, has contributed largely to the result.

The board feels that it is unnecessary to enlarge upon the injurious effect that has resulted from the construction of competing lines in a section of country where there is but a limited amount of business to be had. They are, however, in existence, and, being fixed capital, must continue. If they are to be maintained, the production of the country must increase, or higher rates for transportation must be charged. That the former will take place, there is no immediate prospect, and while all admit that we are working at too low rates for the amount of business we have, yet there is no one line willing to incur the odium of making an advance. It is, however, believed that this cannot continue for any considerable length of time, and whenever there shall be a change, there can be no doubt that yours will be among the best paying stock in the country.

For a connection with the city of New York by sea since the war, the company has been dependent upon a contract with private parties owning steamships. This plan has been attended with many inconveniences, and as the owners of ships could not be expected to continue in a business without being fairly compensated for the capital invested, and the risk taken, either by a subsidy or in the division of rates on through business, the board has for some time contemplated the purchase of ships whenever a favorable opportunity should offer. In the month of March last, Wm. R. Garrison, Esq., of New York, made a proposition to the board to sell six steamships to the company. Four of them were being run under a contract with us, the other two were owned by the contracting parties as a reserve. The proposition for the sale of the ships was, to receive three hundred thousand dollars in the bonds of the company, at par, and an obligation or bond for an additional three hundred thousand dollars, conditioned that the interest on it should be equal to the dividends declared and paid on three thousand shares of the capital stock of the company. This proposition, after mature deliberation, was accepted by the board, and the six ships became the property of the company after the 1st of May last. At the time of the purchase, Mr. Garrison was constituted agent of the company to manage and control the ships.

Accurate accounts of the ships to date cannot now be had, but for the purpose of approximating to the result, Mr. Garrison has estimated their earnings and expenses, not yet positively ascertained, showing that the probable net earnings of the ships, for the past seven months, has been, in round numbers, seventy-five thousand dollars.

By this it will be seen that the ships are not only self-sustaining, but that they will yield a profit even at low rates and laboring under disadvantageous circumstances. The board feels perfectly satisfied that the purchase was judicious, and that it has and will continue to benefit, not only the road, but the local business of the city.

Looking to the maturity of the bonds that were issued for rebuilding the road, as well as for the payment of bonds of the Southwestern and Macon and Western Roads; and to provide for refunding amounts that the company has been called upon to pay for extending the roads referred to above; and for the purpose of perfecting our connections with distant points, it was seen that it would become necessary to issue bonds. The board therefore procured the passage of an act by the last Legislature authorizing the three companies, Central, Southwestern and Macon and Western, to issue joint bonds to the extent of five millions of dollars. Acting under this authority the respective boards have authorized the issue of these bonds as the requirements of the companies demand. Three millions have been executed, which are all that it is proposed to issue at present; one million of which are set apart for the redemption of the bonds that will fall due in 1875.

The extension of the Southwestern Road to Blakely and the branch from Fort Valley to Perry, referred to in the last report, have not progressed as rapidly as was expected; but the track is now being laid upon both, and the citizens along the line will soon begin to avail themselves of their advantages.

The report of the chief engineer and superintendent, (Virgil Powers) contains much valuable information relating to the condition of the works under his charge, and the progress of branches, &c., now being built, or which are contemplated as future auxilliaries, of existing roads. We copy the following—

There has been received during the year, for repairs of road, 95,032 cross ties; 3,416,408 feet B. M. Stringers; 510,945 feet B. M. Bridge, and 242,621 feet B. M. Building and miscellaneous lumber, and 29,000 shingles.

Of the three thousand tons of new (40 pounds to the yard) T. rail, with fish bar joinings, received in September and October, there has been laid on the Columbus line, between Butler and Wimberly, about 18 miles, and the old flange rail removed to the Blakely Extension. This will be continued until all the old flange rail (32 miles) is taken up from this line and removed to the Perry Branch and Blakely Extension.

The new T rail is being laid on 6 x 8 inch stringers, 24 feet long, with gain ties at the joints and in the centre, and makes a very fine track. I think as good as any in the country. The flange rail on the extension, where the business will be light, will wear a number of years, and the old road, where the heavy business passes, be much improved by the change.

Having very recently passed over the entire line of road, I am pleased to be able to say that the road is in very fine order. The iron is wearing out and we should have annually from 20 to 25 miles of new rail, until all the old rail is removed, to keep the road up to its usual standard. We need about 5 miles of heavy T rail to lay between 24 and 29 mile posts (from end

of present heavy rail and Fort Valley). I prefer that this part of the line should be laid with heavy rail on ties, because there is about twice as much business passes over the line between Macon and Fort Valley as any other part of the road. The balance of the road, for years to come, should be laid on stringers with a light T rail; even as light as 30 pounds to the yard would answer very well for a considerable portion of the road. All below Americus, about 125 miles, (exclusive of the Blakely Extension) might be renewed with a 30 pound rail that would answer all purposes for years to come.

The motive power is in good condition, but a number of our old engines are giving out, and we should have at least two new locomotives annually to keep up our stock. We have been very much pressed for motive power the past two months, owing to letting the Macon and Western Road have two of our freight engines for the past six or eight months, and they cannot now be spared from their service.

A large amount of repairs has been done on our freight cars the past year. A large number of old worn wheels have been replaced with new ones; they are now generally in good order. Our passenger coaches have been considerably improved by repairs, paint, &c. The number of freight cars have been reduced; 11 box, 7 platform, and 1 cab car condemned and 2 platform changed to coal cars.

PERRY BRANCH.—The grading, clearing, and grubbing, and log drains for this line, was completed the 15th of September. The bridging and track laying is progressing, and I hope to have it so far completed as to run trains to Perry in January.

BLAKELY EXTENSION.—The grading, clearing, and grubbing of this line, for the first forty miles, is very nearly completed; some grading in Chickasawhatchie, Little Spring, Nockaway, and Perry Creek Swamps, and some dressing up, only remains to be done. The clearing is completed to Blakely, and the grading on the last two miles progressing. The track is laid ten miles to Walker's Station, and as soon as the turnout is put in, the trains will be run to that point.

GRISWOLDVILLE AND JEFFERSONVILLE RAILROAD.—A preliminary survey for this branch road was made in April last. The line was started at Griswoldville and run down north side of Big Sandy Creek to near the head of Gen. Myrick's Mill Pond, where it was carried across, and down the south side of that stream, about four miles, then deflected to the south, was carried up the east side of a small stream to Jeffersonville. Total distance seventeen miles. A very good line can be had between these points.

LOUISVILLE BRANCH.—Three preliminary lines for this branch was run, one reaching the Central Railroad at Bartow, (No. 11) another at or near Bethany, and the third at Perdue, (No. 10½). There is very little difference in cost or length of the first two, the Bethany being a little the cheapest.

SANDERSVILLE BRANCH.—This line has been located and leaves the Central Railroad east of the depot at Tennille, and, after deflecting to the left on a four degree curve sufficiently, the line is carried in nearly a straight line on the east side and not far from the public road, to its terminus in the rear of Messrs. Gilmore and Jones' lots. The line passes about one thousand feet east of the court house, and direction nearly north from Tennille. The depot will be a little north of the street leading east from the Court House Square.

TALBOTTON BRANCH.—Two preliminary lines were run for this branch, one leaving the Southwestern Railroad at or near the east end of turnout in Geneva, is carried across the head of the branch east of Geneva, and crossing the dividing ridge is carried down the west side of a small branch to Upitoi Creek. Crossing the creek, it is carried up the west slope of a branch a short distance, when a ridge, dividing two branches, is attained and pursued to the main or dividing ridge between the Chattahoochee and Flint Rivers. Crossing this main ridge and the public road at same time, the line is carried along, not far from the public road, on the ridge on which Talbotton is situated to that place, passing in the rear of the residences on the south or east side of the main street leading to the Court House Square, and terminating about 1000 feet east of the street, running south from the west side of the square. Total length 7¼ miles.

The other and cheapest leaves the Southwestern Railroad a thousand feet west of water station known as Bostick's, and deflecting to the right, soon attains the dividing ridge between Flint and Chattahoochee Rivers, and is carried along that ridge to within three miles of Talbotton in Col. Smith's plantation, when it leaves the ridge and is carried down its slope a short distance to the head of a small branch, and down the west slope of that to the creek running south of Talbotton. Crossing that stream, it is carried up the north slope to intersection of Geneva line in the rear of Mrs. Week's, and twenty-seven hundred feet west of terminus of that line. The length of this line is 7¼ miles.

NEW LINE, FROM SAVANNAH TO WHITESVILLE.—This line was started on present line of road near the 1 mile post, and deflected to the right or north, with a curve of 6,875 feet radius, until the course N. 45, 37 W. was reached, and continued on straight line to Whitesville, intersecting the present line with a curve of 10,000 feet radius at the 30 mile post, and 3,083 feet, making a saving in distance of 5 miles and 2,734 feet.

The new line will be entitled to credit of cost of iron, chairs, spikes, and track laying of 5½ miles, the distance saved, less the value of the old rail, as this additional distance will have to be laid on old if new line is not built.

We now proceed to the accounts of the several roads which are included in the Central Railroad system of Georgia. The fiscal year is closed as of November 30.

CENTRAL RAILROAD OF GEORGIA.

The main line of the Central Railroad extends from Savannah to Macon, 192 miles, and is thence extended west and southwest by the Macon and Western and the Southwestern, &c., &c. The Augusta and Savannah and the Eatonton Branches are parts of the operative mileage of the main line of the system, making an aggregate length of 284 miles.

The gross earnings, operating expenses, &c., on this road for the past three years, have been as follows:

	1869-'70.	1870-'71.	1871-'72.
Passenger	$389,480 77	$349,632 63	$307,149 63
Freight	1,891,878 61	1,477,724 72	1,319,211 19
Mail, &c	26,925 00	28,119 95	29,792 88
Total earnings	$2,308,284 38	$1,855,487 30	$1,656,153 70
Operating expenses	1,535,544 73	1,127,202 35	966,846 09
Net earnings	$772,739 65	$728,284 95	$689,307 61

The reports are not very detailed in their statistics, and in relation to freights are very partial, alluding only to the principal materials transported.

The following are the results for the three years represented in the above table of earnings:

	1869-'70.	1870 '71.	1871-'72.
Passengers	177,054	135,513	109,119
Freights:			
Cotton (bales)	425,370	413,470	402,024
Guano (tons)	45,302	23,183	30,155
Salt (tons)	5,851	4,125	5,340
Lime (tons)	605	533	431

The equipment of the road consists of 53 locomotive engines; and cars as follows: passenger 44; baggage mail express 27; freight, stock and other cars 792. No essential change in the three years under review.

The following is a statement of the financial condition of the company at the close of each of the fiscal years 1869-'70, 1870 '71 and 1871 '72—

	1869 '70.	1870 '71.	1871-'72.
Capital stock	$4,668,000	$5,000,000	$5,000,000
Bonds of 1852 '65 and '72	789,000	789,000	1,088,000
Bonds for steamships	.....	.....	300,000
Fare notes	.....	.....	246,000
Dividends unclaimed	27,977	28,450	23,521

President.—WILLIAM M. WADLEY.

Directors.—Wm. M. Wadley, Andrew Low, John R. Wilder, George W. Wylly, Wm. Henry Woods, J. F. Gilmer, and John Cunningham, of Savannah, Ga; Wm. B. Johnston, of Macon, Ga; and A. S. Hartridge, of Savannah Ga.

Treasurer.—H. C. CUNNINGHAM.

Auditor.—B. J. CUBBEDGE.

Gen'l Supt.—WILLIAM RODGERS.

SOUTHWESTERN RAILROAD.

The lease of the Southwestern Railroad is perpetual; date of contract August 1, 1869. Annual rental—minimum 7 per cent on stock, and otherwise in the proportion of 8 per cent, when the Central Railroad Stock receives 10 per cent. All the bonded debt is assumed by the lessees.

The railroads of the Southwestern Company may be described as follows:

Macon to Eufaula	Miles 148
Valley Fort to Columbus	" 71
Smithville to Albany	" 23½
Cuthbert to Fort Gaines	" 20

—or a total of 257½ miles. Sidings 25¼ miles. Equivalent single track 283¼ miles.

The rolling stock owned by the company and included in the lease consists of—33 locomotive engines; 17 first-class and 11 second-class passenger cars; 6 baggage, mail and express cars; 234 house freight cars; 147 platform freight cars and 8 stock cars, also 11 conductors' cars. This list makes a total of 434 cars. There has been but little difference in the amount of rolling stock during the past three or four years.

The earnings, expenses, &c., of the roads for the last three years have been as follows:

	1869-'70.	1870-'71.	1871-'72.
Gross earnings	$1,324,179	$1,079,455	$896,156
Operating expenses	906,107	676,482	698,480
Net revenue	$418,072	$403,273	$197,676
Interest on bonds	48,370	48,370	36,645
Dividends	228,174	345,086	369,688
Surplus	41,528	9,817	.....
Deficit	.....	.....	208,657

The December dividend, as is apparent, was not earned; but was declared, and has by this time been paid from assets brought into the partnership by the Southwestern Railroad Company, and sold for said purpose.

The financial condition of the company at the date of the lease of the road to the Central Company was as follows:

Capital stock $4,211,600, and bonded debt $691,000, or a total of stock and bonds amounting to $4,902,600 or $19,040 per mile of road. The bonds as above, consist of Southwestern Railroad convertible 7s due in 1872 to 1876, $391,000, and 1st mortgage (Muscogee Railroad) 7s due in 1872 to 1876, $300,000. These bonds will be taken up as they mature, by exchanging them for the new bonds now ready for issue, guaranteed by the joint companies forming the organization under the several leases, viz: the Central, Southwestern and the Macon and Western Companies. The bonds of the Muscogee Railroad Company as above, may also be converted into Southwestern Railroad Stock at 87½ per cent of their face value.

President.—WILLIAM S. HOLT, Macon, Ga.

Engineer and Supt.—VIRGIL POWERS, Macon, Ga.

General offices, Macon, Bibb Co., Ga.

MACON AND WESTERN RAILROAD.

The lease contract of the Macon and Western Railroad is dated May 25, 1871; but it appears from the accounts, that the results of operations embrace the whole year ending November 30, 1871. By the terms of the lease the Central Company possess all the property of the company, and assume all their debts and liabilities. This is virtually a consolidation, and the stockholders receive identical dividends. The lease is perpetual, and an actual consolidation is contemplated. The Macon and Western Railroad is a continuation of the Central from Macon to Atlanta, at the latter point forming a junction with the railroads into and through the State of Tennessee—by this route Nashville, Bristol, Lynchburg, &c., and the roads thence leading north, northeast and northwest having operative connections. The line is as follows:

Macon to Atlanta	102½ miles.
Barnesville to Thomaston (leased)	16½ "
Total length of line	119 miles.

The Upson County Railroad (Barnesville to Thomaston) is paid for by a nominal rent, and indeed is the property of the lessees, the lessees having ironed and otherwise furnished it after its destruction during the rebellion.

The separate rolling stock in use on the road consists of 19 locomotive engines and 250 cars accounted for as follows—passenger cars 18; baggage, mail and express cars 6; box freight cars 157; platform cars 47; stock cars 17; coal cars 11 and other cars . During the year except the addition of two locomotive engines, the amount of rolling stock has been substantially the same.

The bonds ($150,000,) of this company are assumed by the Central. The stock is $2,500,000, (this latter amount being the nominal cost of the property.)

There is a new road, the Savannah, Griffin and North Alabama Railroad, diverging from this railroad at Griffin of which about 45 miles are already constructed. It will ultimately be continued to Guntersville, and thus become a northern and northwestern outlet for a large section of the southeastern portion of the Union. The Central Company have furnished a large portion of the means for construction, and now operate the line.

President.—ANDREW JACKSON WHITE.

Secretary and Treasurer.—MILO S. FREEMAN.

Rates of Transportation.

The St. Paul (Minn.) *Press* says that, notwithstanding the complaints of the people and of the farmers' granges relative to the extortionate rate of railroad freights, it appears that these rates on the leading trunk lines have been steadily reduced during the last few years. To support this assertion the *Press* gives the following figures:

"Not long ago we quoted the figures supplied by the Michigan Southern and Lake Shore Railroad, which showed a reduction of nearly or quite fifty per cent in the rate of freight charges, while it gave evidence of a heavy increase of traffic. The annual report of the President of the Michigan Central Railroad, which is just received, makes the same showing. As a matter of curiosity and comparison, we subjoin the following exhibit of the freighting business of that road for a series of years:

Years.	Tons of freight moved.	Freight earnings.	Earnings. per ton per mile.
1865	485,275	$2,223,529	3 6 100
1866	533,451	2,206,591	2 60-100
1867	578,177	2,285,521	2 49-100
1868	638,586	2,480,974	2 45-100
1869	802,835	2,755,200	2 9-100
1870	823,770	2,634,438	1 98-100
1871	1,105,875	3,072,557	1 61-100
1872	1,238,313	3,379,625	1 56-100
1873	1,416,792	3,852,933	1 57-100

"Here it will be seen that since 1855 the rate of charges has decreased from 3 6-100 cents per ton per mile to 1 57-100 cents, or more than one-half, while the tonnage has increased from less than half a million tons moved to nearly a million and a half tons. The report of the President says that had the company been obliged to do the business of 1868 at the actual rates of 1873, the gross receipts from freights would have been $1,579,722 instead of $2,480,974, the difference nearly equalling the total surplus of the road for 1868. Whether the rates have now reached the minimum figure at which the road can afford to do business, is not stated in the report, but the only condition on which the lowest rates can be maintained, that of a heavy traffic is most obvious."

Export of Rails from Gt. Britain.

The exports of Iron Rails from Great Britain, as compiled from official returns published by authority of Parliament, compare thus:

	1871. Tons.	1872. Tons.	1873. Tons.
MONTH ENDING JUNE 30.			
United States	44,919	37,978	18,016
British	12,566	10,052	9,669
Russia	12,731	7,911	14,462
Germany	8,509	2,009	8,918
Total to all countries	103 052	81,164	72,692
Old iron to all countries	13,957	14,589	2,674
Pig-iron to United States	14,642	25,178	8,988
SIX MONTHS ENDING JUNE 30.			
United States	244,784	259,011	120,468
British	27,279	28,298	29,774
Russia	46,929	21,064	47,780
Germany	32,220	16,722	26,375
Total to all countries	476,191	448,042	347,757
Old iron to all countries	58,611	56,021	41,355
Pig-iron to United States	92,669	119,173	63,183

☞ At the recent meeting of the stockholders of the Delaware Shore Railroad Company, the following directors were chosen: Henry Allen, Wm. Sommerill, Edwin A. Vanneman, Edward H. Green, Matthew Gill, Samuel Hopkins, David B. Gill, Samuel T. Miller, William Justice, Joseph W. Cooper, and John B. Lawrence. Samuel Hopkins was chosen President, and D. B. Gill Secretary and Treasurer. It was proposed to go actively to work, and a strong hope is entertained that operations will be commenced at an early day.

Railroad Car Manufactories.

On the west side of the Schuylkill, south of Market street, there is a vast aggregated amount of capital invested in manufactures, giving employment to at least 3,000 persons. Perhaps the largest and most important industry here located is that of the manufacture of railroad cars, both for steam and horse railways, which are turned out in thousands, and find their way to every section of the United States, and foreign countries as well. Here are located the works of Wm. C. Allison & Sons, manufacturers of freight and other cars. The works occupy an area all told of about 14 acres from Thirty-first st., to Schuylkill river, and from Chestnut to Spruce, and have a total capacity for the building of 20 eight wheeled cars per day, or over 6,000 cars per annum. The operations for 1872 were up to an average of 100 cars per week. The superficial area covered by shops is 501,221 square feet. The area of roofed buildings, 308,776 feet; wharf line on the Schuylkill, 812 feet, and dock area, 21,758 feet; length of railways through works, about six miles, and length of belting over five miles; steam power employed, 585 horse, including eight engines. Capital invested in the buildings and stock, $2,200,000; value of property over $1,000,000, and amount of business done annually, in building and repairing cars, and in manufacturing of oil well and flue piping, &c., $4,000,000 to $5,000,000. The works are operated upon a system perfected after long years of experiment, by the senior partner, since 1835. There are 18 separate and distinct departments. In these several departments are employed over 1,500 men, whose average pay is equal to $46,000 per month, or $552,000 per annum, the pay ranging from that of the ordinary laborer at $600 a year to the highest grade of employe at $6,000 per year. To provide for the amount of work done, there is consumed of coal 60 tons per day, or over 18,000 tons per annum. Of lumber, 8 to 10 car loads per day, equal to from 8,000,000 to 15,000,000 feet per year. Of iron, about 50 tons per day, all forged here, or 21,000 tons a year. Of iron car wheels, 40,000 a year. Of axles, 20,000 per year. Of brass for journal boxes, &c., 400,000 lbs. a year. Of oils, 85,000 gallons per annum. A brief description of the works will give some idea of their immense proportions. On Chestnut street is a front of 150 feet. Here is received the lumber in the rough, some of it being very heavy, principally oak. It goes first to the getting out shops as they are termed, one building being 480 by 50 feet, and the other 40 by 520 feet. The machinery in these shops comprise planers, drilling machines, saw tables, &c., all of the most approved kind, and the rough hewn oak log which goes in at one end, comes out at the other all ready to form a portion of a freight car. About 175 men are constantly engaged in this building. When finished it is loaded on truck cars, of which 86 are in use in the works, and by a network system of smaller railways, turn tables and transfer tables, is transferred just where it may be wanted, in any other shop, without further handling. Next to this are the truck shop and repair shop, each 50 by 250 feet, and employing 60 men. Walnut street, which crosses the grounds of the company, is temporarily closed, and on the south side are the company's offices, in a handsome and splendidly-fitted three-story brick structure. Here are the principal offices, a telegraph station connecting all over the land being a feature. On the east side of the office is a vast building, 385 by 81 feet, used as the furnace depot, or flue mill, where the iron piping is made, in untold miles of length, and from 350 to 400 men are employed night and day. Adjoining this is the pipe cutting room, covering over 375 by 82 feet, the roof being provided with numerous skylights. Here the cutting, threading and fitting of the pipe are done, when it is transferred either to cars, running into the shops by rail, or to the store-room, 75 by 140 feet, and two stories in height. The machine shop comes next, filled with trip hammers, punches, shears, and other ingenious machinery for the working of iron. This is 140 by 100 feet, and gives employment to over 100 men. The engine, boiler and store room houses adjoin, in which are from 30 to 40 men engaged. The pattern shop is a two-story building, about 40 to 60 feet. The smith shop is a model in its way. It is 200 by 100 feet, and will ere long contain 75 forges, all standing back to back, with a coal tressle beside them, and on the other side a railway track to bear away the iron in cars. Beyond this shop is a building triangular shaped, which covers over an acre of ground, wherein the cars are put together, painted and finished and turned out to the extent of one or two trains per day. It is all under one roof, supplied with about 150 skylights. Within it are thirteen tracks, diverging from a main track, having a total capacity of eighty-four eight wheeled cars, and an area of over 100,000 square feet. The transfer of cars, material, &c., is all done here by an engine owned by the firm, which runs upon a well-regulated time table, and is kept constantly busy in hauling and shifting coal, lumber, iron, damaged and new cars, &c., at stated hours of the day. This building is just completing, and will furnish employment for over 200 men. Just east of this again, below Thirtieth st., the firm have begun still another vast improvement, in the shape of a building to accommodate trains of cars, new and for repair. This will be a sort of triangle, fronting toward the river, and will be built on piles, the low ground having already been filled in. It will bend 405 feet on Spruce street, 370 on Thirtieth street, 428 on Beaver Run, 94 on Thirty-first street, and will have twenty tracks, with a capacity of 143 cars, and a superficial area of about 170,000 square feet, all to be under a single roof. This firm now have an order for 1,000 freight cars for the Pennsylvania Railroad Company, and others equally large for our principal coal companies.

Near the works of Allison & Sons is another car building establishment. Not so large, but still quite extensive, which is devoted exclusively to the manufacture of street railway cars and narrow gauge railway cars. It is the establishment of J. G. Brill & Co., who have a large manufactory 80 by 50 feet and three stories high, with numerous outbuildings for lumber, engine house, &c., where about 100 men are given constant employment. The firm have only been in existence for three years, but are already turning out about 150 street cars and 25 to 50 narrow gauge cars per annum. A great many street cars have been built for the Southern States and a number of combination street and steam cars have been built for a railroad running out of the city of Mexico. They are so constructed as to be shipped in sections, to be put together when delivered to the railroad company. The firm have also just completed two handsome street cars for use in Vienna, the Austrian authorities having purchased the same for an exposition street railway. The cars constructed now-a-days are very different from those of a few years ago. An excursion car, with open sides, was shown, for instance, the total weight of which was only 8,200 pounds, and yet strong enough to carry as many as 75 passengers. They are about to erect another large building, to accommodate an increasing trade.—*Philadelphia Ledger.*

Winona and St. Peters Railroad.

The Milwaukee *Wisconsin* learns from Col. De Graffe that he has just finished the grading of the Winona and St. Peters Railroad, 48 miles beyond the State line into Dakota; the iron on which is to be laid before the first of September, in order that the Chicago and Northwestern may secure the land grant. The Northwestern is taking up the old iron on some of its more traveled divisions, and relaying it on the western division of the Winona and St. Peters. Since Colonel De Graff has finished this job, he is looking around for more railroads to build, and hopes to put his next spade in Wisconsin, into the Lodi Extension Road; though we consider it very dubious whether the Northwestern will be able to raise the money to build this road until the summer of '74.

New Railway Projected.

A new railroad project is being developed in the northeastern end of this State, which, when completed, will not only open up a rich mineral and agricultural region, but serve as an important feeder to lines with which it is to connect. The new road will extend from Binghamton, Broome county, New York, to the State line, near Nichols, in Tioga county, a distance of twenty-four miles of very light grades. From the State line, up the Wappaseening and Mud creeks, six miles to the Beaver Meadow summit. The grade on these six miles will average forty feet, with a maximum of fifty feet to the mile. Then follows a down grade along the valley of the Wysox creek, of twenty-eight feet to the mile, with a maximum of forty feet for ten miles, to Wysanking, a station on the Pennsylvania and New York Railroad. Thence from Wysanking, crossing the Susquehanna River, at or near Towanda, six miles, with little or no grade to overcome, to Monroeton, Bradford county, which is at the junction of the Dushore or Sullivan and Erie Railroad with the Barclay Railroad. Thence from Monroeton, in a westerly direction, up the valley of the Towanda creek, twenty-two miles, with a mean grade of forty feet, and a maximum of forty-five feet to the mile, to Canton, a station on the Northern Central Railroad.

From Canton there is direct communication with Pittsburg, as follows: From Canton to Williamsport, by the Northern Central Railroad, forty miles; from Williamsport to Lock Haven, by the Philadelphia and Erie Railroad, twenty-five miles; from Lock Haven to Tyrone, by the Bald Eagle Valley Railroad, fifty-five miles; from Tyrone by the Pennsylvania Central, one hundred and thirty-one miles to Pittsburg; making the total distance from Binghamton to Pittsburg, three hundred and nineteen miles, with only sixty-eight miles of new road (*i. e.*, from Binghamton to Canton) to build, and that through a country requiring very light grades. The cost along this line will not exceed $10,000 per mile, including right of way and bridges. This route will give a complete connection with the Sullivan and Bradford county coal mines, and an unbroken line of transportation northeast and southwest across two of the most enterprising States in the Union.—*Pittsburg Chronicle.*

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending July 19, at 450,644 tons, and for the coal year 10,113,449 tons, against 9,959,201 tons to corresponding time last year, being an increase of 154,248 tons. The bituminous tonnage for the week is 58,549 tons, and for the year 1,282,909 tons, giving a total of all kinds for the week of 509,193 tons, and for the year of 11,396,358 tons, against 11,083,216 to same time last year, being an increase of 313,142 tons.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending July 15, are: freight, $44,448 89; passengers, $28,340 87—total, $72,789 76.

☞ The earnings of the Erie Railway Company for the week ending July 15, 1873, were $488,747, and since July 1, $783,263—an increase over the corresponding period of the previous year of $51,937.

☞ The Omemee and Bobcaygeon Railway, connecting the latter place with the Midland (Canada) Railway is likely to be built soon; the necessary stock has been subscribed and bonus voted, and it is said that grading will commence at once.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.
1867	38,169	51,831	60,029	81,156	96,828	121,702	174,812	181,297	200,550	212,109	128,166	75,871	1,470,653

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 2, 1873.

Stock Exchange and Money Market.

Money has been in unusually liberal supply all through the week, and rates have been working very easily for all responsible borrowers. Call loans have been quoted at from 3@4 per cent, as the rule, with offerings at these figures largely in excess of the requirements of the leading street firms. Choice to very good discounts have been quoted from 5½@7½ per cent per annum, with the better grades of commercial paper in very good request at the current rates. Short time loans to the Stock Exchange houses have been offered quite freely at from 4@6 per cent per annum. The city banks, in their latest weekly statement, exhibited more than the customary steadiness near the close of July. The Gold Notes average is off about a million of dollars, and the Greenbacks are up a corresponding amount. The general line of deposits is slightly lower, as well as the loans and discounts. The surplus of Gold Notes and Greenbacks over the required 25 per cent to deposits and circulation is $14,610,000, against $14,274,000 last week. The city banks last week reported a loss of over a million in their deposit line, with a gain of over a million in their legal tender, and a decrease of more than a million in their specie reserves. They reduced their loan and discount averages nearly half a million, and their circulation slightly.

The city banks gained slightly on their obligatory reserve, the last statement showing that they had $14,610,450 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, reduced its coin balance slightly; and augmented its currency reserve nearly a million. Its currency reserves at the close of the week were $28,182,099; and its coin board, $40,615,-433.

The clearances of the city banks averaged through the week about 91¼ millions a day, and amounted in the aggregate, for the whole week, to $547,225,952, as against $527,666,746 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $943,446 and reduced its coin reserve $85,210 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $31,249,300, against $28,498,700 same time last year. The city bank deposits are now $239,118,300 against $245,062,700, week ending July 27, 1872. The legal tender reserve amounts to $49,957,000, against $53,751,900 same time last year. The circulation now stands at $27,225,100 against $27,350 000 same time last year. The loans are now $289,389,100 against $295,136,900 at this date last year.

The coin reserve of the city banks is now a little over 31¼ millions, as against about 15 millions Feb. 21, 1873, and about 25¾ millions on the 20th of last July; the legal tender reserve is nearly 50 millions against about 34⅞ millions April 5th, 1873, and 55½ millions on the statement of June 15th, 1872; and the deposits are now about 239⅛ millions, against 186⅞ on the 12th of April, 1873, and 247½ millions on the 20th of July 1872.

Government revenues have been yielding moderately, since our last. The excises yielded within the week about two millions, and thus far in the current fiscal year commencing with July 1, 1873, $7,536,280. The customs at the port of New York, for the week, were $2,311,420, and at the outports, about $775,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $3,569,896 of currency, and $4,433,379 of gold, the latter including $2,395,000 from customs; and disbursed $2,626,449 of currency and $4,518,589 of gold, the latter embracing $841,000 of coin interest.

The Gold speculation has been moderately active, and the operators for a rise have been more decided in their efforts to work up the price, though, in the face of a weaker range in the foreign exchanges, their success has not been very encouraging, the later dealings showing less firmness. The customs call has been moderate, and the export drain light. The range of the price during the week has been from 115⅜@116⅛, and the quotation on Wednesday was 115⅞ against 115⅞ on Wednesday of the preceding week. The specie outflow last week, was $624,839. The Gold Exchange Bank clearances have averaged about 46⅝ millions per day during the week.

The customs demand for Gold last week, averaged $899,120 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $16,105 and thus far in 1873, have been $2,081,190, against $2,739,453 in 1872. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $72,078,400 against $83,080,584 during the same time in 1872.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873 $47,122 524, against $52,972,890 during the same time in 1872.

The export drain of specie was $624,839 last week, against $4,376,713 same week preceding year. The shipments since January 1, 1873, have been $37,194,727 against $52,630,994 during the same portion of 1872.

Foreign Exchange has been lower and irregular, on more liberal offerings, in part from second hands. The demand has been moderate at the reduced figures. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, at 109⅛@109¼. The week's exports of Domestic Produce have been to the currency value of $5,764,223.

Government securities have been in very light supply and held with much firmness, with a good demand noted.

U. S. sixes of 1881 closed on Wednesday of this week at 119¾@120; U. S. Five-Twenties of 1862, 117¼@117⅛; U. S. Five-Twenties of 1864 at 117⅝@117⅞; U. S. Five-Twenties of 1865 119¼@119⅛; U. S. Five-Twenties of 1865 consolidated 117⅝@117⅞; U. S. Five-Twenties of 1867, 118⅞@119; U. S. Five-Twenties of 1868, 118⅛@118¾; U. S. Ten-forties at 115⅛@115¾; U. S. Fives of 1881 (Funding Loan) 116@116⅛; Six per cent. currency Sixes from 114⅛@114⅜.

The Syndicate is represented as having made a final and satisfactory settlement with the Treasury Department, on account of the Five-Twenties called in, under the call of March 1.

The Railway and Miscellaneous share speculation has been quite active, with the Vanderbilt Stocks, Erie, and Western Union leading off, and prices showing decidedly more firmness.

State bonds have been in fair demand chiefly on investment account, at firmer rates.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 16.	July 23.	July 30.
Consols	92⅝	92¾	92⅛
U. S. 5-20s, 1865	93¾	93⅞	94⅛

" 10-40s	90¾	91	91⅛
New Fives of 1881..	*89⅞	90¼	90⅝
Erie	46⅛	46⅞	46¼
Ill. Central	*82	83	....

* Ex interest.

At the auction sale of Scranton Coal on Wednesday, 75,000 tons were disposed of at advanced figures, the range having been from $4 65@$5 42½, as against $4 42½@$5 32½ in June.

Railway Mortgage Loans have been more sought after at generally stronger prices for the favorites of the old issues. Central Pacific Sixes have been in quite active demand at from 100¼@100½ ex the July three per cent coupon. The Chesapeake and Ohio Seven per cent gold bonds have been in fair request at 90, and interest. Chesapeake and Ohio Sixes have been selling readily

at 88½ and interest. Western Pacific Sixes at 92½, ex the July coupon of three per cent. The Northern Pacific 7-30 Loan has been in good demand at par and interest.

General business has been more active. Prices of domestic produce have been unsettled; Breadstuffs, generally lower; Cotton steady; Provisions stronger. Middling upland Cotton left off tamely at 21c. per lb. The receipts at all the ports, since Sept. 1, have been 3,545,726 bales, against 2,668,757 bales same time in the preceding year; exports 2,597,616 bales against 1,920,500 bales in the previous year; stock at the ports at latest dates, 185,429 bales against 118,600 bales same date in 1871.

Metals have been moderately dealt in, as a rule. Copper has been decidedly more active and quoted stronger in price, with sales reported of 3,000,000 lbs. Lake at 27c.@27½c. for prompt, and 28c. for forward deliveries. Iron has been in comparatively fair demand, and quoted firm, with sales reported of 150 tons Scotch Pig, in lots, at $45 75 for Glengarnock, and $44 for Eglinton now quoted higher; 400 tons No. 2 American Pig at $44. We now quote: Eglinton Pig at $45; Glengarnock, at $46@$47; No. 1 American Pig at $45@$48; No. 2 do. at $43@$45; Wrought Scrap at $46@$48; English rails at $65@$68, gold; American Rails, at works, at $75@$80. Old Rails $50@52. Pig Lead has been inactive, with foreign quoted at 6⅝c., gold, for ordinary. Spelter has been very quiet at 7⅛c.@7⅜c., gold. Pig-tin has been in slack demand, with Straits quoted at 31½c.@31¾c., with English at 29c., and Banca, at 35c., gold. Sales, 5 tons English at 29c., gold. Tin Plates have been in fair request, but at easier rates, with sales reported of 500 boxes Charcoal Terne on private terms; 1,500 boxes Coke at $8 75, and 300 boxes Coke Terne at $8 50, gold. Charcoal Plates quoted here at $11 @$11 87½; Charcoal Terne, $9 75@$10 25; Coke Terne, $7 75@$8 50, gold, per box. Zinc dull and wholly nominal.

The public debt statement, to be issued on the first of August, will not report the full amount of new fives issued and five-twenties redeemed, for the reason that all bonds redeemed have to pass through the books of the Register, Auditor and Comptroller before being credited to the Treasurer of the United States, from whose books the debt statement is made out. This necessarily takes a great deal of time, and more than usual now that so many of the clerks are away on their summer leave of absence, thus reducing the clerical force, which, when full, is just sufficient for the ordinary current business; so that, although the Syndicate have received and paid for fifty millions of new fives, but little more than thirty millions can appear in the debt statement.

There has been more activiy in the line of foreign goods, and prices have shown more steadiness. The week's imports of foreign goods and merchandise amounted to $6,967,706 including $2,756,867 of dry goods.

Ocean freights have been moderately active, and rates have been generally steady, with the main inquiry for room, for Grain, Cotton, Cheese, Bacon, Tobacco, Petroleum, and Rosin.

At the Live Stock Markets, Beeves have been n moderate demand at from 8@13 cts. Veals at @9 cts.; Sheep at from 3¾@6¼ cts.; Spring Lambs 6½@10 cts.; Swine at 5¼@5¾ cts. per lb., all live weight. The week's receipts were 10,084 Beeves, 2,901 Veal Calves, 28,699 Sheep and Lambs, and 30,216 Swine.

Jersey City and Albany Railroad.

On Wednesday, July 30th, at the invitation of the managers, a number of gentlemen of the press made an inspection of the completed portion of this road. It is now finished as far north as Tappantown, Rockland county, N. Y., just over the New Jersey border, and about a mile and a half back from the Hudson. Thence it is to be pushed rapidly on, closely following the course of the river, by Haverstraw and West Point, and so to Albany. The expectation is that between here and Albany this road will be a formidable competitor with the Hudson River road, and that in any event the local opportunities will give it ample support.

The route, generally speaking, from Hackensack (which is reached over the track of the Midland Railroad) through Hudson and Bergen counties in New Jersey and Rockland county, N. Y., as far as Haverstraw, runs to the west of the heights that abut on the Hudson. From Haverstraw it generally hugs the river bank pretty closely all the way to Albany. The portion now completed, from Hackensack to Tappantown, is twenty-five miles long. The whole is to be completed within a year. It is now graded nine miles beyond Tappantown, and workmen are laying the track. All has been paid for thus far at an average cost of $60,000 a mile.

☞ At the annual meeting of the stockholders of the Northwestern North Carolina Railroad, held at Greensboro', N. C., on the 21th ult., the following directors were elected: A. S. Buford, A. Y. Stokes, W. T. Suthedin, H. H. Marshall, and W. L. Owen, of Virginia; Thomas B. Keogh, E. Belo, R. L. Patterson, W. H. Wheeler, H. W. Fries, Charles E. Shaler, and T. H. Holt, of North Carolina. Colonel A. S. Buford was elected president, and was authorized to take immediate steps to extend the road through the Yadkin valley to Tennessee.

☞ The directors of the North Colonization Railway have accepted the tender of Messrs. D. McDonald and H. Abbott, contractors, for the sum of $4,220,500, exclusive of extra works, rating at $29,750 per mile, exclusive of bridges and equipment. It is expected that the railway will be open for traffic by October, 1875.

☞ Surveys are now being made through North and East Brookfield, Leicester and Spencer for the proposed new railroad from Worcester to connect with the Massachusetts Central, probably at Ware. If the road should be built it is yet uncertain whether East Brookfield will be included in the route.

☞ A survey has been commenced for a new railroad bridge across the Kennebec, between Waterville and Kendalls Mills.

Knoblauch & Lichtenstein,

No. 37 Broad-st., New York.

OFFER FOR SALE

$200,000

7 Per Cent. First Mortgage Bonds,

30 YEARS TO RUN,

OF THE

CENTRAL R. R. EXTENSION COMPANY

OF LONG ISLAND,

At 90 and Accrued Interest in Currency

The road runs from Farmingdale, the present terminus of the Central Railroad, to Babylon on the South Shore of the Island. According to contract, the road will be finished by July 15th, ready for this summer's travel.

These Bonds being a *home security*, and among the best ever offered in this market, we take special pleasure in recommending them.

Pamphlets or further particulars will be promptly furnished on application.

Sheboygan and Fond du Lac Railroad.

The Fond du Lac *Commonwealth* of 16th ult., states that at a meeting of the Directors of the Sheboygan and Fond du Lac Railroad, held that morning, James F. Joy accepted the position of President in place of Mr. Bentley, who retires in his favor. Mr. Bentley also resigned his position as one of the Directors. Brandon Mozley will continue to act as Superintendent. The Commonwealth expects to see the road extended to Grand Rapids where it will intersect with the Wisconsin Valley and the Green Bay and Lake Pepin Railroads, the first of which is on its way to the richest regions of Northern Wisconsin and the second rapidly advancing toward the Mississippi.

☞ The contract for the stone work of the new Union bridge which will span the Allegheny river from the Point in Pittsburg to Grant avenue, Allegheny, has been awarded to Messrs. John and Thomas Megraw, of Allegheny. The contract price is $80,000. This enterprise is in good hands and will be carried to successful completion.

☞ At Battle Creek, Michigan, on the 30th ult., the stockholders of the Peninsular Railroad Company unanimously ratified a proposition to consolidate with the Port Huron and Lake Michigan Railroad, the consolidated line to be known as the Chicago and Lake Huron Railroad. The road will be 250 miles long.

☞ Cars began running to the Twin Mountain House over the Mount Washington branch of the Boston, Concord and Montreal Railroad on the 24th of July.

☞ Work on the Massachusetts Central Railroad is going on vigorously at Oakdale. The abutments for the bridges there are now ready for the timbers.

☞ The Summit Branch Railroad Company has declared a dividend of 3 per cent payable August 11.

☞ Banking House of Fisk & Hatch, No. 5 Nassau-St., New York, July 30, 1873.

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds:

THE CHESAPEAKE AND OHIO SEVEN PER CENT. GOLD BONDS; principal and interest payable in gold coin, in New York; interest payable Jan. 1 and July 1; coupon or registered. Price **90** and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD IS A COMPLETED TRUNK LINE, BETWEEN THE ATLANTIC SEABOARD AND THE GREAT WEST, 420 miles in length, extending from tide-water, at Richmond, to Huntington, the most favorable point of railroad connection with the Ohio River, and developing the richest Iron, Coal, and Timber Regions in the United States.

ITS FREIGHT TRAFFIC AND PASSENGER TRAVEL are already large and remunerative, and they are increasing with a rapidity which shows the Chesapeake and Ohio to be one of the most valuable and successful railroads in the country.

These facts, together with the thorough construction and superior character of the road itself, its advantages for economical and profitable operation, and the unquestionable security of the bonds of the Company, enable us to recommend them with the utmost confidence.

Pamphlets containing full information concerning the Road, and the country it traverses, will be furnished upon application.

We also have on hand for sale the CHESAPEAKE AND OHIO SIX PER CENT. GOLD BONDS at 88¼, and accrued interest. Interest payable May and November. Denominations $100, $500, and $1,000—coupon or registered.

We continue to deal in GOVERNMENT SECURITIES, and CENTRAL PACIFIC, and WESTERN PACIFIC BONDS; buy and sell Stocks and Bonds at the Stock Exchange on commission, for cash; make Collections, receive Deposits, on which we allow interest at the rate of Four per Cent., and do a general banking business.

FISK & HATCH.

St. Paul and Pacific Railroad.

We learn from the Milwaukee *Wisconsin* that one division of the St. Paul and Pacific is finished to Breckinridge; it will require the construction of only forty miles to connect it at Fargo with the Northern Pacific. By this construction the company would secure a valuable land grant, which will otherwise be forfeited by the first of December next, yet it is doubtful whether capital can be secured during the current year to complete this gap of only forty miles. Railroad contractors are waiting at St. Paul under the hope that work will be re-commenced on the St. Paul and Pacific.

☞ In the course of the year ending March 31, 1873, new lines were opened in France to the extent of 323¾ miles. The extent of line worked in France at the close of March, 1873, was altogether 11,162 miles.

☞ The Chester and Tasparos and Chester and Iron Mountain Railroad Companies have been consolidated as the Iron Mountain, Chester and Eastern Railroad Company of Missouri.

Journal of Railroad Law.

RAILROAD COMPANIES—LAW OF NEGLIGENCE—THEIR LIABILITY FOR INJURY TO STOCK—RULE AS TO FENCING THEIR ROADS.

The facts in the recent case of The Chicago and Northwestern Railway Co. *vs.* Harris, (54 Ill., 528), are fully and clearly stated in the following opinion by—

WALKER, J.—This was an action on the case brought by appellee in the Winnebago Circuit Court against appellant to recover for injuries to two horses inflicted by a train on their railroad. It appears that about the 21st of November, 1869, appellee let his horses into his yard to water, but being unable to get them back to the pasture, he left them and went to church, it being Sunday. He left all of the gates of the lot in which the horses were left, closed, but on his return from church, a little after noon, the horses had got out and were gone.

It appears the horses entered Hager's land through open bars, and through Delaney's land, and through Amos Harris' land no fence separating these three tracts, and from his land they passed through an open gate at a farm crossing and then passed east on the track about eighty rods, where they were struck by appellant's locomotive and trains, coming from the west, at a culvert, at an embankment. One of the horses was so much injured that he was never removed from the ditch into which he was precipitated, and was finally killed. The other was badly injured, but was removed to appellee's stable, where he remained for about two weeks, when it became necessary to kill him. The horses were proved to be worth from $225 to $250 before they were injured.

The place where the injury occurred, and the gate through which the animals passed to the railroad track, were points at which appellants had fenced their track, and had put in the gate. It seems the gate had been open for some time, and the section foreman had passed frequently while it stood open. The jury found a verdict for appellee. A motion for a new trial was entered, which was overruled and judgment rendered on the verdict, and the case is brought to this court by appeal, and a reversal is asked.

The section foreman testified that he was in the habit of passing that part of the road four times each day, for the purpose of inspecting its condition. And the evidence, we think clearly establishes the fact, that the gate had stood open about a week before the accident. This, then, established negligence on the part of appellants. On that point, we can find no fault with the conclusion of the jury. The evidence fully warranted them in arriving at that conclusion. But it is urged that appellee was also guilty of negligence, and to that degree that he was not entitled to recover. The law requires these companies to fence the track of their roads with sufficient fences to turn stock, and after erecting them, to keep them in repair. The statute also requires them to put in gates at farm crossings. These gates are a part of the fence, and the duty to keep their fences in repair, includes the duty of keeping them safe and securely closed, so as to afford equal protection from stock getting upon their roads at such places as at other points. See Illinois Central R. R. Co. *vs.* Arnold, 47 Ill., 173. And in that case it was held, where an animal entered the close of another, through an insufficient fence upon the highway, and passed thence through a space made for bars, and used as a farm crossing upon the railroad track, and was killed, and it appeared that the bars were left down for three months previously, that the statute required the railroad company to erect and maintain sufficient fences, of which bars formed a part, and the company were guilty of negligence in permitting them to remain down so long a time.

That case differs from this, in the length of time the two fences were permitted to remain open to the passage of stock to their roads. But to permit a gate to remain open for a week is negligence. While the company were not required to keep such a guard on their road as would see a break at the instant it occurred, and repair it at the time, still the law requires them to keep such a force as may discover such breaches and openings in their fences, and to close them in a reasonable time. And to neglect doing so for a week or more is a neglect of duty that will ordinarily render them liable for the injury ensuing therefrom.

As to the fact that appellee's horses entered his brother's field, and passed thence upon appellant's road, does not affect appellee's right of recovery, as we have seen from the Illinois Central R. R. Co. *vs.* Arnold, *supra*. This case is like that in this respect, and that must govern this, as no reasonable distinction can be drawn between the two cases.

It is also urged that appellee was so far in fault in permitting his horse to run at large, when prohibited by the statute, that he should not be permitted to recover. It is manifest that he had not observed the law in that respect. The escape of the horses was involuntary on his part, and it seems he made reasonable efforts to reclaim them soon after their escape, but was unsuccessful. He continued the search for them, as he swears, until dark of the night they were killed. And he says the last he saw of them while endeavoring to get them up, they were going in an opposite direction from the railroad. Had he caught them, he would no doubt have prevented the injury. But while it was a violation of the law to permit them to be at large, the company were violating another law in permitting the gate to remain open, which, if shut at the proper time, would have prevented the horses, from getting upon the track, and receiving the injury. It may be appellee was liable to answer to whoever might prosecute for his breach of the statute he had violated, but that did not relieve appellant's from their duty and the statute that required them to keep their fences in such a condition as to prevent stock from getting upon their road. Because appellee may have violated another law, the company were not at liberty to omit their duty and thereby kill appellee's horses. The evidence seems to be clear, that appellants had permitted this gate to stand open a large portion of the time during the Summer and Fall previous to the accident. Appellee's permitting the horses to be at large was not willful, but it seems he made all reasonable efforts to prevent it. And under the circumstances, we think the negligence of appellants was so much greater than that of appellee, that, when compared, that of the latter was slight, and rendered appellants liable for the injury.

The instructions given are in harmony with the views we have here expressed, and those refused announce different and incorrect rules of law, and the modifications made in appellants' instructions, before they were given, were proper.

The instructions, taken altogether, were as favorable as appellants were entitled to receive, and no error was committed in giving or refusing them. The judgment of the court below must be affirmed.

Judgment affirmed.

Crossing Railroad Tracks.

An important opinion has recently been delivered by Justice Sharswood, of the Supreme Court, relative to the law governing a certain class of railroad accidents. The case in point was that of Beale *vs.* The Pennsylvania Railroad Company, tried in the Common Pleas Court of Juniata county, before Judge Bucher. Mr. Beale was driving across the railroad track in the village of Patterson, and was struck and killed by an eastward bound train. It was not denied that he failed to stop before crossing. At the trial the Judge instructed the Jury in case they found the train could not have been seen or heard by the deceased, to find a verdict for the plaintiff, inasmuch as there was no occasion for stopping at the track when there seemed to be no danger. The case was taken to the Supreme Court on behalf of the widow and children, where the judgment of the lower Court was reversed in the following remarks made by Judge Sharswood: "There never was a more important principle settled, than that the fact of the failure to stop immediately before crossing a railroad track, is not merely evidence of negligence for the jury, but negligence *per se*, and a question for the Court. It was important, not as much to the railroad companies as to the traveling public. Collisions of this character have often resulted in the loss of hundreds of valuable lives—of passengers on trains—and they will do so again, if travelers crossing railroads are not taught their simple duty, not to themselves only, but to others. * * The Judge should, upon the uncontradicted evidence, have directed a verdict for the defendants." The Supreme Court further decide that the "duty of stopping is more manifest where an approaching train cannot be seen or heard, than where it can."

☞ The New Hampshire Legislature recently authorized the Nashua and Rochester Railroad Company to issue bonds to the amount of $700,000, provided they were guaranteed by the lessees of the road—the Worcester and Nashua Railroad Company. The stockholders of the latter road, at a meeting on the 26th ult., voted to accept the act and guarantee the bonds.

☞ The gross earnings of the Northern Central Railway and branches for the six months ending June 30, 1873, were $2,403,409 47, the expenses $1,828,638 77, and the net earnings $574,770 70. For the corresponding six months of 1872 the earnings were $2,076,552 33, the expenses $1,667,453 77, and the net earnings $409,098 56—showing an increase in earnings of $326,857 14, an increase in expenses of $161,185, and an increase in net earnings of $165,672 14.

☞ The Milwaukee and Fond du Lac Air Line Railroad was completed on Saturday, July 26.

Railway Progress in Egypt.

Egypt is making wonderful progress under the rule of the present Khedive. From a recent report of Mr. Rogers, British Consul at Cairo, we find that there are altogether about 750 miles of railroad now working in Egypt. There is a network of railways over the Delta placing most of the principal towns and villages in communication with each other. On the left bank of the Nile there is a railroad from Cairo and Rhoda. The northern terminus is at Embaba, a place just opposite Boulac, which is a suburb of Cairo, and trains are taken across the Nile on a railway ferry. But this ferry is only available during a portion of the year, owing to the rise and fall of the water of the Nile. It is the Viceroy's wish to facilitate the trade with Upper Egypt and Nubia; and for this purpose he intends to abolish the ferry, and carry on the line of railroad still on the left bank, in a northerly direction, as far as Tell el Barud, where it will join the main line, and to extend it in a southerly direction as far as Khartoum. There are telegraph lines on all the railroads, and in Upper Egypt, where there is as yet no railway.

Pittsburgh, Wheeling and Kentucky R. R.

An election was held in Brooke county, last Saturday, to determine whether the authorities should make an additional subscription to the Pittsburg, Wheeling and Kentucky Railroad of fifteen thousand dollars. From a gentleman who came down from Wellsburg, yesterday, we learn that all the precincts but one had been heard from, and that the majority in favor of making the subscription was one hundred and seventy-eight in excess of the three fifths vote required. The precinct yet to be heard from would not materially change the result either way. The board of commissioners of this county subscribed a like sum several weeks since, thus placing an ample fund for the completion of the road to the credit of the company.—*Wheeling Intelligencer.*

☞ The St. Clair and Carondelet Bridge Company have decided on a new railroad bridge across the Mississippi river at South St. Louis, about two miles below the centre of the city. The bridge will have two channel spans six hundred feet long, on the suspension principle, and two shore spans three hundred feet on the truss principle, the design and modes of S. R. Davis, a well known engineer of New Haven, Conn. The bridge will also be arranged for vehicles and foot passengers, and will be commenced as soon as the Government engineers have determined upon the site.

☞ The president and directors of the Wellington, Grey and Bruce (Ca.) Railway recently made an experimental trip over the second section of the line, from Listowel to Bluevale, a point within 4 miles of Wingham. The distance opened is 27¼ miles, and on the line there are 5 stations, Newry, Henfereyn, Ethel, Brussels, Bluevale. The remaining portion to Kincardine is proceeding very satisfactorily. Part of this railway will be opened for traffic purposes very shortly.

☞ The largest casting ever made in Harrisburg was turned out last week, at the foundry of the Harrisburg Car Manufacturing Company. The casting is thirty feet long, two inches thick, about eight feet wide, weighs about fourteen tons, and is intended as a bed plate for the engine being constructed at the Machine Works for the new water works.

☞ The Levant *Times* states, that another section of the railway from Keupruli to Uskup has been finished and is only waiting for the arrival of a Government Commission of inspection from Constantinople to be opened to public traffic. The whole length of the line from Salonica to Uskup is 148 miles. The section from Uskup to Mitrovitza towards the Servian frontier is progressing, and if the Servians would only put their shoul'ders to the wheel and begin their portion of the Turkish network and construct it as quickly and as well as the Turks are doing theirs, four years hence we may have the Indian mails landed at Salonica!

☞ Sir Hugh Allen has been elected President, Louis Beaubien, M. P., Vice-President, Mr. De Bellefeuille secretary-treasurer, and Mr. Murphy, managing director of the Northern Colonization Railway Company. The tenders received for the whole road are now under consideration, and there is every prospect that the work of construction will be commenced at an early date.

☞ Austria and Hungary have been making great progress in the development of railways during the last few years. In 1867 they had 826 German miles of line in operation; in 1872 the total had risen to 1,812 German miles.

☞ The stockholders of the Cincinnati and Baltimore Railroad have determined to construct a branch from its main line, near Eighth Street to a connection with the Ohio and Mississippi Railroad in Storrs Township.

DREDGING MACHINES AND SCOWS
FOR SALE.

One (Osgood Pattern) Second Hand. Price $10,000.
One, Almost New. Price $22 000.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

Opening of the Union Railroad.

Yesterday, at 9.20 A. M. the first train of cars passed through the Union Railroad tunnel, and two other trains passed through later in the day. At that hour the fast train from Washington for New York arrived at the Potomac depot, at Charles street, and in ten minutes it passed through the tunnel, which is 3,410 feet long, and sped on its way northward on the Philadelphia, Wilmington and Baltimore track which forms a junction with the Union Railroad near Bayview Asylum. But one track is laid in the tunnel, but the ballasting for the second track is being put in as rapidly as possible. The cars moved over the track yesterday with great steadiness, the rails in the tunnel being laid with four feet of stone ballasting to give the utmost firmness.

The north bound trains have the right of way over the Union Railroad, an arrangement having been made by which a through train from Washington *via* the Union and Baltimore and Potomac Railroads is established, and through checks and tickets will be given and received *via* the Baltimore and Ohio Railroad, and cars will be switched off at its junction with the Union Railroad for those who prefer that route.

Live stock reaching the city by the Northern Central Railroad is transferred through by the tunnel to the Calverton scales, on the western suburbs. Live stock for the North passes through the tunnel to the east side of the city. Live stock can be thus transferred to this market and to different points in the city and be known only to those interested in regard to it. Two thousand hogs passed through the city Wednesday morning, and no resident of Lexington or Fayette streets was annoyed. It is intended now to deliver hogs to butchers in East Baltimore through this tunnel, but in case such an arrangement cannot be made with the company, the hogs for that section of the city will be well dressed and hauled through the streets.—*Balt. Sun*, July 25.

Green Bay and Lake Pepin Railroad.

The distance between Merrillan, the present western terminus of the Green Bay and Lake Pepin Railroad, and Winona, is between 55 and 60 miles, the country, the Trempealeau valley, being a thickly settled and rich farming country, interspersed at frequent intervals with thrifty and prosperous villages like the New England States, and needing only railroad communication to make them among the most desirable locations in the State. Vast expanses of fields of waving grain, ripening for the sickle, stretch in every direction, and the scenery is magnificent. Twenty-five miles of the road from Merrillan westward are already graded ready for the ties and iron, and it is anticipated that the road will be completed to Winona by the 1st of October. Arrangements are already perfected by which the company will use the Winona and St. Peter Railroad bridge across the Mississippi at Winona. West of Merrillan, the country is destitute of timber both hard and soft, and all the lumber used has to be hauled by teams, some of it a long distance, for building purposes, fencing, etc. The same is true on the line of the Winona and St. Peter Railroad; and the Green Bay and Lake Pepin Railroad will open a new market for the lumber of northeastern Wisconsin.—*Green Bay Advocate.*

☞ F. C. Capreole, President of the Huron and Ontario Ship Canal Co., arrived in Chicago, recently, with Mr. Blaine, a prominent member of the Dominion government. Their mission is to call a meeting of the shippers, Board of Trade and Governors of the Northwestern States, and exhibit to them minutely prepared plans and specifications of the projected canal. The proposition is to run a canal from Georgian Bay and the arm of Lake Huron to the head of Lake Ontario, passing through Lake Simcoe, and it is believed that its advantages to Western shippers will insure its completion.

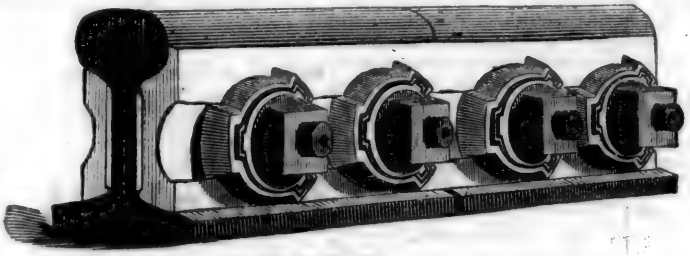
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.



Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

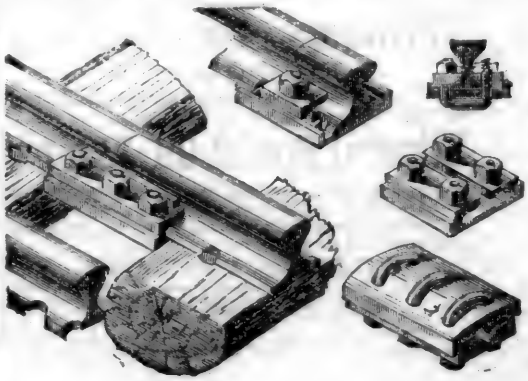
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,

MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

American Railroad Journal.

New York, Saturday, August 9, 1873.

A Parallel Railroad to Boston.

The New Haven, Middletown and Willimantic (Air Line) Railroad was opened from Middletown to Willimantic on the 26th of April, 1873. In reference to the connections of this road, the Middletown correspondent of the New Haven *Palladium* says:

The distance from New Haven to Willimantic is 50 miles, from thence to Putnam about 24, from Putnam to Blackstone 26, from Blackstone to Boston 36, making 136 miles from New Haven to Boston. From Blackstone to Providence is 18 miles, making 118 miles from New Haven to Providence, via the Paovidence and Worcester Railroad from Blackstone. From Willimantic to Providence, via the Hartford, Providence and Fishkill Railroad, is 59 miles, making 109 miles from New Haven to Providence via Willimantic, which is three miles less than the Shore Line route. From New Haven to Boston, via the Shore Line, is 156 miles, which is 20 more than by the Air Line. From New Haven to Boston, via Springfield, is 160 miles. The distance from New Haven to Worcester, via the Air Line to Putnam, is 100 miles; via Springfield, 116; via New London and Norwich, 128. The distance from New Haven to Norwich, via Willimantic, is only 24 miles further than by New London. It is evident that the fares from New Haven, via the Air Line, to Norwich, Providence, Worcester and Boston will not be any higher than by the present routes, and the running times of trains between these places will be as quick as by the old routes. Of course, Middletown will reap greater accommodations than any other city, but New Haven will gain the advantage of having a completed line eastward.

Northern Pacific Railroad Terminus Settled.

We understand that the Northern Pacific Railroad Terminus Commissioners—Judge Rice and Capt. Ainsworth—appointed to select a terminus for the main line of the Northern Pacific Railroad on Puget Sound, have, after a very careful examination of various harbors on the sound, and after having given full hearing to all parties interested, and maturely considering all propositions for aid, by different localities, some of which have been exceedingly liberal, have finally selected a point on the south side of Commencement Bay, in township 21, range 3 East, of Willamette meridian, for that terminus.

In this, we think the commissioners have acted wisely, as the harbor selected cannot be excelled for salubrity of climate, extent, safety, and ease of access both by sea and land, by any harbor in the world. Persons interested in particular locations may for the moment be disappointed in the action of the commissioners, but the commercial world will unhesitatingly approve.

By reference to a map of the country, it will be seen that the location selected is at the head of deep water on Commencement Bay, south of the present town of Tacoma, and combines more advantages for a great commercial city, destined to represent and become a great emporium of trade, beyond any other mart on the Pacific coast, and we sincerely feel assured is to become the second city of the New World.—*Kalama (W. T.) Beacon.*

☞ The extension of the Lexington and Arlington Railroad to Concord has been completed. The new road is leased to the Boston and Lowell for thirty years, the latter company to work the line and keep it in repair, paying six per cent per annum on the cost of its construction ($250,000), reserving the right to purchase the same at cost at the expiration of the lease or at any intervening period.

☞ At the recent annual meeting of the shareholders of the Erie and Niagara Railway Company, the following gentlemen were elected directors: William A. Thomson, M. P., Milton Courtright, Sydney Dillon, John Ross, O. S. Chapman, B. F. Ham and Kenyon Cox. Mr. Thomson was afterwards elected president of the company.

☞ The survey for the continuation of the Chesapeake and Ohio Canal, authorized by Congress last winter, has been commenced.

Wisconsin Central Railroad.

We heard early in the spring that the Wisconsin Central Road designed this year to commence the building of its road from Portage City to Stevens Point, a distance of sixty-eight miles. First we did not credit it, but the persistent efforts of Governor Washburn to prevent the company from obtaining the land grant unless it constructed this section, has brought about its good fruit. The engineers are now at work on the whole line; and as most of the towns on the route have voted some aid, it is probable that the road will be put under contract this season. ☞

The towns north of Portage will be largely benefitted by this improvement. The road pronge at Stevens Point, one line goes to Menasha and the other to Portage City, and as Portage City and Menasha are about equi distant from Milwaukee, passengers can come on either route in about the same time. The lumber at Stevens point can by this road be readily distributed through the towns on the Fox river. That will be a great advantage to farmers in that section, as lumber on account of the uncertain navigation of the upper Fox, is at times very dear.—*Milwaukee Wisconsin, July 30.*

A New Railroad to Baltimore.

A corps of engineers in the employ of the Pennsylvania Railroad Company is now engaged in making a preliminary survey of the route for a branch or extension of the main line of that road to Baltimore. The new road will leave the main stem near Penningtonville—the point at which the latter turns to the northwest to pass through the Gap into the Pequea Valley—and keeping the same southwesterly course which the parent line has maintained through the Chester Valley will pass by Quarryville and the Buck, beyond which latter place it will strike the headwaters of Fishing creek, and will follow this stream to its mouth, where it will reach the Susquehanna at an elevation of some sixty feet above the bed of the river; running now up the river, the road will follow along the side of the bluff, gradually descending to Phites' Eddy, at which point a bridge will be thrown across the Susquehanna, the piers resting on the islands which are here conveniently located in the river. On the York county side the road goes up the valley of Muddy creek, and connects at an eligible point with the Northern Central Railway.

The engineer corps commenced their survey at Phites' Eddy and have now reached a point near the Buck. They believe thatthey have now secured a proper grade; a year or two ago the same route was surveyed at the instance of the Pennsylvania Railroad but it was found that Fising creek descended so rapidly to the river as to

make the grade, following along the bed of the stream, impracticable; this difficulty has been overcome in the present survey, by taking the line along the hillsides bordering the creek, striking the river high up on the bluff and following up its course for between one and two miles to Phites' Eddy.

The contractors on the Columbia and Port Deposit road are rapidly finishing up their work and in the course of two or three months the whole line will be graded, and if the Pennsylvania Railroad is disposed to put the road at once in operation, there is nothing to prevent its being placed in running order by next spring.—Col. McGoven, who has a section of three miles above Cully's falls, tells us he will be done inside of two months. The work below Phites' Eddy is in an equal state of forwardness; between the eddy and Cully's falls a good deal of work remains to be done, but it is not heavy and need cause no delay.—*Lancaster (Pa) Intelligencer.*

Milwaukee and St. Paul Railway.

We have received a copy of the Report of this company for the year ending December 31, 1872, from which we learn that the number of miles of road owned and operated by the company during the year was 1,283, exclusive of side and double tracks—being an increase over the year 1871 of 265 miles. In addition to the 1,283 miles, the company owned from Winona to La Crescent, 27 miles; but this line was not completed or operated during the year 1872. The terminal points and distances are as follows:

	Miles.
Milwaukee to St. Paul, via Prairie du Chien	495
Milwaukee to La Crosse, via Watertown	166
Milwaukee to Portage City via Horicon	95
Horicon to Berlin and Winneconne	58
Watertown to Madison	87
Milton to Monroe	42
Calmar to Algona	126
Conover to Decorah	10
Austin to Mason City	40
Mendota to Minneapolis	9
La Cresent to St Paul	130
Hastings to Glencoe	75
Sabula to Marion	87
Total miles owned by the company	1,310

Since the close of the year 1872, the company has acquired the Chicago, Milwaukee and St. Paul Railway, extending from Chicago to the State Line, and the Wisconsin Union Railroad, extending from the State Line to Milwaukee—the cost of which is not included in this report. The company now own a completed line of railway from Chicago, by way of Milwaukee and La Crosse, to St. Paul, which is the shortest and most desirable route between those cities; also affording the best connection between the Northern Pacific and the great system of roads terminating at Chicago. The distance by this new line is 410 miles.

The company also own $2,001,000 of the capital stock of the Western Union Railroad, being a majority of the capital stock of that company.

The cost of the 1,283 miles of road, including equipment, supplies, bridges and elevators is as follows:

Mortgage bonds	$23,965,500
Preferred stock	10,827,777
Common stock	13,398,554
	$48,189,831
Less cost of Western Union	1,500,750
Cost of 1,283 miles ($36,390 per mile)	$46,689,081

The equipment of the road at the close of 1871 and 1872 compares as follows:

	1871.	1872
Locomotives	155	182
Passenger cars, 1st class	81	62
" " 2d class	11	32
Sleeping cars	9	9
Baggage, mail and express	62	56
Box freight and caboose	2 470	2,720
Flat	590	629
Boarding	....	2

In the following table are shown the mileage of trains, the passenger traffic and the freight traffic on all the roads collectively for the years 1871 and 1872:

Mileage:	1871.	1872.
Passenger trains	1,023,376	1,164,170
Freight trains	2,296,027	2,619,631
Wood and gravel trains	365,386	429,811
Total mileage	3,684,789	4,213,612
Passengers carried	849,631	956,172
Do. carried one mile	45,729 478	49,193,242
Freight (tons) carried	1,463,156	1,697,826
Do. carried one mile	178,676,258	187,361,638
Pass. revenue per mile	3.65 cents.	3 59 cents.
Freight revenue per mile	2.54 cents.	2.43 cents.

The following is a comparative statement of the earnings and expenses during the years ended December 31, 1871 and 1872:

Earnings from:	1871.	1872.
Freight	$4 444,568 11	$4,566,991 24
Passengers	1,698,469 28	1,775,714 84
Mail service	121,535 24	137,032 12
Express service	144,356 78	163,724 43
News service	5,360 09	5,803 36
Rents	7,169 40	4,128 55
Telegraph	5,691 48	5,248 62
Extra baggage	7,057 68	8,652 44
Sleeping cars	40,960 00	48,102 75
Elevator, "A"	89,841 37	105,566 65
Elevators, "B. & C"	97,992 90	100,606 78
Elevator, "D"	11,259 27	19,180 46
Stock yards	16,487 96	17,008 93
Total	$6,690,695 56	$6,957,771 18
Expenses (ordinary)—		
Repairs of track	$640,774 29	763,677 10
" bridges	50,009 16	56,833 06
" fences	17,421 76	27,057 30
" buildings	62,368 79	66,842 22
" loco'tives	242,710 54	250,248 87
" cars	376,560 53	598,275 06
" tools, etc.	38,312 40	43,164 89
Management and general office	115,515 56	128,820 62
Foreign agency & advertising	26,217 98	83,549 77
Station service	454,281 41	472,315 97
Conductors, baggage and brakeman	233,415 59	277,873 12

Fuel consumed	519,094 61	581,597 70
Oil and waste	52 895 53	66,299 93
Personal injuries	11,184 31	13,561 68
Damage to property	14,718 62	18,835 95
Loss and damage of freight & baggage	9,547 08	8 011 86
Legal expenses	20,140 14	20,118 95
New York office exp.	19,360 57	11,700 19
Taxes	197,414 72	178,643 73
Insurance	12,761 64	24 430 14
Miscellaneous	16,856 64	15,340 02
Expenses (extraordinary)—		
Renewal of track	220,156 67	436,643 82
New bridges	20,062 85	19,988 74
New buildings	85,237 80	54,742 74
New tools & mach'ry	1,454 01	12,970 79
U. S. Gov. taxes	810 62	....
Mississippi ferry	41,348 81	53,409 23
Stock yard expenses	6,253 54	6,583 55
Total	$3,850,354 56	$4,695,615 97
Net earnings	$2,840,341 00	$2,262,155 21

The gross earnings of 1872, as compared with those of the previous year, show an increase of $267,075 62, and the expenses an increase of $845,261 41. The net revenue shows a decrease of $578,185 79. The per centage of expenses in 1871 was 58, and in 1872, 67 per cent. Expenses are divided as follows:

	Ordinary.	Extraordinary.	Total.
1872	$4,111,277 10	$584,338 87	$4 695,615 97
1871	3,525,030 26	325,324 30	3,850,354 56
Increase	$586,246 84	$259,014 57	$845,261 41

The earnings and expenses by operating divisions for the two years were as follows:

Gross earnings—	1871.	1872.
La Crosse division	$1,906,896 18	$2 191,920 19
Northern division	720,586 60	718,463 14
Prairie du Chien div.	2,139,116 75	1,810,081 66

Illinois and Iowa div.	....	*4,180 29
Total	$2,840,341 00	$2,262,155 21

* Excess of expenses.

The earnings, expenses and net revenue per mile of road in the two years compare as follows:

	1871.	1872.
Gross earnings	$6,572 39	$5,535 22
Operating expenses	3,782 27	3,735 57
Net revenues	$2,790 12	$1,799 65

It will be seen that while there has been an increase of $267,075 62 of gross earnings, there has been a decrease of $575,185 79 of net earnings. This decrease of net earnings is chiefly owing to the competition, and consequent low prices which prevailed during most of the summer of 1872.

The average price, per ton per mile, received for freight, for a series of years past has been as follows:

1865	3.76	1869	3.10
1866	3.76	1870	2.82
1867	3.94	1871	2.54
1868	3.49	1872	2.43

The expenditures made by the company during the year 1872, not charged to operating account, amounting to $490,480 55, were as follow:

New locomotives and cars	$106,614 10
Mississippi River Bridge at La Crosse	14,356 72
New buildings, turn-tables, etc., on new lines of road	105 221 76
New fences in Iowa and Minnesota	87,387 66
Depot grounds, wharfs, etc., in Milwaukee	20,920 18
New embankment at Mendota and Fort Snelling	10,509 37
Right of way	6,905 75
La Crosse freight burned	1,270 71
Survey Monroe & Dubuque Railroad.	749 00
New buildings and depot grounds at St. Paul	128,949 64
New shop grounds, Milwaukee	21,400 00
Depot grounds, Minneapolis	5,000 00
Depot grounds, Sabula	2,000 00
Depot grounds, Madison	217 00
Depot grounds, La Crosse	1,473 31
Purchase of road, Chicago and Milwaukee Division	119 00
Purchase of road, St. Paul Division	15,818 00
Purchase of road, Hastings and Dakota Division	3,481 11
Purchase of road, Illinois and Iowa Division	3,596 24
Shares of stock in connecting roads	4,500 00
Total	$490,480 55

During the year the Directors, by the authority of the Stockholders purchased the following roads:

The Hastings and Dakota, from Hastings to Glencoe, in Minnesota, 75 miles.

The Sabula, Ackley and Dakota Railroad, extending from Sabula to Marion, Iowa, 87 miles. This road connects by a ferry with the Western Union Railroad at Savanna, and

The St. Paul and Chicago Railway, from La Crescent to St. Paul, 130 miles.

For the purchase of these roads, on all of which there was an equipment in rolling stock, equal in value to $3,000 per mile, the bonded debt of the company, and common stock have been increased as follows:

For the purchase of the Sabula, Ackley and Dakota Railroad $1,485,000 of bonds, and $825 000 of common stock.

For the purchase of the Hastings and Dakota Railroad $1,350,000 of bonds, and $750,000 of common stock.

For the purchase of the St. Paul and Chicago Railway $4,000,000 of bonds; of this amount $3,000,000 were issued in 1872, and $1,000,000 in 1873, which last issue does not appear in the general account for the year 1872.

The company is also operating, under a lease for twenty years, the Oshkosh and Mississippi River Railway, from Oshkosh to Ripon 20 miles, paying as a rental 35 per cent of the gross earnings.

The company have paid two semi-annual dividends of 3½ per cent each, on the preferred stock of the company, out of the earnings of 1872, in cash. No dividends have been declared or paid on the common stock.

GENERAL ACCOUNT, December 31, 1872.

Cost of road and equipment	$47,375,529 18
Western Union Railroad stock	1,500,750 00

Asst. Sec. & Transfer Agent.—JAS M. MCKINLAY. New York.

Auditor.—J. P. WHALING, Milwaukee.

Purchasing Agent.—ROBERT WASON, Jr., Milwaukee.

The Hudson River Bridge.

On Saturday two engineers, Mr. Linville, President of the Keystone Bridge Company, and Mr. Crosby, arrived in Poughkeepsie to commence active operations in preparation for the building of our great bridge. They spent the day in taking observations, getting ready tools, &c., and early this week a party will begin examining the bottom of the river. The first locality examined will be on the line from the high bluff at the ferry landing to that on the opposite side. The spot where the first pier is to be placed will be indicated, and every part of the bottom on which it must stand will be thoroughly examined. For this purpose an apparatus will be used somewhat similar to that for boring artesian wells, the operation being as follows: A float is anchored over the point to be tried and the boring tool, encased in a tube, is let down, which penetrates the bottom and brings up, inside the tube, enough of the material to determine its nature. In this way not only the exact distance down to the bed rock is shown, but the depth and character of the earth or mud deposited over it, and the nature of the rock itself. The location of each pier will be examined in the same way, and, if all is found favorable, work will immediately be begun. If the foundation proves bad another line will be taken, or perhaps two or three will be examined before the exact spot where the bridge will be built is determined.

This work of surveying the bottom of the river is, of course, most important, as the stability of the entire structure depends on the foundation of the piers, and, no matter what it costs, they must be carried down to the solid rock. Very much of the expense of building the bridge depends on the depth at which rock is found, and the nature of the rock when reached. At St. Louis it was necessary to dig down many feet below the river bottom, in one instance nearly 150 feet, through all sorts of obstructions, hulls of old sunken vessels, &c., which had been covered by the sand. The builders of the Brooklyn bridge also found it necessary to penetrate a great distance through hard earth mixed with bowlders, but here no such difficulties are anticipated. The preliminary surveys show that the rock is probably only overlaid by a few feet of mud, and if this is the case the obtaining of a good solid foundation will be easy. The apparatus to be used here is one that was made for the East River bridge, and will be managed by Mr. Crosby, who has had experience in this kind of work.

It will probably take several weeks to complete the examination, but as soon as it is completed ground will be broken and work commenced on the shore abutments. Whether the piers will be built by sinking caissons or by surrounding them with coffer dams will depend on the results of the examination of the bottom, but work on these two will be pushed forward as rapidly as possible. For both abutments and piers, stone of the best quality is required, that will quarry out in large blocks, stand weather, and resist the greatest pressure without crushing. A competent man is now engaged in the stone quarries near Poughkeepsie, to see if stone of the kind required can be found in them. It is said that at a point on the Connecticut Western Railroad it can be procured, and perhaps it can be obtained nearer by.

Detailed plans for the superstructure of the bridge have not yet been made, but it will be what is known as the Linville Truss, a modification of the ordinary iron truss, having certain peculiarities of bracing, fastenings, &c., invented by Mr. Linville, from whom it takes its name. This gentleman, who is one of the first, if not at the head of the bridge engineers of this country, will make the Poughkeepsie Bridge his especial care, as he considers it the grandest structure of the kind ever projected, and when completed it will be a masterpiece—one of the wonders of the world.—*Poughkeepsie Eagle, July 21.*

☞ A plain has been submitted to the Canadian Government by which it is proposed to shorten the time of travel between London and New York to seven days and three hours. The purport of the plan is to push the railway system of this continent to St. John's, Newfoundland, from which place to Valentia Bay Ireland, is only 1,600 miles, which it is contended could be made by ocean racers in 100 hours, and from thence to London in sixteen hours. On this side it is proposed to fill the gap by a branch from the main lines from New York to Montreal and Quebec to a point known as Shippegan, on the Gulf of St. Lawrence. Here passengers and mails would take a steamer to St. George's Harbor opposite, on the Gulf coast of Newfoundland, where cars would flash them across the 250 miles, whence the ocean steamers would immediately sail.

☞ The puddlers in the Phœnixville (Pa.) Iron Works struck for higher wages on the first of April and the company laid not a straw in their way. Now after having lain idle nearly four months, they go to work at their former wages, and only on condition that they have nothing more to do with the Union.

☞ The stockholders of the Old Dominion Steamship Company have decided to increase the capital $200,000, the increase to be used in building two new steamers for the line. The contract is already made for building one of the steamers.
